# Contents

**Mathematical and Numerical Techniques in Energy and Environmental Modeling**
*Zhangxin Chen and Richard E. Ewing* . . . . . 1

**Domain Decomposition for Some Transmission Problems in Flow in Porous Media**
*Clarisse Alboin, Jérôme Jaffré, Jean E. Roberts, Xuewen Wang, and Christophe Serres* . . . . . 22

**Numerical Subgrid Upscaling of Two-Phase Flow in Porous Media**
*Todd Arbogast* . . . . . 35

**Numerical Simulation of Multiphase Flow in Fractured Porous Media**
*Peter Bastian, Zhangxin Chen, Richard E. Ewing, Rainer Helmig, Hartmut Jakobs, and Volker Reichenberger* . . . . . 50

**The Modified Method of Characteristics for Compressible Flow in Porous Media**
*Aijie Cheng and Gaohong Wang* . . . . . 69

**A Numerical Algorithm for Single Phase Fluid Flow in Elastic Porous Media**
*Hongsen Chen, Richard E. Ewing, Stephen L. Lyons, Guan Qin, Tong Sun, and David P. Yale* . . . . . 80

**On the Discretization of Interface Problems with Perfect and Imperfect Contact**
*Tatiana Chernogorova, Richard E. Ewing, Oleg Iliev, and Raytcho Lazarov* . . . . . 93

**Finite Element Analysis for Pseudo-Hyperbolic Integral-Differential Equations**
*Xia Cui* . . . . . 104

**A CFL-Free Explicit Scheme with Compression for Linear Hyperbolic Equations**
*Ronald A. DeVore, Hong Wang, Jiang-Guo Liu, and Hong Xu* . . . . 116

**Maximizing Cache Memory Usage for Multigrid Algorithms for Applications of Fluid Flow in Porous Media**
*Craig C. Douglas, Jonathan Hu, Mohamed Iskandarani, Markus Kowarschik, Ulrich Rüde, and Christian Weiss* . . . . . 124

**A Locally Conservative Eulerian-Lagrangian Method for Flow in a Porous Medium of a Mixture of Two Components Having Different Densities**
*Jim Douglas, Jr., Felipe Pereira, and Li-Ming Yeh* . . . . . 138

**Validation of Non-darcy Well Models Using Direct Numerical Simulation**
*Vladimir A. Garanzha, Vladimir N. Konshin, Stephen L. Lyons, Dimitrios V. Papavassiliou, and Guan Qin* . . . . . 156

**Mathematical Treatment of Diffusion Processes of Gases and Fluids in Porous Media**
*Norbert Herrmann* . . . . . 170

**Implementation of a Locally Conservative Eulerian-Lagrangian Method Applied to Nuclear Contaminant Transport**
*Chieh-Sen Huang and Anna M. Spagnuolo* . . . . . 179

**Application of a Class of Nonstationary Iterative Methods to Flow Problems**
*Xiuren Lei and Hong Peng* . . . . . 190

**Reservoir Thermal Recover Simulation on Parallel Computers**
*Baoyan Li and Yuanle Ma* . . . . . 195

**A Class of Lattice Boltzmann Models with the Energy Equation**
*Yuanxiang Li, Shengwu Xiong, and Xiufen Zou* . . . . . 208

**Block Implicit Computation of Flow Field in Solid Rocket Ramjets**
*Zhibo Ma and Jianshi Zhu* . . . . . 216

**Stable Conforming and Nonconforming Finite Element Methods for the Non-newtonian Flow**
*Pingbing Ming and Zhong-Ci Shi* . . . . . 222

**Numerical Simulation of Compositional Fluid Flow in Porous Media**
*Guan Qin, Hong Wang, Richard E. Ewing, and Magne S. Espedal* . . 232

**Parallelization of a Compositional Reservoir Simulator**
*Hilde Reme, Geir Åge Øye, Magne S. Espedal, and Gunnar E. Fladmark* . . . . . 244

**Relationships among Some Conservative Discretization Methods**
*Thomas F. Russell* . . . . . 267

**Parallel Methods for Solving Time-Dependent Problems Using the Fourier-Laplace Transformation**
*Dongwoo Sheen* . . . . . 283

**Cascadic Multigrid Methods for Parabolic Pressure Problems**
*Zhong-Ci Shi and Xuejun Xu* . . . . . 292

**Estimation in the Presence of Outliers: The Capillary Pressure Case**
*Sam Subbey and Jan-Erik Nordtvedt* . . . . . 299

**A Comparison of ELLAM with ENO/WENO Schemes for Linear Transport Equations**
*Hong Wang and Mohamed Al-Lawatia* . . . . . 311

**An Accurate Approximation to Compressible Flow in Porous Media with Wells**
*Hong Wang, Dong Liang, Richard E. Ewing, Stephen L. Lyons, and Guan Qin* . . . . . 324

**Fast Convergent Algorithms for Solving 2-D Integral Equations of the First Kind**
*Yan-Fei Wang and Ting-Yan Xiao* . . . . . 333

**A Two-Grid Finite Difference Method for Nonlinear Parabolic Equations**
*Ziting Wang and Xianggui Li* . . . . . 345

**A Compact Operator Method for the Omega Equation**
*Francisco R. Villatoro and Jesús García-Lafuente* . . . . . 351

**Domain Decomposition Algorithm for a New Characteristic Mixed Finite Element Method for Compressible Miscible Displacement**
*Danping Yang* . . . . . 362

**A Boundary Element Method for Viscous Flow on Multi-connected Domains**
*Dequan Yang, Tigui Fan, and Xinyu Yang* . . . . . 373

**A Characteristic Difference Method for 2D Nonlinear Convection-Diffusion Problems**
*Xi-Jun Yu and Yonghong Wu* . . . . . 378

**Fractional Step Methods for Compressible Multicomponent Flow in Porous Media**
*Yirang Yuan* . . . . . 390

**A Model and Its Solution Method for a Generalized Unsteady Seepage Flow Problem**
*Guoyou Zhang, Tigui Fan, Zhongsheng Zhao, and Dequan Yang* . . . . 404

**Domain Decomposition Preconditioners for Non-selfconjugate Second-Order Elliptic Problems**
*Huaiyu Zhang and Jiachang Sun* . . . . . 409

**Performance of MOL for Surface Motion Driven by a Laplacian of Curvature**
*Wen Zhang and Ian Gladwell* . . . . . 419

**A High-Order Upwind Method for Convection-Diffusion Equations with the Newmann Boundary Condition**
*Weidong Zhao* . . . . . 430

**Author Index** . . . . . 442

**Subject Index** . . . . . 444
