Contents

Preface vii

Some Notations and Conventions xi

1. Preliminaries and Variational Principles 1

   1.1 Sobolev Spaces 1
   1.2 Differentiable Functionals 7
   1.3 Ekeland's Variational Principle 10
   1.4 Minimax Principles 12
   1.5 Ricceri's Variational Results 18
   1.5.1 Three Critical Point Results 18
   1.5.2 A General Variational Principle 22

2. Quasilinear Fourth-Order Problems 25

   2.1 Introduction 25
   2.2 Multiple Solutions of Quasilinear Fourth-Order Problems 25
   2.3 Infinitely Many Solutions of Quasilinear Fourth-Order Problems 33
   2.4 Quasilinear Fourth-Order Problems with Singular Term . 44
   2.5 Semilinear Fourth-Order Problems on $\mathbb{R}^N$ 51

3. Kirchhoff Problems 57

   3.1 Introduction 57
   3.2 Radial Solutions of Kirchhoff Problems 58
   3.3 Multiple Solutions of Nonhomogeneous Problems 65
   3.4 Multiple Solutions with Superlinear Nonlinearities 74
   3.5 Multiple Solutions with Asymptotically Linear Nonlinearities 85

Li, Lin
Solutions of nonlinear differential equations
digitalisiert durch:
IDS Basel Bern

3.6 Infinitely Many Solutions with Sublinear Nonlinearities . . 99
3.7 Multiple Solutions with Combined Nonlinearities 112

4. Nonlinear Field Problems 121

4.1 Introduction 121
4.2 Schrödinger–Maxwell Equations 122
4.2.1 Infinitely Many Solutions with Superlinear Nonlinearities 122
4.2.2 Multiple Solutions with Asymptotically Linear Nonlinearities 130
4.2.3 Quasilinear Schrödinger–Maxwell Equations . . . 151
4.3 Klein–Gordon–Maxwell Systems 174
4.3.1 Infinitely Many Solutions 174
4.3.2 Sign-Changing Potential 190
4.3.3 Multiple Solutions without Odd Nonlinearities . . 199
4.3.4 Partially Sublinear Nonlinearities 209
4.3.5 Klein–Gordon Equation Coupled with Born–Infeld Theory 213

5. Gradient Systems 225

5.1 Introduction 225
5.2 One Dimension Systems 225
5.2.1 Two-Point Boundary Value Systems 225
5.2.2 Hamiltonian Systems 233
5.2.3 Quasilinear Hamiltonian Systems 247
5.3 N Dimension Systems 256
5.3.1 Resonance Elliptic Systems 256
5.3.2 Quasilinear Fourth-Order Elliptic Systems 263

6. Variable Exponent Problems 277

6.1 Introduction 277
6.2 $p(x)$-Laplacian Problems 277
6.3 $p(x)$-Laplacian-Like Problems 283
6.4 $p(x)$-Biharmonic Problems 291
6.5 Two Parameter $p(x)$-Biharmonic Problems 304

Bibliography 313
