PART 1: INTRODUCTION 1

**1 Komatiites – an historical review.** *R. P. Viljoen and M. J. Viljoen* 5

1.1 Introduction 5
1.2 The history of early geological investigations in the Barberton Mountain Land 6
1.3 The Upper Mantle Project in the Barberton Mountain Land 8
1.4 Other Archaean komatiites 14
1.5 Present developments in studies on komatiites 15
References 15

**2 What is a komatiite?** *N. T. Arndt and E. G. Nisbet* 19

2.1 Original usage 19
2.2 Development of terminology 19
2.3 Diagnostic features 21
2.4 The current situation 21
2.5 A proposal 23
2.6 Conclusions 25
Acknowledgements 25
References 26

**3 Phanerozoic analogues of komatiitic basalts.** *W. E. Cameron and E. G. Nisbet* 29

3.1 Introduction 29
3.2 Komatiitic basalts: a petrographic and chemical description 30
3.3 Phanerozoic analogues 33
3.4 Mineral and whole rock compositions 43
3.5 Discussion 46
Acknowledgements 48
References 48

PART 2: REGIONAL SURVEYS 51

**4 The nature and distribution of Archaean komatiite volcanics in South Africa.** *M. J. Viljoen, R. P. Viljoen and T. N. Pearton* 53

4.1 Introduction 53
4.2 Regional distribution of greenstone belts and komatiites 54
4.3 Geochemistry 64
4.4 Conclusions 77
Acknowledgements 78
References 78

**5 The Ventersdorp Supergroup – the youngest komatiitic sequence in South Africa.** *J. R. McIver, R. G. Cawthorn and B. A. Wyatt* 81

5.1 Introduction 81
5.2 The Ventersdorp Supergroup 82
5.3 The komatiitic affinity of the Meredale lavas 85
5.4 Compositional patterns in basalts 87
5.5 Comment 89
Acknowledgements 89
References 90

**6 Possible komatiitic affinity of the Bushveld Complex, South Africa.** *R. G. Cawthorn and G. Davies* 91

6.1 Introduction 91
6.2 Parental magmas to Proterozoic layered complexes 91
6.3 Conclusions 95
Acknowledgements 95
References 96

**7 Komatiites in Zimbabwe.** *E. G. Nisbet, M. J. Bickle, A. Martin, J. L. Orpen and J. F. Wilson* 97

7.1 Introduction 97
7.2 Regional setting: the Rhodesian Archaean Craton 97
7.3 The 3.5 Ga terrain ('Sebakwian') 98
7.4 Komatiites in the Lower Greenstone sequences ('Lower Bulawayan') 99
7.5 Komatiites in the Upper Greenstones 100
7.6 Geochemistry 100
Acknowledgements 103
References 103

**8 Komatiites in the Pilbara Block, Western Australia.** *M. E. Barley and M. J. Bickle* 105

8.1 Introduction 105
8.2 Regional setting 105
8.3 Metamorphism 107
8.4 Field associations, characteristics, textures and mineralogy 108
8.5 Geochemistry 111
References 114

**9 Komatiites in the Yilgarn Block, Western Australia.** *R. A. Binns, J. A. Hallberg and J. H. Taplin* 117

9.1 Introduction 117
9.2 Regional setting 117
9.3 Age 119
9.4 Metamorphism 120
9.5 Field characteristics and associates 120
9.6 Textures and mineralogy 122
9.7 Geochemistry 123
Acknowledgements 129
References 129

**10 Komatiites and the komatiitic series of the Finnish greenstone belts.** *B. Auvray, S. Blais, B.-M. Jahn and D. Piquet* 131

10.1 Introduction 131
10.2 Geological setting 131
10.3 Ages 133
10.4 Metamorphism 134
10.5 Komatiites and associated rocks 135
10.6 Mode of emplacement of komatiites 135
10.7 Mineral composition and textures in the komatiitic series rocks 137
10.8 Chemical composition of the komatiitic series rocks 137
10.9 Trace element geochemistry 141
10.10 Criteria for distinction between the komatiitic and tholeiitic series in Finland 144
References 145

**11 Komatiites in the Ontario portion of the Abitibi belt.** *L. S. Jensen and D. R. Pyke* 147

11.1 Regional setting 147
11.2 Ages 148
11.3 Nomenclature 149
11.4 Munro–Lake Abitibi area 149
11.5 Timmins–Matachewan area 151
11.6 Kirkland Lake area 152
11.7 Chemical composition 154
11.8 Discussion 156
References 156

**12 Komatiitic basalts of the Cape Smith foldbelt, New Quebec, Canada.** *A. Hynes and D. Francis* 159

12.1 Introduction 159
12.2 Regional setting and age 159
12.3 Stratigraphy and structure 160
12.4 Metamorphism 161
12.5 Stratigraphy of the Chukotat Group 162
12.6 Morphology and petrography of volcanic rocks 163
12.7 Intrusions 164
12.8 Geochemistry 165
12.9 Discussion 168
12.10 Summary and conclusions 169
References 169

**13 Magnesian basalts from the Archaean terrains of Minnesota.** *K. J. Schulz* 171

13.1 Introduction 171
13.2 Magnesian basalts of the Vermilion district 171
13.3 Minnesota River Valley amphibolites 184
13.4 Petrogenesis 185
13.5 Conclusion 185
References 186

**14 Ordovician komatiites and associated boninite-type magnesian lavas from Betts Cove, Newfoundland.** *H. D. Upadhyay* 187

14.1 Introduction 187
14.2 Regional setting 188
14.3 Age 190
14.4 Deformation and metamorphism 190
14.5 Manner of emplacement 190
14.6 Mineralogy and textures 191
14.7 Geochemistry 194
14.8 Discussion 196
Acknowledgements 197
References 197

**15 Komatiites from Gorgona Island, Colombia.** *L. M. Echeverría* 199

15.1 Regional setting 199
15.2 Age 201
15.3 Metamorphism 202
15.4 Field characteristics 202
15.5 Textures and mineralogy 203
15.6 Geochemistry 205
References 209

PART 3: TEXTURES AND FIELD CHARACTERISTICS 211

**16 Spinifex-textured komatiites: a review of textures, mineral compositions and layering.** *C. H. Donaldson* 213

16.1 Introduction 213
16.2 Terminology 215
16.3 Textures and crystal shapes in komatiites 218
16.4 Mineral compositions in spinifex-textured komatiites 229
16.5 Solidification of komatiite magmas 234
16.6 Conclusion 241
Acknowledgements 242
References 242

## PART 4: ALTERATION AND METAMORPHISM

**17 Progressive metamorphism of komatiites and related Archaean lavas of the Abitibi area, Canada.** *W. T. Jolly* 245

17.1 Introduction 247
17.2 Prehnite–pumpellyite facies 251
17.3 Greenschist facies 258
17.4 Lower amphibolite facies 261
17.5 Upper amphibolite facies 264
17.6 Conclusions 264
Acknowledgements 265
References 265

**18 The oxygen isotope geochemistry of komatiites: evidence for water–rock interaction.** *D. W. Beaty and H. P. Taylor Jr* 267

18.1 Introduction 267
18.2 Sampling and experimental technique 268
18.3 Metamorphic petrology 269
18.4 Oxygen isotope data 272
18.5 Conclusions 278
Acknowledgements 279
References 279

## PART 5: GEOCHEMISTRY AND THE COMPOSITION OF THE MANTLE IN THE ARCHAEAN 281

**19 Some geochemical aspects of alteration and genetic relations in komatiitic suites.** *A. E. Beswick* 283

19.1 Introduction 283
19.2 General geochemical characteristics 284
19.3 Alteration 290
19.4 Genetic aspects of komatiite geochemistry 300
19.5 Summary 305
Acknowledgements 306
References 307

**20 Geochemistry of Munro Township basalts.** *N. T. Arndt and R. W. Nesbitt* 309

20.1 Introduction 309
20.2 Komatiitic and tholeiitic basalts in Munro Township 311
20.3 Trace element geochemistry 320
20.4 Formation of the Munro basaltic lavas 326
20.5 The relationship between basalts and komatiites 327
20.6 A possible explanation for acicular pyroxene textures 328
20.7 Conclusions 328
Acknowledgements 329
References 329

**21 Trace element characteristics of komatiites and komatiitic basalts from the Abitibi metavolcanic belt of Quebec.** *J. N. Ludden and L. Gélinas* 331

21.1 Introduction 331
21.2 Alteration 332
21.3 Geochemical approach 333
21.4 Summary 344
Acknowledgements 344
References 345

**22 Geochemistry and petrogenesis of komatiites from the Barberton greenstone belt, South Africa.** *H. S. Smith and A. J. Erlank* 347

22.1 Introduction 348
22.2 General characteristics and mineralogy of the komatiites 348
22.3 Geochemical features of the Barberton komatiites 351
22.4 Compositional variations of komatiites and implications for a heterogeneous mantle 375
22.5 Petrogenesis of Barberton ultramafic magmas 384
22.6 Conclusions 392
Acknowledgements 393
References 393

**23 Nd and Sr isotopic studies of komatiites and related rocks.** *A. Zindler* 399

23.1 Introduction 399
23.2 Cape Smith–Wakeham Bay belt, New Quebec 401
23.3 Abitibi belt, Superior Province 405
23.4 Results from other studies 407
23.5 Comparison of Sm–Nd and Rb–Sr 409
23.6 Bulk earth evolution of $^{143}$Nd:$^{144}$Nd and $^{87}$Sr:$^{86}$Sr 409
23.7 Evolutionary implications of initial $^{143}$Nd:$^{144}$Nd and $^{87}$Sr:$^{86}$Sr from komatiites and related rocks 411
23.8 Constraints on petrogenetic processes 415
23.9 Summary and conclusions 416
Acknowledgements 417
References 417

PART 6: ECONOMIC GEOLOGY 421

**24 Physical and chemical constraints on genetic models for komatiite-related Ni-sulphide deposits.** *A. J. Naldrett and I. H. Campbell* 423

24.1 Occurrence and types 423
24.2 Main features of flow-related deposits 423
24.3 Models of ore emplacement 425
24.4 Discussion and conclusions 432
References 434

**25 Palladium and iridium in komatiites and associated rocks: application to petrogenetic problems.** *R. R. Keays* 435

25.1 Introduction 435
25.2 Data base 436
25.3 Magmatic sulphides 442
25.4 Spinifex-textured komatiites 445
25.5 Dunitic komatiites 447
25.6 Thin komatiite flows 448
25.7 Associated rocks 449
25.8 Interpretation 449
25.9 Summary and conclusions 454
Acknowledgements 455
References 455

**26 Gold and antimony mineralization in altered komatiites of the Murchison greenstone belt, South Africa.** *T. N. Pearton* 459

26.1 Introduction 459
26.2 Regional geology of the Murchison greenstone belt 460
26.3 Geological description of the Antimony Line and vicinity 462
26.4 The geochemistry of the Antimony Line rocks 464
26.5 Mineralization in the Antimony Line 471
26.6 Mineralization in altered Archaean komatiites 472
26.7 Conclusions 473
Acknowledgements 474
References 473

PART 7: PETROGENESIS 477

**27 The magnesium contents of komatiitic liquids.** *M. J. Bickle* 479

27.1 Introduction 479
27.2 Textures 480
27.3 Liquid compositions inferred from mineral compositions 484
27.4 Fractionation or accumulation trends – constraints on phenocryst composition 490
27.5 Conclusions 492
Acknowledgements 492
References 493

**28 Genesis of Archaean komatiites in a wet ultramafic subducted plate.** *C. J. Allègre* 495

28.1 Introduction: the heat problem for komatiite genesis in the Archaean 495
28.2 The 'wet mantle' hypothesis 497
28.3 The 'petrogenetic cycle' in the Archaean and the Archaean subduction zone 498
28.4 Conclusion 499
Acknowledgements 499
References 500

**29 The tectonic setting and petrogenesis of komatiites.** *E. G. Nisbet* 501

29.1 Introduction 501
29.2 Geological problems 501
29.3 Analogous modern rocks 506
29.4 Some physical constraints on komatiitic eruption 506
29.5 Model building: the genesis of komatiites 513
29.6 The nature of the crust and the upper mantle: further thoughts 516
29.7 Conclusions 517
Acknowledgements 518
References 518
