Contents

List of figures vii
List of tables viii
List of contributors ix

1 Work process knowledge in technological and organizational development
NICHOLAS BOREHAM 1

2 Work process knowledge in a chemical company
MICHELE MARIANI 15

3 The concept of the core task and the analysis of working practices
LEENA NORROS AND MAARIA NUUTINEN 25

4 The work process knowledge of chemical laboratory assistants
MARTIN FISCHER AND PETER RÖBEN 40

5 Technological change and the construction of competence
PIERRE RABARDEL AND STELLA DUVECNI-LANGA 55

6 Work process knowledge and creativity in industrial design
LAUGE BAUNGAARD RASMUSSEN 74

7 Creating work process knowledge with new technology in a financial services workplace
NORMA LAMMONT AND NICHOLAS BOREHAM 94

8 Dimensions of work process knowledge
MARIA TERESA OLIVEIRA, ANA LUISA OLIVEIRA PIRES AND MARIANA GAIO ALVES 106
Contents

9 Work experience as an element of work process knowledge 119
   MARTIN FISCHER

10 Training for collective competence in rare and
    unpredictable situations 134
   JANINE ROGALSKI, MARIELLE PLAT AND PATRICIA
   ANTOLIN-GLENN

11 The contribution of work process knowledge to
    competence in electrical maintenance 148
   RENAN SAMURÇAY AND CHRISTINE VIDAL-GOMEL

12 The implications of work process knowledge for vocational
    education and training 160
   MARTIN FISCHER AND FELIX RAUNER

13 Professionalization and work process knowledge in the UK’s
    National Health Service 171
   NICHOLAS BOREHAM

14 A delayed transformation? Changes in the division of labour
    and their implications for learning opportunities 183
   RIK HUYS AND GEERT VAN HOOTEGEM

15 Work process knowledge and industrial and labour relations 201
   KARSTEN KRÜGER, WILFRIED KRUSE AND MARIA CAPRILE

Index 239
Figures

3.1 The core task analysis model
4.1 Organization of the chemical laboratory
4.2 Schematic representation of the stages in the measuring process
4.3 Division of labour between chemist and laboratory assistant
4.4 The principle of thin-layer chromatography
4.5 A real thin-layer chromatograph from the laboratory
4.6 The four aspects of the work process according to Aristotle
4.7 Work process knowledge as mediation between experience and technical or specialized knowledge
4.8 Elements of an activity system according to Engeström (1987)
5.1 'People at Work'
9.1 Experience as an element of work process knowledge
10.1 Training for piloting highly automated cockpits
10.2 Training for operational management
11.1 Electrical repair problem
12.1 Objects of work process knowledge within skilled maintenance and production work
12.2 Qualification hierarchy in European authorized dealerships
12.3 Characteristic work tasks and curriculum structure of the core profession 'Car Mechatronics'
14.1 Seven criteria to improve learning opportunities and reduce stress risks
14.2 The structure of execution: three types
14.3 The redesign of the division of labour in order to improve learning opportunities
Tables

3.1 Six types of formal mechanisms for participation 23
14.1 Traditional versus new production concept: a typology 192
14.2 Number of observations of the sector surveys 194
14.3 Summary evaluation of the dominant production concept in four industrial sectors 195
