Figures

2.1 A representation of the aspects of a stereotype from the constraint relations perspective. \hspace{1cm} \textit{page 19}

2.2 A schematic of one person’s stereotypic knowledge about two social categories and their association with laziness, highlighted here as a possible causal factor. \hspace{1cm} 32

3.1 Evaluation of the answerers (left panel) and of the questioners (right panel) as a function of the entitativity of the group of answerers and the group of questioners. \hspace{1cm} 43

3.2 Phi coefficient (left panel) and group differentiation (right panel) as a function of the basis of categorization. \hspace{1cm} 55

3.3 Number of thoughts generated about the groups (left panel) and differentiation between the groups (right panel) as a function of the theory underlying the categorization and the dimension. \hspace{1cm} 62

4.1 Friendliness stereotyping scores across theory-type and label-type. \hspace{1cm} 82

5.1 Illusory correlation as a function of expectation. \hspace{1cm} 98

5.2 Illusory correlation as a function of data-based coherence. \hspace{1cm} 100

5.3 Reinterpretations as a function of scope for reinterpretation and evaluative behavioural dimension. \hspace{1cm} 105

5.4 Factors affecting illusory correlation. \hspace{1cm} 108

6.1 Estimated support for the propositions as a function of vote outcome and level of threat. \hspace{1cm} 121

8.1 Variation in intergroup behaviour as a function of the stereotypes held by an outgroup. \hspace{1cm} 176

8.2 Favourableness and consensus of Nation X stereotypes as a function of the stereotypes (positive, negative; powerful, powerless) held by Australians or people from Nation X. \hspace{1cm} 182
