<i>List of Figures</i>	XI
<i>List of Tables</i>	XIII
<i>List of Abbreviations</i>	XV
<i>List of Symbols</i>	XVII
1 Introduction	1
1.1 Three introductory notes	2
1.1.1 On corporatism and collective bargaining	2
1.1.2 On the constancy of relative shares	9
1.1.3 On the identification of empirical labor market models	11
1.2 Overview	17
2 Stylized Facts of Labor Market Time Series	21
2.1 Stochastic processes: Concepts and tests	22
2.1.1 Stationary processes	22
2.1.2 Integrated processes	24
2.1.3 The autocorrelation function	27
2.1.4 Trend- versus difference-stationary processes	30
2.1.5 Unit root tests	31
2.2 Properties of labor market time series	34
2.2.1 The real wage series	36
2.2.2 The labor productivity series	39
2.2.3 The employment series	41
2.2.4 The series of labor's share	45
2.2.5 Testing for breaking trends in the series	53
2.3 Concluding remarks	57
3 The Macroeconomic Model	65
3.1 The structure of the model	66
3.2 The competitive economy	69
3.2.1 The steady-state equilibrium	71
3.2.2 The out-of-steady-state equilibrium	72
3.3 The corporatist economy	75
3.3.1 The objective functions of the bargaining parties	75

3.3.2	Efficient bargains	78
3.3.3	An approximation to the labor market equilibrium	81
3.4	Comparison	85
4	The Econometric Analysis	87
4.1	Integration, cointegration, and common trends	89
4.1.1	Stationary and integrated vector processes	90
4.1.2	Cointegration and the Granger representation theorem	92
4.1.3	Stochastic and deterministic cointegration	94
4.1.4	The common trends representation	96
4.2	An empirical model of the labor market	98
4.2.1	Common trends in a corporatist labor market	99
4.2.2	Common trends in a competitive labor market	103
4.2.3	A vector error correction model of the labor market	107
4.3	A cointegration analysis of the full model	112
4.3.1	Lag order selection	113
4.3.2	Testing for the cointegrating rank	116
4.3.3	Hypothesis testing in the model $H^*(1)$	123
4.3.4	Hypothesis testing in the model $H^*(2)$	125
4.3.5	Model estimation	129
4.4	A cointegration analysis of partial models	136
4.4.1	Exogeneity concepts	137
4.4.2	The conditional vector error correction model	140
4.4.3	The structural interpretation of partial models	141
4.4.4	Statistical inference in partial models	145
4.4.5	A test for weak exogeneity	149
4.4.6	Empirical results	151
5	Conclusion	157
A	Data	163
B	Proofs	183
B.1	Omitted parts of Section 3.2	183
B.2	Proofs of Lemma 3.1 and Lemma 3.2	187
	References	189

List of Figures

2.1	Breaking trend model (Australia, Austria, Belgium)	59
2.2	Breaking trend model (Canada, Denmark, Finland)	60
2.3	Breaking trend model (France, Germany, Greece)	61
2.4	Breaking trend model (Italy, Japan, Netherlands)	62
2.5	Breaking trend model (Norway, Spain, Sweden)	63
2.6	Breaking trend model (Switzerland, UK, USA)	64
A.1	Australia: series and autocorrelation functions	164
A.2	Austria: series and autocorrelation functions	165
A.3	Belgium: series and autocorrelation functions	166
A.4	Canada: series and autocorrelation functions	167
A.5	Denmark: series and autocorrelation functions	168
A.6	Finland: series and autocorrelation functions	169
A.7	France: series and autocorrelation functions	170
A.8	Germany: series and autocorrelation functions	171
A.9	Greece: series and autocorrelation functions	172
A.10	Italy: series and autocorrelation functions	173
A.11	Japan: series and autocorrelation functions	174
A.12	Netherlands: series and autocorrelation functions	175
A.13	Norway: series and autocorrelation functions	176
A.14	Spain: series and autocorrelation functions	177
A.15	Sweden: series and autocorrelation functions	178
A.16	Switzerland: series and autocorrelation functions	179
A.17	United Kingdom: series and autocorrelation functions	180
A.18	United States: series and autocorrelation functions	181

List of Tables

2.1	The data employed	36
2.2	Unit root tests of the real wage series	37
2.3	Unit root tests of the labor productivity series	40
2.4	Unit root tests of the employment series (level)	42
2.5	Unit root tests of the employment series (difference)	43
2.6	Unit root tests of the series of labor's share	46
2.7	ARIMA estimates of real wage	49
2.8	ARIMA estimates of labor productivity	50
2.9	ARIMA estimates of employment	51
2.10	ARIMA estimates of labor's share	52
2.11	Estimated dates of the breakpoint	57
4.1	Variable declaration	99
4.2	Statistical hypotheses in the vector error correction model	111
4.3	Series and lag order selection in $y_t = [w_t \ a_t \ l_t]'$	115
4.4	Cointegration tests with restricted trend	121
4.5	Cointegration tests with restricted trend	122
4.6	Hypothesis tests under $H^*(1)$	124
4.7	Hypothesis tests under $H^*(2)$	127
4.8	Cointegrating vectors under $H^*(1)$	130
4.9	Cointegrating vectors under $H^*(1)$ and $H_A(1)$	131
4.10	Cointegrating vectors under $H^*(1)$, $H_A(1)$, and $H_S(1)$	132
4.11	Cointegrating vectors of restricted models under $H^*(2)$	133
4.12	Cointegrating vectors of restricted models under $H^*(2)$	134
4.13	Weak exogeneity tests in the full model	152
4.14	Single-equation cointegrating tests	153
4.15	Estimation of single-equation models	155
5.1	Summary of the results	158
5.2	Corporatism rankings	159
