

CONTENTS

List of Authors	ix
Introduction	1
PART I CONCEPTION	11
1 Epistemological Foundations	13
Section 1 What is Knowledge?	14
Section 2 Generating New Knowledge	19
Section 3 Validity Criteria	23
Section 4 A Plurality of Paradigms	27
Conclusion	29
2 Constructing the Research Problem	31
Section 1 What is a Research Problem?	33
Section 2 Constructing the Research Problem	41
Conclusion	49
3 Exploring and Testing	51
Section 1 Theoretical Background	52
Section 2 Exploration	59
Section 3 Testing	62
Conclusion	66
4 What Approach with Which Data?	68
Section 1 Choosing Data	69
Section 2 Choosing an Approach: Qualitative or Quantitative?	76
Conclusion	83

5	Researching Content and Researching Process	85
	Section 1 Content-Based Research	87
	Section 2 Process-Based Research	94
	Section 3 Positioning Research	102
	Conclusion	106
PART II IMPLEMENTATION		109
6	Research Design	111
	Section 1 Epistemology and Research Design	112
	Section 2 Planning the Research	117
	Section 3 Evolution of a Design	124
	Conclusion	130
7	Linking Concepts and Data	132
	Section 1 The Translation Process	133
	Section 2 Designing the Translation Process	140
	Conclusion	145
8	Sampling	147
	Section 1 Selecting Sample Elements	148
	Section 2 Determining Sample Size	157
	Section 3 The Sample Selection Process	166
	Conclusion	170
9	Data Collection and Managing the Data Source	172
	Section 1 Collecting Primary Data for Quantitative Research	173
	Section 2 Collecting Primary Data for Qualitative Research	180
	Section 3 Collecting Secondary Data	191
	Section 4 Data-Source Confidentiality	193
	Conclusion	195
10	Validity and Reliability	196
	Section 1 Construct Validity	197
	Section 2 Reliability and Validity of the Measuring Instrument	200
	Section 3 Internal Validity	207
	Section 4 Reliability	210
	Section 5 External Validity	213
	Conclusion	218
PART III ANALYSIS		221
11	Comparison Tests	223
	Section 1 Statistical Tests	224
	Section 2 Parametric Tests	233

Section 3	Practicing Non-Parametric Tests	254
	Conclusion	265
12	Causal Analysis and Modeling	267
Section 1	Specifying the Phenomenon or System to be Modeled	268
Section 2	Specifying Variables and Concepts	274
Section 3	Identifying Relationships Among a Model's Variables and Concepts	278
Section 4	Evaluating and Testing the Model	283
	Conclusion	291
13	Classifying and Structuring	293
Section 1	Methods	293
Section 2	Application	299
	Conclusion	309
14	Analyzing Social Networks	312
Section 1	General Presentation and Data Collection	312
Section 2	Analysis Methods	320
	Conclusion	330
15	Longitudinal Analyses	332
Section 1	Fundamentals of Longitudinal Analyses	332
Section 2	Quantitative Longitudinal Analyses	339
Section 3	Qualitative Longitudinal Analysis	346
	Conclusion	350
16	Analyzing Representations and Discourse	351
Section 1	Methods of Discourse and Representation Analysis	353
Section 2	Content Analysis	358
Section 3	Cognitive Mapping	361
	Conclusion	370
PART IV	PUBLICATION AND COMMUNICATION	373
17	Writing Up the Research	375
Section 1	Communication Media	376
Section 2	Research Articles	379
Section 3	The Writing Process	384
	Conclusion	387
18	The Research Environment	389
Section 1	The Thesis Advisor	390
Section 2	Research Consortiums	392

viii *Doing Management Research*

Section 3 Academic Conferences 393

Section 4 The Researcher's Relationship
with the Non-Academic World 398

Bibliography 401

Index 415
