<i>Foreword</i>	xix
<i>Preface</i>	xxi
1. Continuous improvement	1
<i>Rick Best, Craig Langston and Gerard de Valence</i>	
1.1 Introduction	1
1.2 Competencies and areas of expertise	2
1.3 Key concerns	3
1.4 Conclusion	7
References and bibliography	7
PART 1	
2. Defining facilities	11
<i>Stuart Smith</i>	
Editorial comment	11
2.1 Introduction	12
2.2 Context	12
2.3 The workplace is dead, long live the workplace	13
2.4 The sustainable workplace	14
2.5 Defining facilities – an organizational view	14
2.6 Defining facilities – a vehicle of change	17
2.7 Defining the facility – a product view	18
2.8 Defining facilities – a stakeholder view	21
2.9 Defining facilities – evaluating the risk	23
2.10 Defining facilities – a technological view	25
2.11 Conclusion	26
References and bibliography	27
3. Facility management as an emerging discipline	30
<i>Ilfryn Price</i>	
Editorial comment	30
3.1 Why a history?	31
3.2 Research methods	32
3.3 The 1970s: first signs	33
3.4 The 1980s: a decade of dispersal	34
3.5 Interlude: professional bodies	40
3.6 Conclusion	46
Endnotes	46
References and bibliography	47

4. The development of facility management	49
<i>Ilfryn Price</i>	49
Editorial comment	50
4.1 Introduction	50
4.2 The UK FM market	51
4.3 Academic and professional developments	52
4.4 Developing practice	53
4.5 Defining FM	53
4.6 Developing knowledge	58
4.7 Development paths for FM	61
4.8 Back to the future	62
4.9 Conclusion	63
Endnotes	65
References and bibliography	
 PART 2	
5. Strategic management	69
<i>Danny Shiem-Shin Then</i>	69
Editorial comment	70
5.1 Introduction	71
5.2 The context of real estate and facility management (RE/FM)	75
5.3 Key organizational variables	76
5.4 An integrated resource management framework	77
5.5 The crucial link between work and the workplace	78
5.6 Conclusion	80
References and bibliography	
 6. Space management	81
<i>Alison Muir</i>	81
Editorial comment	82
6.1 Introduction	82
6.2 Information gathering	94
6.3 Analysis and synthesis of 'design'	95
6.4 Space indicators	98
6.5 Space management	98
6.6 Conclusion	98
Glossary of terms	101
References and bibliography	102
Appendix. Systems furniture assessment	
 7. Information management	104
<i>Stuart Smith</i>	104
Editorial comment	105
7.1 Introduction	106
7.2 What is FM technology?	107
7.3 Technology development	109
7.4 Efficiency and effectiveness – end result or starting point?	112
7.5 Technology, people and strategy	115
7.6 Building systems focus	120
7.7 The IT infrastructure for FM technology	123
7.8 Case study examples	

7.9	Futures	123
7.10	Conclusion	125
	References and bibliography	125
8.	Risk management	128
	<i>Deepak Bajaj</i>	
	Editorial comment	128
8.1	Introduction	129
8.2	Broad principles of risk management and risk identification	131
8.3	Risk response	140
8.4	Contingency planning	142
8.5	Developing and documenting a risk management plan	143
8.6	Conclusion	143
	References and bibliography	144
9.	Human resource management	146
	<i>Suzanne Wilkinson and David Leifer</i>	
	Editorial comment	146
9.1	Introduction	147
9.2	What is human resource management?	147
9.3	Management theories and human resource management strategies	148
9.4	Human resource management functions	151
9.5	Conclusion	159
	References and bibliography	160
	Appendix	161
10.	Financial management	164
	<i>Craig Langston</i>	
	Editorial comment	164
10.1	Introduction	165
10.2	Strategic planning	165
10.3	Market analysis	166
10.4	Feasibility studies	167
10.5	Budgeting	171
10.6	Cost planning	173
10.7	Cost control	174
10.8	Feedback and performance assessment	174
10.9	Conclusion	175
	References and bibliography	175
11.	Operations and maintenance management	177
	<i>Mohammad A. Hassanain, Thomas M. Froese and Dana J. Vanier</i>	
	Editorial comment	177
11.1	Introduction	178
11.2	Maintenance information management	179
11.3	Maintenance management operations process model	182
11.4	Conclusion	200
	References and bibliography	200
	Appendix	202
12.	Portfolio management	206
	<i>Geert Dewulf, Lydia Depuy and Virginia Gibson</i>	
	Editorial comment	206
12.1	Introduction	207

12.2	The dynamic context of the portfolio	208
12.3	Prepare for future changes	211
12.4	Conclusion	218
	References and bibliography	219
13.	Project management	220
	<i>Kaye Remington</i>	220
	Editorial comment	221
13.1	Introduction	221
13.2	The human factor	222
13.3	Stakeholder 'mind mapping'	223
13.4	Responding to stakeholders' needs	224
13.5	Project objectives and project success	225
13.6	The project plan	236
13.7	Project organization	236
13.8	Project risk	237
13.9	Implementing and controlling	237
13.10	Managing non-contractual relationships	238
13.11	Project reporting	238
13.12	Project closure	238
13.13	Post project review	239
13.14	Conclusion	239
	References and bibliography	241
14.	Asset management	
	<i>Bernie Devine</i>	241
	Editorial comment	242
14.1	Introduction	242
14.2	Asset management	243
14.3	Asset registers and configuration management	245
14.4	Current business need for infrastructure	247
14.5	IT	249
14.6	Industry transformation – corporate real estate (CRE) portal technology	253
14.7	Conclusion	254
	Endnotes	254
	References and bibliography	255
15.	Conflict avoidance and resolution in the construction industry	
	<i>Linda M. Thomas-Mobley</i>	255
	Editorial comment	256
15.1	Introduction	257
15.2	The genesis of conflict	265
15.3	Global distinctions	265
15.4	Conclusion	266
	References and bibliography	268
16.	Quality management	
	<i>Gerard de Valence</i>	268
	Editorial comment	269
16.1	Introduction	270
16.2	What is quality?	271
16.3	TQM	272
16.4	Best practice	

16.5	Benchmarking	272
16.6	Building quality assessment (BQA)	274
16.7	POE	275
16.8	Conclusion	276
	References and bibliography	277

PART 3

17.	Democracy in design?	281
	<i>Geert Dewulf and Juriaan van Meel</i>	
	Editorial comment	281
17.1	Introduction	282
17.2	Approaches to user involvement	283
17.3	A situational awareness	288
17.4	Lessons/'notions' for further research	289
	Endnote	290
	References and bibliography	290
18.	Leading change through effective communication	292
	<i>Tom Kennie</i>	
	Editorial comment	292
18.1	Introduction	293
18.2	Diagnosis phase	293
18.3	Implementation phase	299
18.4	Reflection and learning	306
18.5	Key leadership and communication lessons for change projects	307
18.6	Conclusion	307
	References and bibliography	307
19.	Productivity improvement	309
	<i>Adrian Leaman</i>	
	Editorial comment	309
19.1	Introduction	310
19.2	Methods	311
19.3	Findings	313
19.4	A broader perspective	316
	References and bibliography	318
20.	Integrated building models	320
	<i>Robin Drogemuller</i>	
	Editorial comment	320
20.1	Introduction	321
20.2	What is an integrated building model?	321
20.3	Why integrated building models?	321
20.4	Interoperability	323
20.5	Integrated building models and aspect models	324
20.6	Modelling concepts and languages	326
20.7	Industry foundation classes	326
20.8	Archiving	328
20.9	Computer-aided facility management (CAFM)	328
20.10	Information flow through the project lifecycle	329
20.11	Conclusion	336
	References and bibliography	336

21. Sustainability and environmental assessment	337
<i>Craig Langston and Grace Ding</i>	
Editorial comment	337
21.1 Introduction	338
21.2 Building environmental assessment methods	339
21.3 The role of building environmental assessment methods in FM	341
21.4 A critique of the building environmental assessment methods	342
21.5 A way forward	346
21.6 Conclusion	349
References and bibliography	350
22. Resource efficiency	352
<i>Kirsty Máté</i>	
Editorial comment	352
22.1 Introduction	353
22.2 Waste minimization	353
22.3 Relocation and refurbishment	354
22.4 Occupation	361
22.5 Energy	368
22.6 Relocation and refurbishment	368
22.7 Occupant concerns	372
22.8 Conclusion	375
References and bibliography	376
23. Outsourcing	378
<i>Constantine J. Katsanis</i>	
Editorial comment	378
23.1 Introduction	379
23.2 The practice of outsourcing	380
23.3 Outsourcing: the dynamics of innovation adoption	381
23.4 The structure of the FM industry and outsourcing	386
23.5 Innovation in the FM industry: network organizations	387
23.6 Future organizational structures and outsourcing in the FM arena	388
23.7 Advantages and disadvantages of outsourcing	391
23.8 Conclusion	392
Endnotes	392
References and bibliography	393
24. The future of facilities management	395
<i>Gerard de Valence, Craig Langston and Rick Best</i>	
24.1 The dilemma	395
24.2 The debate over the future of FM	397
24.3 Industry growth	399
24.4 The answer to the dilemma in parts	401
24.5 Conclusion	402
References and bibliography	403
<i>Index</i>	405
