<b>CONTRIBUTING AUTHORS</b>	ix
<b>PREFACE</b>	xi
<b>1 INHERENT IMPERFECTION OF ECONOMIC ORGANIZATIONS</b>	
<i>Robert P. Gilles and Pieter H.M. Ruys</i>	<b>1</b>
1 Introduction	1
2 Characterization of Economic Goods	3
3 Characterization of Economic Allocation Organizations	7
4 Interaction Between Resources and Valuations	11
<b>2 THE KINKED DEMAND CURVE, FACILITATING PRACTICES, AND OLIGOPOLISTIC COORDINATION</b>	
<i>Ehud Kalai and Mark A. Satterthwaite</i>	<b>15</b>
1 Introduction	15
2 Model	19
3 Inadequacy of the Nash Equilibrium Concept	23
4 Sequentially Dominant Strategies	24
5 Two Applications	28
6 Concluding Remarks	33

<b>3</b>	<b>A REVELATION PRINCIPLE FOR (BOUNDEDLY) BAYESIAN RATIONALIZABLE STRATEGIES</b>	
	<i>Peter J. Hammond</i>	<b>39</b>
1	Background	39
2	Commonly Modelled Game Forms	43
3	Bayesian Rationalizable Game Forms	45
4	Implementation	46
5	A Generalized Revelation Principle	49
6	Concentrating upon Intrinsic Types	52
7	Dominant Strategy Incentive Constraints	54
8	Bounded Modelling	55
9	Desirable Extensions	59
10	Conclusion	60
<b>4</b>	<b>WIDESPREAD EXTERNALITIES AND PERFECTLY COMPETITIVE MARKETS: EXAMPLES</b>	
	<i>Mamoru Kaneko and Myrna Wooders</i>	<b>71</b>
1	Introduction	71
2	An Automobile Market with Pollution; A Pure Public Bad Externality	74
3	The Tragedy of the Commons; Over-Exploitation Caused by Externality and Market Feedback	78
4	An Economy with Conformists and Non-Conformists; a Pure Psychological Externality	80
5	A Housing Market with Neighborhood Effects; Psychological Externalities Create Economic Value	82
6	Conclusion	85
<b>5</b>	<b>MODELLING OF ECONOMIES WITH RELATIONAL CONSTRAINTS ON COALITION FORMATION</b>	
	<i>Robert P. Gilles, Hans Haller and Pieter H.M. Ruys</i>	<b>89</b>
1	Introduction	90
2	Coalitionally Structured Economies	94

3	Relationally Structured Economies	114
4	Coalition Formation in Network Economies	128
<b>6</b>	<b>TOPOLOGIES AS TRADE INFRASTRUCTURES</b>	
	<i>Hans Haller</i>	<b>137</b>
1	Introduction	137
2	Links between Traders	139
3	Cost of Contacting and Maximal Trading Groups	141
4	Number and Size of Maximal Trading Groups	143
5	Typologies	144
6	Pre-Infrastructure and Graph Topology	146
<b>7</b>	<b>DEMAND IN A DUOPOLY WITH HORIZONTAL PRODUCT DIFFERENTIATION</b>	
	<i>Dave Furth</i>	<b>149</b>
1	Introduction	149
2	Demand Functions	153
3	Rationing Schemes	163
4	Conclusions	168
<b>8</b>	<b>IMPLEMENTING STRONG AND LOWER STRONG POSITIVE ASSOCIATION SOCIAL CHOICE RULES BY SOCIAL PROCEDURES</b>	
	<i>Joseph Greenberg</i>	<b>177</b>
1	Introduction	178
2	Procedures	180
3	Stable Standards of Behavior	182
4	Strong Positive Association	186
5	Lower Strong Positive Association	188
<b>9</b>	<b>COOPERATION AND COMMUNICATION RESTRICTIONS: A SURVEY</b>	
	<i>Peter Borm, Anne van den Nouweland and Stef Tijs</i>	<b>195</b>
1	Introduction	195
2	Communication Games and Solution Concepts	197
3	Dividends and Calculation Methods	203

4	Properties of Communication Games	207
5	Strategic Behavior and Endogenous Formation of Communication Links	211
6	Generalizations	215
<b>10</b>	<b>OUTLINE OF THE IMPLICATIONS OF THE COOPERATIVE NATURE OF THE FIRM</b>	
	<i>Tatsuro Ichiishi</i>	
1	Introduction	<b>229</b>
2	Basic Model	229
3	Ownership Structures	232
4	Equilibrium Existence Theorem	239
5	Pareto Non-Optimality	242
6	Comparative Economic Systems	244
7	Concluding Remark: Cooperative Processing of Information	245
<b>11</b>	<b>INTERSECTION THEOREMS ON THE UNIT SIMPLEX AND THE SIMPLOTOPE</b>	
	<i>Dolf Talman</i>	
1	Introduction	<b>257</b>
2	Preliminaries	257
3	Intersection Theorems on the Unit Simplex	259
4	Intersection Theorems on the Simplotope	261
		268
<b>12</b>	<b>A SOCIAL POWER INDEX FOR HIERARCHICALLY STRUCTURED POPULATIONS OF ECONOMIC AGENTS</b>	
	<i>René van den Brink and Robert P. Gilles</i>	
1	Introduction	<b>279</b>
2	Hierarchically Structured Populations	280
3	Social Power Indices	284
4	A Subjective Approach to the BG-Index	291
5	An Example	296
		306
