Foreword

<i>D. K. Holtshouse</i>	V
-------------------------------	---

Part I. Introduction

1. Introduction

<i>U. M. Borghoff, R. Pareschi</i>	3
1.1 Why Knowledge?	3
1.2 Structure and Content of the Book	4
1.2.1 The Knowledge Life-Cycle and the Knowledge Management Architecture	6
1.2.2 The Flow of Knowledge	8
1.2.3 Knowledge Cartography: Knowledge Navigation, Mapping, and Simulation	9
1.2.4 Communities of Knowledge Workers	10
1.2.5 Knowledge Repositories and Libraries	12

Part II. The Flow of Knowledge

2. The Lessons Learned Cycle

<i>G. v. Heijst, R. v. der Spek, E. Kruizinga</i>	17
2.1 Introduction	17
2.2 Corporate Memories	18
2.3 Lessons Learned Processes	20
2.3.1 Individual Learning	20
2.3.2 Learning Through Communication	21
2.3.3 Developing a Knowledge Repository	23
2.3.4 Dependencies Between the Learning Processes	24
2.3.5 Summary	25
2.4 Examples of Corporate Memories	26
2.4.1 The Knowledge Attic	26
2.4.2 The Knowledge Sponge	27

2.4.3	The Knowledge Publisher	27
2.4.4	The Knowledge Pump	28
2.5	Structuring Corporate Memories	29
2.5.1	Elements of the Corporate Memory	30
2.5.2	Indexing the Corporate Memory	31
2.5.3	Attributes of Knowledge Items	32
2.5.4	Knowledge Profiles of Employees	33
2.6	Discussion and Future Work	34

3. Knowledge Pump: Supporting the Flow and Use of Knowledge

<i>N. Glance, D. Arregui, M. Dardenne</i>	35	
3.1	Introduction	35
3.2	Related Work	37
3.2.1	Document Management and Digital Libraries	37
3.2.2	Information Filtering	37
3.3	Design Objectives and Requirements	41
3.3.1	Designing for the User	41
3.3.2	Designing for the Community	42
3.3.3	Designing for the Organization	43
3.4	Implementation	44
3.4.1	Functionality: Document Management and Recommendation	45
3.4.2	Technical Aspects: Community-Centered Collaborative Filtering	47
3.4.3	Architecture: A Client-Server System	49
3.5	Summary and Outlook	50

Part III. Knowledge Cartography

4. Negotiating the Construction of Organisational Memories

<i>S. Buckingham Shum</i>	55	
4.1	Introduction and Definitions	55
4.2	Characterising Knowledge Work	56
4.2.1	A Study of Knowledge Workers	57
4.2.2	Wicked Problems	58
4.3	Negotiation, Argumentation and Knowledge Work	59
4.4	Visualising Argumentation	59
4.5	Collaborative Hypermedia Infrastructure	62
4.6	What Kinds of Knowledge are Captured?	64
4.7	Argumentation in Use	66
4.8	Hands-on Practicalities	67
4.8.1	The Cognitive Costs and Benefits	67
4.8.2	Modes of Groupwork	68
4.8.3	Organisational Culture	68

4.8.4	Negotiating the “Context Paradox”	70
4.9	“Knowledge (Management) is Power”: Ethical and Representational Issues	71
4.9.1	The Politics of Formalisation	72
4.9.2	“Participatory KM” Based on Stable, Sanctioned Knowledge	74
4.10	Conclusion	78
5.	A Technology for Supporting Knowledge Work: The RepTool	
	<i>B. Jordan, R. Goldman, A. Eichler</i>	79
5.1	Introduction	79
5.2	Views provided by the RepTool	80
5.3	Technical Details	82
5.3.1	The RepTool Database	82
5.3.2	Graphic Views and Maps	85
5.3.3	Connection between the Database and Graphical Representations	86
5.3.4	System Requirements	87
5.4	Working with the RepTool	88
5.4.1	Supporting Teams in a Client-Focused Campaign	88
5.4.2	Supporting Operational Work	91
5.5	Using the RepTool	93
5.6	RepToolian Visions: The RepTool in the World	94
5.6.1	Views of Knowledge and Knowledge Management	94
5.6.2	RepToolian Data Collection: Systematic and Relevant	95
5.6.3	RepToolian Conversations	96
5.6.4	Support for Participatory Knowledge Management	96

Part IV. Communities of Knowledge Workers

6.	An Environment for Cooperative Knowledge Processing	
	<i>W. Prinz, A. Syri</i>	101
6.1	Introduction	101
6.2	Application Scenario	102
6.3	Requirements	104
6.4	POLITeam Solutions and Experiences	105
6.4.1	Circulation Folders	105
6.4.2	Shared Workspaces	110
6.4.3	Integrated Use of Both Cooperation Tools	117
6.5	Summary	119

7. Ariadne: Supporting Coordination Through a Flexible Use of Knowledge Processes	
<i>C. Simone, M. Divitini</i>	121
7.1 Introduction	121
7.2 Ariadne: A Description of the Framework	124
7.2.1 The Notion of Coordination Mechanism	124
7.2.2 The Categories of Articulation Work	125
7.2.3 The Ariadne Environment	127
7.2.4 The Role of Communication Features	129
7.3 Ariadne at Work: A Working Example	130
7.3.1 The Scenario	131
7.3.2 Constructing Computational Coordination Mechanisms	132
7.3.3 Using a Computational Coordination Mechanism	136
7.4 Modifying a Computational Coordination Mechanism	137
7.5 ABACO: An Agent Based Implementation of Ariadne	143
7.5.1 The Multi-Layer Structure of ABACO	144
7.5.2 The Interoperability Language	145
7.6 Conclusions	147

Part V. Knowledge Repositories and Libraries

8. From Natural Language Documents to Sharable Product Knowledge: A Knowledge Engineering Approach	
<i>D. Rösner, B. Grote, K. Hartman, B. Höfling</i>	151
8.1 Introduction	151
8.2 Knowledge Acquisition from Natural Language Documents	152
8.2.1 Approaches to Knowledge Acquisition	153
8.2.2 Content of Documents	155
8.2.3 Macrostructure	156
8.2.4 Discourse Structure	157
8.2.5 Linguistic Realization	158
8.3 Knowledge Representation	160
8.3.1 Requirements Analysis and Representation Decisions	160
8.3.2 Knowledge Formalization	162
8.4 Expressing the Knowledge: The <i>TechDoc</i> Generator	168
8.4.1 System Architecture	169
8.4.2 Linguistic Resources	171
8.4.3 Example	172
8.5 Knowledge Management	176
8.5.1 Benefits	176
8.5.2 Costs and Possible Optimization	177
8.5.3 A Practical Solution: The Authoring Tool	178
8.6 Discussion	179
8.7 Summary and Future Work	181

9. Corporate Memories for Knowledge Management in Industrial Practice: Prospects and Challenges	
<i>O. Kühn, A. Abecker</i>	183
9.1 Introduction	183
9.2 Knowledge Management and Corporate Memories	184
9.2.1 Current Knowledge Management Deficits	184
9.2.2 Computer Support for Knowledge Management	185
9.2.3 Towards the Realization of a Corporate Memory	187
9.3 Three Case Studies	188
9.3.1 Study 1: Crankshaft Design	188
9.3.2 Study 2: Quality Assurance for Vehicle Components	191
9.3.3 Study 3: Bid Preparation for Oil Production Systems	193
9.4 Lessons Learned from the Case Studies	196
9.4.1 Crucial Corporate Memory Requirements	196
9.4.2 Corporate Memory versus Expert System	197
9.4.3 Core Functionalities of an Organizational Memory	198
9.4.4 Corporate Memory Architecture	199
9.4.5 How to Develop a Corporate Memory	201
9.5 Future Work	203
9.6 Summary	205
References	207
Contributors	223
List of Figures	225
List of Tables	227
Index	229
