

# **CONTENTS**

<b>Preface</b>	vii
<b>Introduction</b>	1
<b>Chapter 1</b>	
<b>Flow Shop</b>	30
1. Maximal Completion Time. Two Machines	31
2. Maximal Completion Time. Three and More Machines	41
3. Maximal Completion Time with No-Wait in Process	49
4. Maximal Lateness	65
5. Total Flow Time	69
6. Ordered Matrices of Processing Times	75
7. Dominant Matrices of Processing Times	89
8. Approximation Algorithms	104
9. Bibliography and Review	113
<b>Chapter 2</b>	
<b>Job Shop</b>	128
1. Optimal Processing of Two Jobs	129
2. Maximal Lateness	140
3. Maximal Completion Time. Equal Processing Times	147
4. Maximal Completion Time. Arbitrary Processing Times	157
5. Maximal Completion Time with No-Wait in Process	167
6. Bibliography and Review	173

<b>Chapter 3</b>	
<b>Open Shop</b>	179
1. Maximal Completion Time. Two Machines	180
2. Maximal Completion Time. Three and More Machines	203
3. Maximal Completion Time. Preemption	212
4. Maximal Completion Time. Precedence Constraints	226
5. Due Dates	242
6. Total Flow Time. Equal Processing Times	254
7. Total Flow Time. Arbitrary Processing Times	261
8. Bibliography and Review	271
<b>Chapter 4</b>	
<b>Mixed Graph Problems</b>	280
1. Network Representation of Processing Systems	281
2. Mixed Graphs	292
3. Branch-and-Bound Method	301
4. Optimization of Processing Systems	312
5. Stability of Optimal Schedules	319
6. Bibliography and Review	327
<b>References</b>	335
<b>Additional References</b>	391
<b>Index</b>	365
<b>Also of interest</b>	403
