Tables and Figures

TABLES

2.1	Summary of Assembly Plant Characteristics, Volume Producers, 1989 (Average for Plants in Each Region)	23
3.1	Costs Relating to 12 MW Oil-based Plant	29
3.2	Costs Relating to 13 MW Coal-based Plant	30
3.3	Effect of 20% Devaluation on Variable Cost Only	32
3.4	Cost Structure of an Automobile Firm at the First Stage of Import Substitution (20%)	46
3.5	Cost Structure of an Automobile Firm at the Second Stage of Import Substitution (30%)	46
3.6	Cost Structure of an Automobile Firm at the Third Stage of Import Substitution (45%)	47
3.7	Cost Structure of an Automobile Firm at the Fourth Stage of Import Substitution (65%)	47
3.8	Cost Structure of an Automobile Firm at the Fifth Stage of Import Substitution (80%)	48
3.9	Cost Structure of an Automobile Firm at the Sixth Stage of Import Substitution (95%)	48
5.1	Optimum Values of the Various Quantities for an Annualized Interest Rate of 12%	70
5.2	Optimum Values of the Various Quantities for an Annualized Interest Rate of 18%	71
5.3	Optimum Values of the Various Quantities for an Exchange Rate of Rs 9 Per Dollar	72
5.4	Optimum Values of the Various Quantities for an Exchange Rate of Rs 14 Per Dollar	73
6.1	Optimum Level of Import Substitution for Product 2 with an Annualized Interest Rate of 11%	83
6.2	Optimum Values for Product 1 with an Annualized Interest Rate of 16%	92
6.3	Optimum Values for Product 2 with an Annualized Interest Rate of 16%	92
6.4	Optimum Values for both Products Manufactured together with an Annualized Interest of 16%	93
6.5	Optimum Values for Product 1 with an Exchange Rate of Rs 32 Per Dollar	94
6.6	Optimum Values for Product 2 with an Exchange Rate of Rs 32 Per Dollar	94
6.7	Optimum Values for both Products Manufactured Together with an Exchange Rate of Rs 32 Per Dollar	95

6.8 Return on Capital Employed During 1984-7 96
6.9 Optimum Results for a Single Product and Two Products 96
6.10 Return on Capital Employed for a Single Product and Two Products 97

FIGURES

1.1 Open Economy—IS Curve 9
1.2 IS, LM, CM in the Open Economy 11
2.1 Conceptual Hierarchical Structure of Manufacturing Process: Technology, Scale and Learning 15
2.2 Global Conceptual Hierarchical Structure of Manufacturing Process: Technology, Scale and Learning 17
2.3 Productivity versus Quality in the Assembly Plant, Volume Producers, 1989 24
3.1 Cost Curves for an Oil-Based 12 MW Power Plant 28
3.2 Cost Curves for a Coal-Based 13 MW Power Plant 31
3.3 Import Content in Various Stages of Import Substitution 35
3.4 Cost Curves for an Automobile Firm at the First Stage of Import Substitution 40
3.5 Cost Curves for an Automobile Firm at the Second Stage of Import Substitution 41
3.6 Cost Curves for an Automobile Firm at the Third Stage of Import Substitution 42
3.7 Cost Curves for an Automobile Firm at the Fourth Stage of Import Substitution 43
3.8 Cost Curves for an Automobile Firm at the Fifth Stage of Import Substitution 44
3.9 Cost Curves for an Automobile Firm at the Sixth Stage of Import Substitution 45
3.10 Average Cost for an Automobile at the First Stage of Import Substitution 49
3.11 Average Cost for an Automobile at the Second Stage of Import Substitution 49
3.12 Average Cost for an Automobile at the Third Stage of Import Substitution 50
3.13 Average Cost for an Automobile at the Fourth Stage of Import Substitution 50
3.14 Average Cost for an Automobile at the Fifth Stage of Import Substitution 51
3.15 Average Cost for an Automobile at the Sixth Stage of Import Substitution 51
4.1 Increments of Capacity in order of Increasing Cost 53

4.2	Concentration Measured by Value of Shipment in Manufacturing Industries	56
4.3	Domestic and International Demand Curves	59
5.1	Optimum Levels of Import Substitution for Different Interest and Exchange Rates	67
5.2	Optimum Output with Two Demand Curves	69
6.1	Import Substitution for Two Products as a Function of Time	76
6.2	Optimum Levels of Import Substitution for Different Interest and Exchange Rates When Only Product 1 is Manufactured	85
6.3	Optimum Levels of Import Substitution for Different Interest and Exchange Rates when Only Product 2 is Manufactured	86
6.4	Optimum Levels of Import Substitution for Different Interest and Exchange Rates when Both Products 1 and 2 are Manufactured Together	87
