List of figures	vii
Preface	ix
<b>1 Introduction</b>	<b>1</b>
1.1 <i>The importance of technological cooperation</i>	1
1.2 <i>Purpose of the study and content of the book</i>	6
<b>2 Technological development in industrial markets: an interaction and network approach</b>	<b>8</b>
2.1 <i>The concept of business relationships</i>	8
2.2 <i>A network-based framework for description and analysis of business relationships</i>	18
2.3 <i>Networks, relationships and technological development</i>	26
<b>3 Methodology</b>	<b>34</b>
<b>4 Development and commercialization of Zn-Fe alloy coated steel sheet for autobodyes: the case of Nippon Steel</b>	<b>37</b>
4.1 <i>Introduction</i>	37
4.2 <i>Nippon Steel Corporation</i>	37
4.3 <i>Development of coated steel sheet for automotive bodyes: historical background</i>	42
4.4 <i>The case of DUREXCELITE</i>	45
4.5 <i>Other developments</i>	57
4.6 <i>International outlook</i>	61
4.7 <i>Some comments on the Nippon Steel case</i>	62
<b>5 Development and commercialization of structural fine ceramics: the case of Toshiba</b>	<b>65</b>
5.1 <i>Introduction</i>	65

---

5.2	<i>Fine ceramics: definition and characteristics</i>	65
5.3	<i>Toshiba</i>	68
5.4	<i>Development of nitride-based ceramics in Toshiba</i>	73
5.5	<i>Cummins Engine</i>	82
5.6	<i>The agreement between Toshiba and Cummins</i>	88
5.7	<i>Toshiba's and Cummins' joint development of wear-resistant silicon nitride components for diesel engines</i>	90
5.8	<i>The current situation</i>	97
5.9	<i>Some comments on the Toshiba case</i>	100
<b>6</b>	<b>Case analysis</b>	102
6.1	<i>Degree of cooperation and integration with the network</i>	102
6.2	<i>Selection of partner</i>	109
6.3	<i>Management of cooperative relationships</i>	118
<b>7</b>	<b>A concluding note on the interacting and networking behavior of Japanese companies</b>	131
7.1	<i>The Japanese industrial system and technological cooperation</i>	133
7.2	<i>The Japanese company and technological cooperation</i>	142
	Notes	150
	Bibliography	154
	Index	159

---

# Figures

---

2.1	Example of a company network	9
2.2	Interaction model	11
2.3	Schematic illustration of a network	20
2.4	Network model	23
2.5	Summary of the conceptual framework for analysis of inter-company relationships in industrial networks	26
4.1	The organization of the Technical Development Bureau	40
4.2	Protection methods against corrosion of automobile bodies	43
4.3	Continuous galvanizing line No. 4 at Nagoya Works	46-7
4.4	Electrolytic galvanizing line No. 1 at Nagoya Works	48-9
4.5	Structure of two-layer Zn-Fe coating film	51
4.6	Different steps in developing DUREXCELITE	52
4.7	Changes in corrosion-resistant steel sheets for autobodies in Japan	58
4.8	Targets of corrosion-resistant steel	60
5.1	Manufacturing process for fine ceramics	67
5.2	Organization of the Material & Components Group, Toshiba	69
5.3	Toshiba's R&D laboratories	71
5.4	High-strength silicon nitride ceramics	74
5.5	Development of nitride ceramics in Toshiba	77
5.6	Conception of a ceramic diesel engine	84
5.7	Ceramic links for diesel engines	93
6.1	Nippon Steel's joint R&D organization with large domestic customers	120
6.2	The dual problem of exploiting the new technology outside the cooperative relationship	127

7.1	Groups of factors influencing the interaction and networking behavior of Japanese companies	133
7.2	Different Toshiba units involved in the development of silicon nitride components	145
