	Preface	**xiii**
1	**INTRODUCTION TO VLANS**	**1**
	vLAN Overview	1
	Construction Basics	2
	Implicit versus Explicit Tagging	2
	Using Implicit Tagging	3
	Rationale for Use	5
	Supporting Virtual Organizations	5
	LAN Administration	6
	More Efficient Bandwidth Utilization	7
	Improved Security	7
	Network Issues	8
	Multivendor Product Compatibility	8
	Interdomain Communications	9
	vLAN Awareness	9
	Priority Specification	9
	IP Multicast Address Support	10
	Nonclassified Frame Support	10
	Inactive vLAN Table Entry Processing	10
	Chapter Preview	11
	Networking Standards	12
	Frame and Cell Operations	12

Network Layer Operations 12
LAN Equipment Operations 12
vLAN Construction Basics 13
Standards 13
Virtual Networking 13

2 NETWORKING STANDARDS 15
Standards Organizations 16
National Standards Organizations 16
ANSI 17
IEEE 18
International Standards Organizations 18
ITU-T 18
ISO 19
The ISO Reference Model 19
Layered Architecture 21
OSI Layers 21
Layer 1—The Physical Layer 23
Layer 2—The Data Link Layer 23
Layer 3—The Network Layer 24
Layer 4—The Transport Layer 25
Layer 5—The Session Layer 25
Layer 6—The Presentation Layer 25
Layer 7—The Application Layer 26
Data Flow 26
IEEE 802 Standards 27
802 Committees 28
Data Link Subdivision 30
Medium Access Control 31
Logical Link Control 32
Additional Sublayering 33
LAN Frame Header 35

3 FRAME AND CELL OPERATIONS 37
Ethernet Frame Composition 38
Preamble Field 40
Start-of-Frame Delimiter Field 40
Destination Address Field 41
I/G Subfield 42
U/L Subfield 42
Universally versus Locally Administered Addressing 42
Source Address Field 44

Type Field 44
Length Field 45
Data Field 46
Frame Check Sequence Field 46
Ethernet Media Access Control 47
Functions 47
Transmit Media Access Management 48
Service Primitives 54
Primitive Operations 55
Ethernet Logical Link Control 56
The LLC Protocol Data Unit 56
Ethernet_SNAP Frame 58
NetWare Ethernet_802.3 Frame 59
Receiver Frame Determination 60
Types of Service 61
Type 1 61
Type 2 62
Type 3 63
Classes of Service 63
Service Primitives 63
Fast Ethernet 64
Encoding 64
Start-of-Stream Delimiter 65
End-of-Stream Delimiter 65
Token Ring Frame Operations 65
Transmission Formats 66
Starting/Ending Delimiters 68
Differential Manchester Encoding 68
Nondata Symbols 69
Access Control Field 71
The Monitor Bit 74
The Active Monitor 75
Frame Control Field 76
Destination Address Field 77
Universally Administered Address 77
Locally Administered Address 78
Functional Address Indicator 79
Address Values 79
Source Address Field 81
Routing Information Field 82
Information Field 82
Frame Check Sequence 84

Frame Status Field 84
Token Ring Medium Access Control 85
Vectors and Subvectors 85
MAC Control 86
Purge Frame 88
Beacon Frame 88
Duplicate Address Test Frame 89
Station Insertion 89
Token Ring Logical Link Control 91
Service Access Points 92
Types and Classes of Service 93
FDDI 93
Network Advantages 94
Operating Rate 94
Reliability 94
Use of Optical Media 95
Hardware Components, Network Topology, and Access 95
Optical Transmitters 95
Optical Receiver 96
Fiber Optic Cable 96
Power Loss 97
Connectors 97
Network Topology 98
Counter-Rotating Rings 98
Token Use 98
Network Access 99
Dual Attached Station 99
Single Attached Station 100
Data Encoding 101
NRZI Signaling 102
4B/5B Encoding 103
Frame Formats 103
FDDI Token 105
FDDI Frame 106
FDDI_802.2 107
FDDI_SNAP 108
Bandwidth Allocation 108
Classes of Traffic 110
Timers 110
Synchronous Transmission 111
Asynchronous Transmission 112
Transmission Example 113

ATM 113
Benefits 113
Scalability 115
Transparency 116
Traffic Classification 116
The ATM Protocol Stack 116
ATM Adaptation Layer 116
ATM Layer 117
Physical Layer 118
ATM Operation 118
ATM Network Interface Cards 119
LAN Switch 119
ATM Router 119
ATM Switch 120
ATM Service Processor 121
Network Interfaces 121
User-to-Network Interface 121
Network-to-Node Interface 122
ATM Cell Header 122
Generic Flow Control Field 123
Virtual Path Identifier Field 123
Virtual Circuit Identifier Field 124
Payload Type Identifier Field 125
Cell Loss Priority Field 125
Header Error Check Field 125
ATM Connections and Cell Switching 125
Connections 126
Cell Switching 126
Types of Switches 126
Using Connection Identifiers 127
LAN Emulation 128

4 NETWORK LAYER OPERATIONS 133
NetWare IPX/SPX and Related Protocols 133
IPX 134
Checksum Field 134
Length Field 134
Transport Control Field 134
Packet Type Field 134
Destination Network Field 136
Destination Node Field 136
Destination Socket Field 136

Source Network Field 136
Source Node and Source Socket Fields 137
IPX Data Field Composition 137
SPX 139
Connection Control Field 139
Datastream Type Field 139
Source and Destination Connection ID Fields 140
Sequence Number Field 140
Acknowledgment Number Field 140
Allocation Number Field 141
SAP and RIP 141
SAP Operation 141
SAP Fields 142
RIP Operation 142
Performance Issues 143
TCP/IP 143
Datagrams versus Virtual Circuits 144
ICMP and ARP 145
TCP 145
UDP 147
IP 148
Domain Name Service 154
Name Server 156

5 LAN EQUIPMENT OPERATIONS 159
Bridges 159
Operational Overview 159
Filtering and Forwarding 161
Types 162
Bridge Table Operations 163
Frame Conversion 163
Address/Routing Table Construction 164
Spanning Tree Protocol 167
Operation 167
Source Routing 172
The RIF Field 173
Operation Example 174
Advantages 176
Disadvantages 176
Source Routing Transparent Bridges 177
Operation 178
Advantages 178

Translating Operations 178
Bridge Utilization 181
Serial and Sequential Bridging 181
Parallel Bridging 183
Star Bridging 183
Backbone Bridging 184
Intelligent Switches 184
Conventional Hub Bottlenecks 186
Ethernet Hub Operation 186
Token Ring Hub Operation 188
Bottleneck Creation 189
Switching Operations 190
Bridge Switching 190
The Switching Hub 191
Switching Techniques 195
Cross-Point Switching 195
Store-and-Forward 196
Hybrid 199
Port-Based Switching 199
Segment-Based Switching 201
Switching Architecture 203
High-Speed Port Operation 204
Full-Duplex Ethernet and Token Ring 204
Fat Pipe 206
100BASE-T 207
FDDI and ATM Connections 208
Flow Control 209
Token Ring Switching 210
Port Switching 210
Switching Techniques 212
Network Utilization 212
Network Redistribution 213
Server Segmentation 214
Network Segmentation 214
Backbone Replacement 215
Routers 218
Basic Operation and Use of Routing Tables 218
Networking Capability 220
Communication, Transport, and Routing Protocols 221
Communication Protocol 222
Routing Protocol 222
Transport Protocol 222

Types of Routing Protocols 223
Interior Domain 224
Exterior Domain 224
Protocol Operation 224
Vector Distance Protocol 224
Link State Protocols 227
Filtering 228
Filtering Expressions 230
Filtering Examples 230

6 VLAN CONSTRUCTION BASICS 233
Port-Grouping vLANs 233
Using Intelligent Wiring Hubs 234
Operation 234
vLAN Creation 234
Advantages 235
Disadvantages 236
Using LAN Switches 237
Operation 237
Advantages 238
Disadvantages 239
Supporting Inter-vLAN Communications 239
MAC-Based Switching 240
Operational Example 241
Advantages 243
Flexibility 243
Bandwidth and Expandability 243
Disadvantages 244
MAC Address Lists 245
Interswitch Communications 246
Router Restrictions 246
Configuration and Support 248
Layer-3-Based vLANs 249
Subnet-Based vLANs 249
Advantages 250
Disadvantages 251
Protocol-Based vLANs 251
Advantages 252
Disadvantages 254
Rule-Based vLANs 254
Capabilities 254
Multicast Support 255

Advantages 256
Disadvantages 256
Comparing vLAN Creation Features 257
Connectivity Beyond the Workgroup 258
Ease of Station Assignment 258
Flexibility 258
Improving Workgroup Bandwidth 258
Multicast Support 259
Multiple vLANs per Port 259
Security 259
vLAN Spanning 260

7 STANDARDS 261
De facto Standards 262
The ISL Protocol 262
Overview 262
Frame Flow 263
Frame Composition 263
Configuration Example 267
The 802.10 Security Protocol 269
The 802.10 Frame 270
Cisco Systems Frame Modification 272
De jure Standards 273
LAN Emulation 273
Rationale for the Process 273
Operation 274
IP over ATM Address Resolution 277
IEEE 802.1Q 277
Architecture 278
Frame Tagging 279
Proposed vLAN Tagging 280
Frame Formats 281
The Continuing Effort 283

8 VIRTUAL NETWORKING 285
Rationale 286
Reliability 286
Economics 288
Applications 289
Voice and Fax 289
Micom's V/IP 290
Local Virtual Networking 291

Inter-vLAN, Intraswitch Communications 292
Creative Communications 292
Using a Router 293
Inter-vLAN, Interswitch Communications 295
Creative Communications 295
Using a Router 295
Backbone Switching 297
ATM Considerations 298
Using the Internet 301
Security Considerations 301
The Basic Firewall 301
Encryption 310
Authentication 311
Proxy Services 313
Testing Considerations 314
Performance Issues 315

Index **317**
