List of abbreviations xvii

1. Introduction and Overview
   1.1 European Union trade 1
   1.2 Arbitrage 4
   1.3 Duality and trade 5
   1.4 Controversial trade 9
   1.5 Overview of the book 11

2. Labour Productivity and Comparative Advantage 14
   2.1 Introduction 14
   2.2 Ricardo’s theory of comparative advantage 16
   2.3 Extending the Ricardian Model 26
   2.4 Empirical relevance 32
   2.5 Revealed comparative advantage 35
   2.6 Comparative advantage and policy reform 37
   2.7 Aspects of the Ricardian model 37
   2.8 Summary 38

3. Neo-Classical Production 40
   3.1 Introduction 40
   3.2 Production functions and factor substitutability 41
   3.3 Fixed factor endowments and efficient resource allocation 43
   3.4 Factor intensities and increasing costs 44
   3.5 Factor prices and proportions 46
   3.6 General equilibrium 47
   3.7 Factor and commodity prices 47
   3.8 Duality, and commodity and factor prices 49
   3.9 Factor market distortions 52
   3.10 Factor intensities again 55
   3.11 Summary 55
## Contents

4. Reciprocal Demand and Trade  
   4.1 Introduction 57  
   4.2 Demand and the closed economy 57  
   4.3 Community preferences and welfare 58  
   4.4 Closed economy equilibrium 60  
   4.5 Equilibrium for the open economy 62  
   4.6 The gains from trade 63  
   4.7 Reciprocal demand and the offer curve 64  
   4.8 Properties of an offer curve 67  
   4.9 The trading economy's offer curve 68  
   4.10 The world trading equilibrium 70  
   4.11 Uses of the offer curve 71  
   4.12 Stability of equilibrium 72  
   4.13 Bases of trade 75  
   4.14 Summary 76

5. Factor Endowments 77  
   5.1 Introduction 77  
   5.2 The Heckscher-Ohlin model 78  
   5.3 Testing the Heckscher-Ohlin proposition 98  
   5.4 Heckscher-Ohlin: concluding comments 100  
   5.5 The specific factor model 101  
   5.6 Summary 109

6. Trade and Technology 110  
   6.1 Introduction 110  
   6.2 The technology gap model 111  
   6.3 The product cycle theory 114  
   6.4 Trade related intellectual property rights 120  
   6.5 Conclusions 123  
   6.6 Summary 124

7. International Trade and Imperfect Competition 125  
   7.1 Introduction 125  
   7.2 Oligopoly in trade 125  
   7.3 Monopolistic competition and international trade 132  
   7.4 Market imperfections and the possibility of damaging trade 139  
   7.5 Summary 142

8. Testing Trade Theories 143  
   8.1 Introduction 143  
   8.2 Empirical studies of the Heckscher-Ohlin model 144  
   8.3 Factor content studies 146
13. Trade Blocs 262
   13.1 Introduction 262
   13.2 The free trade area 262
   13.3 The customs union 269
   13.4 The emergence of regional trading blocs 271
   13.5 Summary 272

14. Trade, Competitiveness, Employment, and Wages 274
   14.1 Introduction 274
   14.2 Trade and competitiveness 275
   14.3 Trade and jobs 278
   14.4 Trade and wages 282
   14.5 Implications for policy in the EU 284
   14.6 Summary 285

15. The Political Economy of Protection 286
   15.1 Introduction 286
   15.2 Autocrats and rent-seeking 287
   15.3 Protection and the political process 296
   15.4 Summary 300

16. Trade and the Environment 301
   16.1 Introduction 301
   16.2 Trade liberalization and the environment 302
   16.3 Transboundary pollution 308
   16.4 Ecological dumping 310
   16.5 Environmental policy in the EU 313
   16.6 Conclusions 315
   16.7 Summary 316

17. European Union Trade Policy and Developing Countries 317
   17.1 Introduction 317
   17.2 Motivation of European policy towards developing countries 318
   17.3 The trading environment 318
   17.4 Policies concerning products 321
   17.5 The hierarchy of developing countries 325
   17.6 Aid 330
   17.7 Harmonization of standards 333
   17.8 Prospects 335
   17.9 Summary 337

18. The European Union’s Trade Policy, and the CAP 338
   18.1 Introduction 338
18.2 EU trade policy 338
18.3 The Common Agricultural Policy 355
18.4 Summary 365

## LIST OF FIGURES

1.1 Unrestricted arbitrage and the effects of trade .................................................. 5  
1.2 Possible income functions .................................................................................. 6  
1.3 Quantity and price indifference curves ............................................................... 7  
1.4 The expenditure function ................................................................................... 8  
1.5 Autarky and trading equilibrium ........................................................................ 9  
2.1 Demand, supply, and trade .................................................................................. 15 
2.2 Production and consumption possibilities ........................................................... 20 
2.3 Wages and the terms of trade .............................................................................. 23 
2.4 Real wages ......................................................................................................... 24 
2.5 Production possibilities: three goods ................................................................. 27 
2.6 Relative wages and the location of production ................................................... 28 
2.7 Production possibilities and supply: four countries ............................................ 30 
2.8 US and UK labour productivity and export share .............................................. 33 
3.1 Production isoquants .......................................................................................... 42 
3.2 Output per head .................................................................................................. 42 
3.3 Efficient factor allocation ................................................................................... 43 
3.4 Output and factor proportions .......................................................................... 44 
3.5 Production possibilities ..................................................................................... 44 
3.6 Factor prices and proportions ............................................................................ 46 
3.7 Factor and commodity prices ............................................................................ 48 
3.8 Isoquants and isoprice ....................................................................................... 51 
3.9 Commodity and factor prices ............................................................................ 52 
3.10 Changing commodity and factor prices ............................................................ 53 
3.11 Factor market distortions: capital subsidy ....................................................... 53 
3.12 Factor market distortions: minimum wage ...................................................... 54 
4.1 Consumer preferences ....................................................................................... 59 
4.2 Closed economy equilibrium ............................................................................. 61 
4.3 Open economy equilibrium .............................................................................. 63 
4.4 A total-revenue demand curve ........................................................................... 65 
4.5 A consumer's supply of money and demand for food ................................ ........ 66 
4.6 The elasticity of an offer curve ............................................................................ 67 
4.7 Offer curve with fixed production ...................................................................... 69 
4.8 Offer curve with variable production .................................................................. 69 
4.9 Equilibrium of two trading economies ............................................................... 71 
4.10 Stable trading equilibrium ............................................................................... 72

9.15 Home’s preferred exports and imports, at different relative prices: the Offer Curve for Home 188
9.16 The free trade equilibrium at D 188
9.17 The free trade equilibrium at D, with consumption and production equilibria in each country 188
9.18 Multiple intersection of offer curves 189
9.19 The offer curve for Home (dashed), and trade indifference curves (labelled 1, 2, 3) 189
9.20 The home country facing a linear offer curve from Abroad: a tariff lowers Home’s potential welfare 190
9.21 Effects of a tariff levied by Home, when it faces a linear offer curve 190
9.22 Home facing a concave offer curve, restricting its trade optimally to Q 191
9.23 Both countries set their optimum tariffs, taking the other’s tariff as given (Nash equilibrium) 192
9.24 The production inefficiency of the Nash double optimum-tariff equilibrium 194
9.25 Free trade, when Home’s optimum tariff would be very much larger than Abroad’s 194
9.26 Imimiserizing growth 196
9.27 Too many pigs 198
9.28 Domestic monopoly: case 1 199
9.29 Domestic monopoly: case 2 200
9.30 Domestic monopoly: case 3 200
9.31 Effective demand: tariff vs. quota 201
10.1 The reaction function for firm A 208
10.2 Cournot equilibrium 208
10.3 Rent shifting in the Cournot model 209
10.4 Rent shifting in the Bertrand model 214
11.1 The effects of capital migrating from country B to country A 232
11.2 The steady-state effects of international capital migration, when capital stocks are endogenous 242
11.3 Long run capital and asset positions for countries A and B 243
11.4 The evolution of consumption, the interest rate, wealth, and capital in countries A and B, following capital–market integration at time $t$ 245
12.1 Hicks-neutral technological progress at the same rate in both sectors: output effects 251
12.2 Hicks-neutral technological progress in sector $x$ only: output effects 251
12.3 Codetermination of the rates of growth and interest in Romer’s 1990 model of endogenous growth 257
13.1 The effects of the FTA when B is a lower-cost source of supply 264
13.2 The effects of the FTA when C is a lower-cost source of supply 265
14.1 Employment in manufacturing 278
15.1 The partial equilibrium effects of a tariff: rent-seeking may increase deadweight loss by area $a$ 292
15.2 Private gains and costs from lobbying 294
16.1 The effects of trade liberalization for a small country importing a good which generates pollution in production 303
16.2 The effects of trade liberalization for a small country importing a good which generates pollution in production: optimal environment policy in place 303
16.3 The effects of trade liberalization for a small country exporting a good which generates pollution in production 304
16.4 The effects of trade liberalization for a small country exporting a good which generates pollution in production: optimal environmental policy in place 305
16.5 The inefficiency of trade policies in achieving environmental objectives 306
18.1 CAP price-stabilization when the rest of the world’s excess supply is volatile 355
18.2 CAP price-stabilization when excess demand is volatile in the European Union 357
18.3 The general effects of the CAP, without volatility 359
LIST OF TABLES

1.1 Trade within the EU-12, 1992: in milliard (billion) ECU  3
1.2 Exports and imports for selected countries, 1992: in milliard (billion) ECU  4
2.1 Labour inputs  18
2.2 Money costs of production  21
2.3 Real wages  24
2.4 Real wages in terms of each good before and after trade  25
2.5 Value added per hour worked in manufacturing in Germany and Japan (United States = 100)  34
2.6 British and German relative labour productivity  35
5.1 Factors required to produce $ million worth of exports and import replacement  98
8.1 Ratio of net trade to national endowment (*100) for various factors of production  151
8.2 Estimates of the gravity model using data for 25 countries for 1992  159
8.3 The actual and predicted distribution of Russian trade using the gravity model  161
14.1 Growth in real GDP, command GDP and productivity  276
17.1 Share of selected country groups in extra-EU trade  320
17.2 Extra-EU imports by commodity groups (percentage of imports)  320
17.3 Extra-EU exports by commodity groups (percentage of exports)  321
18.1 Summary of trade liberalization for industrial products in the interim Europe agreements  340–1
18.2 Average tariffs and the distribution (per cent) of EU imports according to different tariff rates: pre- and post-Uruguay Round  350
18.3 Separate components of overall welfare effects of high EU food prices under the Common Agricultural Policy  361
