

# Contents

<b>1. Derivative Background</b> .....	1
1.1 Financial Markets and Instruments .....	2
1.1.1 Derivative Instruments .....	2
1.1.2 Underlying securities .....	4
1.1.3 Markets .....	5
1.1.4 Types of Traders .....	6
1.1.5 Modelling Assumptions .....	7
1.2 Arbitrage .....	8
1.3 Arbitrage Relationships .....	11
1.3.1 Fundamental Determinants of Option Values .....	11
1.3.2 The Put-Call Parity .....	13
1.3.3 Arbitrage Bounds .....	16
1.4 Single-Period Market Models .....	20
Exercises .....	30
<b>2. Probability Background</b> .....	33
2.1 Measure .....	34
2.2 Integral .....	38
2.3 Probability .....	41
2.4 Equivalent Measures and Radon-Nikodým Derivatives .....	47
2.5 Conditional Expectations .....	48
2.6 Properties of Conditional Expectation .....	51
2.7 Modes of Convergence .....	53
2.8 Convolution and Characteristic Functions .....	56
2.9 The Central Limit Theorem .....	60
Exercises .....	63
<b>3. Stochastic Processes in Discrete Time</b> .....	67
3.1 Information and Filtrations .....	67
3.2 Discrete-Parameter Stochastic Processes .....	68
3.3 Discrete-Parameter Martingales .....	70
3.3.1 Definition and Simple Properties .....	70
3.3.2 Martingale Convergence .....	72
3.3.3 Doob Decomposition .....	73

3.4	Martingale Transforms .....	73
3.5	Stopping Times and Optional Stopping.....	75
3.6	The Snell Envelope .....	78
	Exercises .....	80
<b>4.</b>	<b>Mathematical Finance in Discrete Time .....</b>	<b>83</b>
4.1	The Model .....	83
4.2	Existence of Equivalent Martingale Measures.....	87
4.2.1	The No-Arbitrage Condition .....	87
4.2.2	Risk-Neutral Pricing .....	93
4.3	Complete Markets .....	96
4.4	Risk-Neutral Valuation .....	100
4.5	The Cox-Ross-Rubinstein Model .....	103
4.5.1	Model Structure.....	103
4.5.2	Risk-Neutral Pricing .....	105
4.5.3	Hedging .....	107
4.5.4	Comparison With the General Arbitrage Bounds .....	110
4.6	Binomial Approximations.....	111
4.6.1	Model Structure.....	111
4.6.2	The Black-Scholes Option Pricing Formula .....	113
4.6.3	Further Limiting Models .....	117
4.7	Multifactor Models .....	120
4.7.1	Extended Binomial Model .....	120
4.7.2	Multinomial Models .....	121
4.8	Further Contingent Claim Valuation in Discrete Time.....	123
4.8.1	American Options .....	123
4.8.2	Barrier Options .....	126
4.8.3	Lookback Options .....	127
4.8.4	A Three-Period Example .....	127
	Exercises .....	129
<b>5.</b>	<b>Stochastic Processes in Continuous Time .....</b>	<b>133</b>
5.1	Filtrations; Finite-Dimensional Distributions .....	133
5.2	Classes of Processes.....	134
5.3	Brownian Motion .....	138
5.4	Quadratic Variation of Brownian Motion .....	141
5.5	Stochastic Integrals; Itô Calculus .....	144
5.6	Itô's Lemma .....	149
5.6.1	Geometric Brownian Motion .....	152
5.7	Stochastic Differential Equations .....	154
5.8	Stochastic Calculus for Black-Scholes Models.....	158
5.9	Weak Convergence of Stochastic Processes .....	162
5.9.1	The Spaces $C^d$ and $D^d$ .....	162
5.9.2	Definition and Motivation .....	163
5.9.3	Basic Theorems of Weak Convergence.....	164

5.9.4	Weak Convergence Results for Stochastic Integrals . . . .	166
	Exercises . . . . .	167
<b>6.</b>	<b>Mathematical Finance in Continuous Time</b> . . . . .	<b>171</b>
6.1	Continuous-time Financial Market Models . . . . .	171
6.1.1	The Financial Market Model . . . . .	171
6.1.2	Equivalent Martingale Measures . . . . .	174
6.1.3	Risk-neutral Pricing . . . . .	177
6.1.4	Changes of Numéraire . . . . .	180
6.2	The Generalised Black-Scholes Model . . . . .	184
6.2.1	The Model . . . . .	184
6.2.2	Pricing and Hedging Contingent Claims . . . . .	192
6.2.3	The Greeks . . . . .	195
6.2.4	Volatility . . . . .	197
6.3	Further contingent claim valuation . . . . .	199
6.3.1	American Options . . . . .	199
6.3.2	Asian Options . . . . .	202
6.3.3	Barrier Options . . . . .	204
6.3.4	Lookback Options . . . . .	207
6.3.5	Binary Options . . . . .	210
6.4	Discrete- vs. Continuous-Time Models . . . . .	211
6.4.1	Convergence Reconsidered . . . . .	211
6.4.2	Finite Market Approximations . . . . .	212
6.4.3	Examples of Finite Market Approximations . . . . .	214
6.5	Further Applications . . . . .	221
6.5.1	Futures Markets . . . . .	221
6.5.2	Currency Markets . . . . .	224
	Exercises . . . . .	226
<b>7.</b>	<b>Incomplete Markets</b> . . . . .	<b>229</b>
7.1	Pricing in Incomplete Markets . . . . .	229
7.1.1	A General Option Pricing Formula . . . . .	229
7.1.2	The Esscher Measure . . . . .	232
7.2	Hedging in Incomplete Markets . . . . .	235
7.2.1	Variance Minimising Hedging . . . . .	235
7.2.2	Risk-Minimising Hedging . . . . .	240
7.3	Stochastic Volatility Models . . . . .	241
<b>8.</b>	<b>Interest Rate Theory</b> . . . . .	<b>245</b>
8.1	The Bond Market . . . . .	246
8.1.1	The Term Structure of Interest Rates . . . . .	246
8.1.2	Mathematical Modelling . . . . .	248
8.1.3	Bond Pricing, .. . . .	252
8.2	Short Rate Models . . . . .	254
8.2.1	The Term Structure Equation . . . . .	255

8.2.2	Martingale Modelling .....	256
8.2.3	Parameter Estimation .....	260
8.3	Heath-Jarrow-Morton Methodology .....	262
8.3.1	The Heath-Jarrow-Morton Model Class .....	262
8.3.2	Forward Risk-Neutral Martingale Measures .....	265
8.3.3	Completeness .....	267
8.4	Pricing and Hedging Contingent Claims .....	268
8.4.1	Short Rate Models .....	268
8.4.2	Gaussian HJM Framework .....	269
8.4.3	Swaps .....	271
8.4.4	Caps .....	272
	Exercises .....	274
<b>A.</b>	<b>Hilbert Space .....</b>	<b>277</b>
<b>B.</b>	<b>Projections and Conditional Expectations .....</b>	<b>279</b>
<b>C.</b>	<b>The Separating Hyperplane Theorem .....</b>	<b>281</b>
	<b>Bibliography .....</b>	<b>283</b>
	<b>Index .....</b>	<b>293</b>
