Preface	x
Introduction	1
Part One: Philosophy, Principles and Procedures	7
1 The Qualitative Turn in Management Research	9
Introduction	9
The positivist paradigm	11
The positivist/interpretivist debate	13
Common criticisms of qualitative research	17
A qualitative approach	19
Phenomenology	21
Ethnography	25
Postmodern approaches to research	30
Summary	35
Student exercises	37
2 Grounded Theory: Evolutionary Developments and Fundamental Processes	38
Introduction	38
The influence of symbolic interactionism	39
Glaser and Strauss: the discovery of grounded theory	41
Basic principles	42
Some similarities and differences between grounded theory and other qualitative approaches	43
The nature and role of theory	45
Grounded theory: a method in transition	46
A method for sociologists or adoption in the field of management	48
Grounded theory and cross-cultural research	51
Summary	53
Student exercises	54
3 Getting Started: Data Collection and Sampling	55
Introduction	55
The identification of an area of interest and data collection	55
Sources of data	56
Secondary analysis of qualitative data	56

Using life histories as data	58
Interviews	59
Introspection	62
Observational data	64
The use of memos	65
Sampling in qualitative research	66
Theoretical sampling	66
Constant comparison	68
Reaching saturation: what is it?	69
Using the literature to enhance theoretical sensitivity	70
Summary	72
Student exercises	73

4 Analysis, Interpretation and the Writing Process 74

Introduction	74
Interpreting the data using coding strategies	74
Open coding	75
Line-by-line analysis	76
The process of abstraction	77
Axial coding, concepts, properties and dimensional range	78
Dimensional analysis: an alternative version of grounded theory	79
Theorising using dimensional analysis	82
Causal conditions, phenomenon, intervening conditions, interactional strategies, consequences	83
Theoretical coding and basic social process	84
The conditional matrix	87
Developing core categories	88
Ensuring credibility through member checking	89
Writing the theory	90
A short note on manual or computer-aided analysis	92
Summary	95
Student exercises	96

**Part Two: Grounded Theory:
An Illustration of the Process 101**

5 Researching the Consumer Experience: An Illustration of the Grounded Theory Method 103	
Introduction	103
Researching the consumer experience	104
The research questions	105
Choosing the methodology: a grounded theory approach	106
Process: Theoretical sampling and data collection	108
Simultaneous analysis	110
Observation of behaviour	111
Taking the research into different locations	112

The focus groups	113
Analysis	113
Example of the process	114
Interview transcript	116
Memo relating to the transcript	119
The process of abstraction	120
Nostalgia: an example of a concept	121
Using diagrams to assist axial coding	124
Explanation of Figure 5.2	124
The concept of the 'self': a starting point for analysis	127
The quest for meaning and the concept of alienation	129
Summary	132
6 The Identification and Explanation of Concepts and Categories	133
Introduction	133
Locating the interpretation in theory	133
The existential visitor, motivations and experiences at heritage sites	134
The aesthetic visitor, motivations and experiences at heritage sites	138
The social visitor, motivations and experiences at heritage sites	141
Comments on the categories	143
The heritage environment and implications for operations management	145
Implications of the research	150
Final points relating to the data	150
Summary	152
Part Three: Some Concluding Remarks	153
7 A Critical Review of the Methodology	155
Introduction	155
Grounded theory is risky!	156
Time, space, insights and the 'drugless trip'	157
Which method do you choose?	158
Full or partial grounded theory?	160
Methodological transgressions	161
Using the literature and an overemphasis on induction	163
Premature closure – not enough data or not enough interrogation?	165
Some concluding remarks	166
Student exercises	168
Glossary	169
Bibliography	171
Index	182

Acknowledgement

Thanks to Frances, Patrick and Henry

Illustrations

Tables

2.1	Examples of grounded theory in management research	50
3.1	Types of qualitative sampling	67
4.1	The dimensions of dress codes	81
5.1	Choosing the methodology	107
5.2	Sample profile of visitors to Blist Hill	110
5.3	Concept: nostalgia	122
5.4	Concepts relating to consumer behaviour	122

Figures

4.1	Explanatory matrix	80
4.2	Parental coping strategies and bed wetting	84
4.3	Hypothetical case: mistakes at work	85
5.1	Theory building through the research process	115
5.2	Conceptual identification and grouping	125
