Preface	ix
Acknowledgments	xv
Contributors	xvii
1 Introduction	1
1.1 The Objective of the Book	1
1.2 The Context	2
1.3 The SCOPES Project	3
1.4 The Motivations	3
1.5 The Scenario	4
1.6 The Definition and Development Method	5
1.7 The CAD Method for Industrial Assembly	8
1.8 Organisation of the Book	9
2 The CAD Method for Industrial Assembly and Concurrent Engineering	13
2.1 Introduction	13
2.2 Concurrent Engineering	13
2.3 Tools for Concurrent Engineering	16
2.4 An Integrated CAD Method for Concurrent Engineering	18
2.5 Conclusions	24
2.6 Bibliography	25
2.7 References	25
3 Proposed Architecture for the New CAD Method	27
3.1 Introduction	27
3.2 The Three Main Flows of a Productive System	29
3.3 The Levels of Reality in the Design Flow	37
3.4 The Ideal and Chosen Architecture for a CAD Method	44
3.5 Conclusions	48
3.6 References	49

4	Product Design for Assembly	51
4.1	Introduction	51
4.2	Users' Needs	53
4.3	State of the Art	55
4.4	Functionalities and Methodology	57
4.5	Conclusions	92
4.6	Bibliography	92
4.7	References	93
5	Assembly Planning	95
5.1	Introduction	95
5.2	Users' Needs	95
5.3	State of the Art	97
5.4	Functionalities and Methodology	101
5.5	Conclusions	125
5.6	Bibliography	125
5.7	References	126
6	Resource Planning	129
6.1	Introduction	129
6.2	Users' Needs	132
6.3	State of the Art	133
6.4	Functionalities and Methodology	136
6.5	Conclusions	158
6.6	References	158
7	The Simulation Module	161
7.1	Introduction	161
7.2	Users' Needs	163
7.3	State of the Art	166
7.4	Functionalities and Methodology	168
7.5	Conclusions	187
7.6	References	188
8	The Scheduling Module	189
8.1	Introduction	189
8.2	State of the Art	190
8.3	Users' Needs	191
8.4	Functionalities and Methodology	193
8.5	Conclusions	212
8.6	References	214

9	The Flow Control Module	215
9.1	Introduction	215
9.2	Users' Needs	218
9.3	State of the Art	219
9.4	Functionalities and Methodology	221
9.5	Conclusions	235
10	Integration Aspects of the CAD Method	237
10.1	Introduction	237
10.2	Integrated Product Development Process	238
10.3	Product Data Integration	240
10.4	Man–Machine Interface	250
10.5	The Man–Machine Interface in CATIA	253
10.6	Conclusions	262
10.7	Bibliography	262
11	Introducing the Integrated CAD Method into Companies	263
11.1	Introduction	263
11.2	Organisation Impact	264
11.3	Implementation	266
11.4	Conclusions	269
11.5	Bibliography	269
11.6	Reference	270
12	Conclusions	271
	Index	275
