Preface and Acknowledgements	xi
Chapter 1 Introduction	1
Innovation and you	1
What this book is about	2
The basis of innovation	4
The start of adoption/diffusion research	4
The nature of innovation	6
Assumptions about human nature	7
How this book is organized	7
Chapter 2 Characteristics of social change	9
Why is change important?	10
Is change desirable – or inevitable?	11
Change and alteration	13
What kinds of change are there?	14
Producing change	15
The process of change	16
Basic theories of social change	17
Planned change	19
Aims and objectives	20
Summary	21
Reflection	21
Application	22
Recommended further reading	22
Chapter 3 What is an innovation?	25
The nature of innovation	25
Aspects of innovation	26
Factors related to innovation	27
Forms of innovative process	31
The emergence of innovations	32
The context of innovation	35
Summary	37
Reflection	37
Application	37
Recommended further reading	38

vi Contents

Chapter 4	Who are the innovators?	41
	The range of innovativeness	41
	Adopter classification	42
	Factors influencing innovativeness	47
	Progressiveness in context	50
	Innovator continuums	50
	The progressiveness of individuals in context	51
	Summary	53
	Reflection	53
	Applications	53
	Recommended further reading	54
Chapter 5	The process of adoption	55
	The meaning of adoption	55
	The rationality of adoption	56
	Stages of adoption	57
	The meaning of over-adoption	60
	Technical over-adoption	61
	Non-technical over-adoption	62
	Models of adoption	63
	The importance of feedback	63
	Combination of adoption and communication	65
	Summary	68
	Reflection	68
	Applications	69
	Recommended further reading	69
Chapter 6	The process of diffusion	71
	How diffusion differs from adoption	71
	Dimensions of diffusion	72
	Human interaction	75
	Diffusion and change	78
	Diffusion time-lag	79
	Resistance to innovation	80
	Innovation and Deviance	81
	The influence of cultural norms	81
	Summary	83
	Reflection	83
	Application	83
	Recommended further reading	84
Chapter 7	Human communication	85
	What is communication?	85
	<i>Section A</i>	86
	Essentials of human communication	86
	Elements of communication models	87

	Selective perception of information	93
	Reinforcement of perception	95
	<i>Section B</i>	97
	The essentials of communications	97
	The two-step flow hypothesis	98
	Technologically-mediated communication	100
	Everyday communication technology	101
	Summary	102
	Reflection	102
	Application	102
	Recommended further reading	103
Chapter 8	Change agents	105
	The origins of intervention	105
	The concept of 'the change agent'	106
	The fundamental roles of the change agent	107
	The change agent in operation	110
	The change agent as adult educator	112
	The change agent as social group worker	114
	Summary	115
	Reflection	116
	Application	116
	Recommended further reading	116
Chapter 9	Opinion leaders	119
	The process of innovation	119
	The change agent and the opinion leader	121
	The concept of opinion leadership	123
	Characteristics of opinion leaders	124
	Identifying opinion leaders	126
	The opinion leader in operation	128
	Sociograms in leadership analysis	130
	Summary	131
	Reflection	131
	Applications	131
	Recommended further reading	132
Chapter 10	Innovative ideas	135
	The nature of ideas	135
	Prepayment of mail	137
	Consumer segmentation	139
	Non-custodial treatment of young offenders	140
	Technologically mediated communication	142
	Distance learning	144
	Open access to higher education	145
	Computer literacy	147

viii Contents

Time-share ownership	149
Summary	150
Reflection	150
Application	150
Recommended further reading	150
Chapter 11 Innovative practices	153
The nature of innovative activities	153
The electronic village hall	154
Telecommuting	156
New home working	157
Working at home – anywhere, any time	160
Technological piracy	161
Direct marketing	163
Sociometry in the classroom	165
Summary	167
Reflection	167
Application	167
Recommended further reading	168
Chapter 12 Innovative products	169
Ideas, practices and products	169
The transistor	170
Condensed business books	171
Technological shopping aids	172
Electronic telephone directory	174
The videophone	175
Dyestuffs	177
Automated teller machines	177
Robots	179
Electronic cash register	180
Summary	182
Reflection	182
Application	182
Recommended further reading	182
Chapter 13 Progressiveness in organizations	183
The individual and the organization	184
The benefits of organization	187
Types of organizations	187
Human communication in organizations	188
Individual needs and organizational aims	190
Leadership and training	192
Management by objectives	193
Stages in organizational innovativeness	197
Types of innovation-decisions	197
Human groups and organizations	199

Summary	201
Reflection	202
Applications	202
Recommended further reading	202
Chapter 14 The future	205
Prediction	206
The information explosion	206
Changing leadership patterns	208
The factory of the future	209
The office of the future	210
The home of the future	211
Life and society in the future	213
The (post?) post-information society	215
Summary	218
Reflection	219
Application	219
Recommended further reading	220
Appendix	221
Notes on exercises in the text	221
The purpose of the 'applications'	221
Chapter 2 Characteristics of social change	222
Chapter 3 Consumer inertia	223
Chapter 4 a) Cautious venturesomeness	224
b) Individual and community	224
Chapter 5 a) Individual adoption model	225
b) The Hanoi problem	226
Chapter 6 The Tupperware party syndrome	226
Chapter 7 a) Changing office working conditions	228
b) Committee stereotypes	228
Chapter 8 Change agents	229
Chapter 9 a) Group leadership	230
b) Relative personal influence	231
Chapter 10 Innovative factors	232
Chapter 11 A technical services problem	233
Chapter 12 The French Teletel system	234
Chapter 13 a) Organizational gatekeepers	234
b) Power/authority involvement	235
Chapter 14 Science fiction	236
Recommended further reading	236
Postscript	236
Bibliography	239
Index	245
