CONTENTS

Acknowledgments v

Series Editor's Introduction vii

1. Introduction 1
The Challenge of Multivariate Data:
An Example 1
The Concept of a Data Space 4
Conclusions 8

2. Multiple-Code Plotting Symbols in Scatterplots 10
Incorporating a Categorical Variable 11
Incorporating Several Quantitative Variables 13
Conclusions 15

3. Profile Plots 17
Histogram Plots 17
Profile or Polygon Plots 19
Star Plots 22
Conclusions 25

4. Three-Dimensional Plots for Trivariate Data 27
Three-Dimensional Scatterplots 28
Bubble Plots 33
Conclusions 37

5. The Scatterplot Matrix 38
Features of the Scatterplot Matrix 39
Variations of the Scatterplot Matrix 43
Using and Interpreting the Scatterplot Matrix 48
Conclusions 52

6. Conditioning Plots 53
Basic Features and Definitions 53
The Casement Display 54

Conditioning on Values of a Continuous Variable 58
The Coplot Display 60
The Trellis Display Strategy 63
Plots With Several Conditioning Variables 65
General Principles for Conditioning Plots 70
Conclusions 72

7. The Biplot 73
Construction of a Biplot 73
Biplot Approximation of the Data 75
Interpreting the Contents of the Biplot 77
Example of a Biplot 77
Variations of the Basic Biplot 81
Conclusions 85

8. Conclusions 85

Appendix: Software Considerations 90
