# CONTENTS

Preface vii

## PART I INTRODUCTION TO RESEARCH DESIGN

1 The Nature of Enquiry 2
2 Beginning the Design Process 27
3 Initial Sources of Invalidity and Confounding 59
4 Basic Designs 87
5 Identifying Populations and Samples 110
6 Additional Sources of Confounding by the Measurement Process and Interactions 140
7 Refining the Designs 157

## PART II MEASUREMENT DESIGN

8 Principles of Measurement and Collecting Factual Data 188
9 Measuring Attitudes, Opinions and Views 215
10 Measuring Achievement 242
11 Evaluating Data Quality: Determining Instrument Reliability and Validity 272

## PART III TURNING DATA INTO INFORMATION USING STATISTICS

12 Descriptive Statistics Using a Spreadsheet 304
13 Probability and Statistical Significance 337
14 Power, Errors and Choosing \( \alpha \) 372
PART IV  EX POST FACTO, EXPERIMENTAL AND QUASI-EXPERIMENTAL DESIGNS: PARAMETRIC TESTS

15  Comparing Two Groups: \( t \)-test  402
16  One-way Analysis of Variance  441
17  Factorial Designs  484
18  Randomized Block Designs and Analysis of Covariance  514

PART V  NONPARAMETRIC TESTS: NOMINAL AND ORDINAL VARIABLES

19  Nonparametric Tests: One and Two Samples  550
20  Nonparametric Tests: Multiple and Related Samples  584

PART VI  DESCRIBING NON-CAUSAL RELATIONSHIPS

21  Correlation and Association  618
22  Regression  659

Postscript  695
Appendices
A  An Introduction to Spreadsheets  699
B  Statistical tables  716
Glossary of Mathematical Symbols, Equations and Excel Functions  731
Bibliography  741
Index  746
