<b>Preface</b>	ix
<b>PART 1 THE PROBLEM</b>	1
<b>1 The information challenge</b>	
1.1 Information as a resource	3
1.2 The information economy	4
1.3 The value of information	6
1.4 Action points for managers	7
1.5 Information management defined	7
1.6 Summary	10
<b>2 A structured approach</b>	
2.1 Introduction	11
2.2 Information management in the business context	11
2.3 Information management in the human context	13
2.4 Information management – the outward view	15
2.5 Information management – the inward view	17
2.6 Information management – the overview	19
2.7 Some definitions	22
2.8 Summary	23
<b>3 Practical problems today</b>	
3.1 Introduction	25
3.2 Business sector 1: Manufacturing	26
3.3 Business sector 2: Retailing	28
3.4 Business sector 3: Finance	30
3.5 Management function: Introduction	32
3.6 Management function 1: Finance	33
3.7 Management function 2: Human resources	35
3.8 Management function 3: Marketing	35
3.9 Management function 4: Planning	36
3.10 Management function 5: Operations	37
3.11 Management function: Integration	38
3.12 Conclusion	38

<b>PART 2 THE TOOLS</b>	43
<b>4 Computers and management information systems</b>	
4.1 Introduction	43
4.2 Electronic information systems	43
4.3 The development of microelectronics	44
4.4 Analogue and digital technology	46
4.5 Computers: Fundamentals	48
4.6 Computer architecture	49
4.7 Computer input	50
4.8 Computer output	52
4.9 Computer storage	54
4.10 Computer software	56
4.11 Application packages	58
4.12 Management Information Systems (MIS)	63
4.13 Conclusion	66
<b>5 Communications, and legal developments</b>	
5.1 Introduction	68
5.2 The communication process	69
5.3 Electrical signals	70
5.4 Transmission systems	72
5.5 Switched communication systems	78
5.6 Two initiatives for the future	82
5.7 The legal and regulatory position	85
5.8 Conclusion	87
<b>6 Current information systems</b>	
6.1 Introduction	88
6.2 Classification of current information systems	88
6.3 Communication services	90
6.4 Communication networks	93
6.5 Value-Added Networks (VANs)	96
6.6 Value-Added Services (VASs)	98
6.7 Private networks	100
6.8 Trends for the future	102
6.9 Conclusion	102
<b>7 The future of information technology</b>	
7.1 Introduction	103
7.2 Fifth Generation Computing Systems (FGCS)	103
7.3 Expert systems	107
7.4 The security of information	110
7.5 Conclusion	116

---

<b>PART 3 THE SOLUTION</b>	117
<b>8 Business systems and information</b>	
8.1 Introduction	119
8.2 Evolution of information systems	119
8.3 Where it started	120
8.4 Key factors	123
8.5 Information systems: Definitions	124
8.6 Information systems: Roles	125
8.7 Information and organizations	127
8.8 The business environment	129
8.9 The systems approach	131
8.10 The nature of information	138
8.11 The use of information	139
8.12 The value of information	140
8.13 What is information for?	145
8.14 The role of information technology	145
8.15 Conclusion	147
<b>9 The design and introduction of information systems</b>	
9.1 Introduction	148
9.2 The information strategy	149
9.3 From problem identification to agreed outline solution	150
9.4 Structuring the project	152
9.5 Conclusion	161
<b>10 Completing the project</b>	
10.1 Introduction	163
10.2 Implementation	163
10.3 Controlling the project	167
10.4 Conclusion	177
<b>11 Practical information systems</b>	
11.1 Introduction	178
11.2 Basic topology of information systems	179
11.3 Network configurations	182
11.5 Basic technology of information systems	183
11.5 Putting it together	190
11.6 Towards the virtual network	190
11.7 Conclusion	191
<b>12 Practical information systems management</b>	
12.1 Introduction	193
12.2 Implementation issues	193
12.3 People issues	197
12.4 System support	201

12.5	System security	202
12.6	Management responsibilities	207
12.7	Conclusion	207
<b>13</b>	<b>Using the information</b>	
13.1	Introduction	209
13.2	What information?	209
13.3	Decision support	210
13.4	Looking at the information	217
13.5	Applying the information	219
13.6	Conclusion	220
<b>14</b>	<b>The future of information systems</b>	
14.1	Introduction	222
14.2	The information organization	222
14.3	Transparent networks	224
14.4	Decision support systems	225
14.5	The universal database	225
14.6	What next?	226
<b>15</b>	<b>Conclusion</b>	227
	<b>Glossary</b>	233
	<b>Bibliography</b>	251
	<b>Index</b>	253
