Introduction xv

- 1 Machines and management 1
 - 2 Advanced Manufacturing Technology 13
 - 3 Human resource management 34
 - 4 Production management systems 48
 - 5 The management of quality 68
 - 6 Corporate objectives and strategy 85
 - 7 Market strategy 97
 - 8 Manufacturing strategy 113
 - 9 Introduction to financial appraisal 127
 - 10 The management process of AMT appraisal 144
 - 11 Barriers, failure and dubious advice – management development for AMT implementation 162
 - 12 Jobs, skills and training 181
 - 13 Project management 197
 - 14 The control of AMT projects 212
 - 15 Case studies in AMT implementation 225
- Index 247

List of figures and cases

Figures

- 1.1 Management of change: basic classification
- 1.2 Management of change: typical AMT process innovations
- 1.3 Management of change: typical production management systems innovations
- 1.4 Management of change: some potential effects of managerial barriers

- 2.1 Systems integration
- 2.2 Management development and systems' buffering

- 3.1 Management of technological change
- 3.2 Single and double loop learning

- 4.1 Scientific stock control: stock/time diagram
- 4.2 Material requirements planning: type I open loop
- 4.3 Material requirements planning: type II closed loop

- 5.1 Quality: a systems view
- 5.2 Economics of quality: classical view
- 5.3 Economics of quality: modern view

- 6.1 Cause and effect relationships

- 7.1 The marketing process
- 7.2 Perceptual map: price and performance of project management software packages

viii List of figures and cases

- 7.3 Product life cycle
- 7.4 Product life cycle: cost, revenue and profit
- 7.5 Product life cycle: management implications
- 7.6 Product life cycle: growth and market share

- 8.1 Development of the strategic role of manufacturing
- 8.2 Manufacturing strategy
- 8.3 Relationships between process forms
- 8.4 Process form and AMT

- 9.1 Present value factors
- 9.2 Net present value calculations with end of period cash flows
- 9.3 Net present value bar chart
- 9.4 Net present value calculations with varied cash flows
- 9.5 Net present value graph
- 9.6 Illustration of effects of variations in timing and amounts of cashflows
- 9.7 Illustration of sensitivity analysis
- 9.8 Net present value calculations with end of period cash flows: comparison of riskfree rate and risk-adjusted rate
- 9.9 Decision tree

- 10.1 Negative and positive circles of investment

- 11.1 Diffusion of AMT innovation
- 11.2 Vicious circle due to lack of management development
- 11.3 Positive circle of management development

- 13.1 Project objectives
- 13.2 A simple activity-on-arrow network
- 13.3 Network diagram
- 13.4 Network diagram with event times analysis
- 13.5 Analysis of table of activities
- 13.6 Styles of project time management
- 13.7 Possible complex inter-relationships of project duration and resources

- 14.1 Bar chart of typical project
- 14.2 Earliest starts
- 14.3 Latest starts
- 14.4 Limits of cumulative cash usage
- 14.5 Basic terminology of project cost control
- 14.6 Project cost control graph
- 14.7 Relationship between cost and schedule performance indices
- 14.8 Project cost report
- 14.9 Project management – cost control
- 14.10 Project management – trends in the cost and schedule performance indices

Cases

Case	Chapter
1 The heat treatment units	10
2 CAD at UMC	10
3 MRP II in a traditional company	10
4 Atlink – a case of mistaken identity	12
5 CAD at UMC (continued)	14
6 The storage carousels	15
7 Problems in machine commissioning	15
8 Buying fine china	15
9 MRP III at Zenon Manufacturing	15
10 The new recruit	15
