

Preface	v
Architectures and Communications	
Migration to OSI in factory communication H. Kreppel, Siemens AG, West Germany	3
Modelling and analysis of enterprise information systems with CIM-OSA F. Vernadat, INRIA-Lorraine, France	16
Multi-media collaborative working in the automotive industry: the role for broadband communications systems S. Joyner, C. Parker, S.E. Powrie and C.E. Siemieniuch, HUSAT Research Centre, UK ..	28
Support for cooperative work in distributed CIM-structures V. Tschammer, U.W. Brandenburg, J. Hall and D. Strick, GMD Fokus Berlin, West Germany	40
Robotics	
Benefits to CIM of robot deburring: the use of modelling and control M. Lahoud, BMT, UK; H. Münch, D. Surdilovic and J. Timm, IPK, West Germany; M. Fraile, ENASA, Spain	53
Robot navigation strategies in a partially known environment using a space-time learning graph D.M. Kumpel, F. Serradilla, Instituto de Automatica Industrial, Spain	65
Vision based online inspection of manufactured parts: comparison of CCD and CAD images E. Hirsch, University Louis Pasteur, France; U. Lübbert, FgH-IITB, West Germany ...	76
The Impact and Industrial Experience of CIM for SMEs	
Strategic initiatives for introducing CIM technologies in Irish SMEs M. Hashmi, Dublin City University and J. Cuddy, EOLAS, Ireland	93
The benefit or the doubt – a strategy for knowledge transfer on ESPRIT-CIM directed at SMEs H. Bolk, M. van Manen, Intervisie, The Netherlands	105
Activity chains: a method for identifying and evaluating key areas of integration in SMEs J. Frick and J.O. Riis, University of Aalborg, Denmark	119
Computer Aided Planning	
CIM-elements for a market oriented production planning and control H. Ulrich, Institute for Operations Research, Switzerland	133
A CIM approach to scheduling and material handling: a case study M. Ribeiro, C. Bispo, C. Pinto Ferreira, J. Sentieiro, L. Carvalho, R. Almeida, CAPS, and J. Nunes Ferreira, UMM, Portugal	140
Dynamic production scheduling S. Ulfby, Noratom A/S, Norway	153
The Impact and Industrial Experience of CIM	
Integrated monitoring and diagnostics in modern automated manufacturing J-M. Le Veaux, PSA-DITA, France; M. Fraile, ENASA/PEGASO, Spain; G. Mazzocchi, Mandelli SpA, Italy	173
An example of a CIM realisation for an electromechanical manufacturing firm G. Ricottilli, R. Guiffrey and A. De Luca, Syntax Factory Automation, Italy	183
Integration and assembly in the Alvey “Design to Product” Demonstrator project P. Fehrenbach, GEC, UK	195
Effects and chains of effects at CIM realizations H.F. Jacobi, Fraunhofer-IPA, West Germany	206

Enabling Technologies – Part I

Flexible assembly cell: an implementation experiment using the Estelle-FDT V. Mazzola, J.P. Courtiat and M. Diaz, LAAS/CNRS, and A.M. Druilhe, J.F. Lenotre and P. Michaud, Marben, France	221
Quality assurance as a dynamical production process guide and control element supported by dedicated knowledge based systems M.-J. Schachter-Radig, D. Wermser, S. Becker, A. Pagel and H. Knödsleder, NTE NeuTech, West Germany	233
Knowledge-based support of quality in design I. With, Computer Resources International A/S, Denmark	245

Methods and Tools for Integrating CIM Elements – Part I

Magic: a new approach to group technology P. Schoonjans, WTCM-CRIF, Belgium	261
CIM system planning toolbox: CIM-Plato R. Bernhardt, V. Katschinski and G. Schreck, IPK Berlin, West Germany	273
CIDAM – modules for the creation of CIM A. Hars, Institut für Wirtschaftsinformatik, West Germany	286

Enabling Technologies – Part II

Object oriented realisation of a CIM-system for shop floor and production monitoring and short term scheduling U. Hertel and W. Frankenheim, Mannesmann Kienzle, West Germany	299
On-line hierarchical model simulation for process fault detection and localisation, an object oriented approach A.J. Billington and A.R. Boucher, Sunderland Polytechnic, UK	310
Achieving flexibility in robot programming by means of expert system technology R. Gallerini and A. Pezzinga, FIAR SpA, Italy	322

Methods and Tools for Integrating CIM Elements – Part II

A knowledge-based approach for designing industry specific production management software I. Tatsiopoulou, N. Mekras and I.A. Papas, NTUA, Greece	337
Computer assisted techniques for the presentation of product design information to the designer L.M.T. Cortez Pereira, Sorefame, and F.J.L. Figueiras, P.J.S.P. Leal and L.L.O. Faria, IST, Portugal	349
Integrated modelling of products and processes using advanced computer technologies A. Meier, Krupp Atlas Datensysteme, West Germany	359
Manufacturing command, communications, control (MC 3) – the intelligent link D. Brankley, SAC Hitec Ltd, UK	372

Human-organisational and Managerial Aspects of CIM

Organisation, people and technology: towards continuing improvements in manufac- turing P. Kidd, Cheshire Henbury Research & Consultancy, UK	387
Human, organisational and managerial aspect of CIM R. Vio, Fiat SpA, Italy	399
Collaborative research – issues, benefits and a rationale for CIM implementation V. Prabhu, D. W. Wainwright, Newcastle Business School, UK	409

CIM Technology in Various Industrial Sectors

KB MUSICA: commercial opportunities via practical demonstration D. Boland, A. Campbell and A.N. Levin, ICI Engineering, UK	423
Improvements on 3D CAD systems for shoe design and modelling V. Branco, C.V. Carvalho and F.N. Ferreira, INESC-Norte, Portugal	438
A vision system for analysis and classification of industrial flames J. Sentieiro, J.P. Costeira, J.A. Victor and J.P. Fernandes, Instituto Superior Técnico; M. Heitor, CTAMFUL-IST, Portugal	448
On-line quality and production control in DIE casting industry L.M. Nazaré, J.C. Caldeira, A.D. Silva, J.P. Baptista, J.B. Gouveia and J.M. Mendonça, INESC-Norte, Portugal	458
