

Table of Contents

	Preface	VII
	Introduction	1
1	Comparing Western and Japanese Industrial Purchasing Linkages	5
1.1	Western Purchasing Linkages	5
1.2	Japanese Purchasing Linkages	7
1.3	The Question	15
2	The Location of the Firm in Theory	17
2.1	Location Theory and Market Area Models; Modelling the Theoretical Relationship between Spatial and Aspatial Microeconomic Behaviour	17
2.2	Evaluating the Empirical Importance of Distance Costs in Industrial Locational Behaviour	25
2.2.1	Information Costs	25
2.2.2	Transport Costs	27
2.2.3	Overview	30
2.3	Conclusions and Directions for the Theoretical Research Agenda	32
	Appendix	36
3	The Logistics-Costs Model	49
3.1	Introduction	49
3.2	The Economic Order Quantity (EOQ)	51
3.3	The Simple Logistics-Distance Model	54
3.4	The Nature of Transport Rates calculated with respect to Real Time Discrete Shipments	59
3.5	The Reformulated Logistics-Costs Model	63
3.6	The Relationship between Value-Added and the Optimum Location of the Firm on a Homogeneous Plane	67

3.7	Generalised Transport Costs and the Role of Space Costs	76
3.7.1	Generalised Transport Costs	76
3.7.2	Space Costs	79
3.8	The Structure of Logistics-Costs with Generalised Transport Costs and Space Costs Endogenous	80
3.9	The Equilibrium Interregional Wage Gradient with Space Costs Endogenous and Generalised Transport Costs	85
3.10	The Location Conclusions of the Logistics-Costs Model	90
3.11	The Empirical Justification of the Logistics-Costs Model	94
3.11.1	The Contribution of Logistics-Costs to Total Industrial Costs	94
3.11.2	The Observed Structure of Transport Costs	96
	Appendices	99
4	The Logistics-Costs Analysis of JIT	135
4.1	The Rationale for Just-In-Time (JIT)	135
4.2	The EOQ Model in a Spatial Context	138
4.3	Modelling the Logistics-Costs Implications of JIT	144
4.3.1	The Effect of a Reduction in Set-Up Costs	146
4.3.2	The Effect of a Reduction in Input Haulage Distance	148
4.3.3	Policies taking account of Multiple Inputs and Outputs	149
4.4	Review and Conclusions	154
	Appendices	156
5	Research Methodology	163
5.1	Introduction	163
5.2	Regional Multiplier Analysis	164
5.3	Inventory Turn Analysis	168
5.3.1	The Effect of Exchange Rates	169
5.3.2	The Effect of Output Changes	172
5.4	Pareto Analysis	172
5.5	Review and Conclusions	176
6	Empirical Research: The Scottish Electronics Industry	179
6.1	Introduction	179
6.2	Background to the Scottish Electronics Industry	179
6.3	Output and Employment Data Sources	183
6.4	Regional Trade Data Sources	186
6.5	Assessment of Industry Performance	190
6.6	Primary Microeconomic Trade Linkage Data	194
6.7	Statistical Methodology: A Linear Logit Analysis	199
6.8	Conclusions	207

7	Conclusions: The Contribution of the Logistics-Costs Model to Theoretical and Empirical Issues in Regional Economics	209
	Appendix	215
	References	217
