

# Contents

## **CHAPTER 1: Overview, 1-1**

Robert J. Schwartz and Clifford W. Smith, Jr.

### **Part I**

#### **Theoretical Foundation: The Instruments**

## **CHAPTER 2: The Evolution of Risk Management Products, 2-1**

S. Waite Rawls III and Charles W. Smithson

The world became a more risky place, 2-4

*Foreign exchange rates became more risky, 2-5*

*Interest rates became more risky, 2-8*

*Commodity prices became more risky, 2-11*

*The market provided tools to manage commodity price risk, 2-13*

*Metals, 2-13*

*Petroleum, 2-14*

*Hybrids, 2-14*

*Commercial bank activities, 2-14*

How much is really "new"?, 2-15

Conclusion, 2-16

**CHAPTER 3: A LEGO<sup>™</sup> Approach to Financial Engineering: An Introduction to Forwards, Futures, Swaps and Options\*, 3-1**

Charles W. Smithson

- Forward contracts, 3-5
- Futures contracts, 3-6
- Swap contracts, 3-8
- Option contracts, 3-12
- The LEGOs, 3-19
- Using the LEGOs, 3-20

**CHAPTER 4: Pricing Financial Futures Contracts: An Introduction, 4-1**

Kenneth R. French

- The basic idea, 4-4
  - No costs or benefits of holding the painting, 4-4*
  - Dividends from owning the painting, 4-5*
- Stock index futures, 4-6
  - Nondividend-paying stocks, 4-7*
  - The effect of dividends, 4-8*
- Treasury bill futures, 4-10
- Treasury bond futures, 4-11
- Foreign currency futures, 4-13
- Institutional environment and empirical accuracy, 4-15
- Summary, 4-17

**CHAPTER 5: The Pricing of Currency Options: A Review, 5-1**

Rene M. Stulz

- Type of currency options, terminology, some general results, 5-6
- Extending the Black-Scholes approach to pricing currency options, 5-11
- The performance of the extension of the Black-Scholes approach, 5-16

**CHAPTER 6: The Evolving Market for Swaps, 6-1**Clifford Smith, Jr., Charles W. Smithson and  
Lee Macdonald Wakeman

- Analysis of swap transactions, 6-3
  - The currency swap, 6-4*
  - Swaps as packages of forward contracts, 6-5*
  - Currency coupon swaps, 6-6*
  - Interest rate swaps, 6-6*
  - Basis rate swaps, 6-7*
  - Commodity swaps, 6-7*
  - Swaps with timing mismatches, 6-8*

- Swaps with option-like payoffs*, 6-8
- Development of the swaps market, 6-10
- Why did the swaps market evolve?, 6-10
  - Financial arbitrage*, 6-10
  - Tax and regulatory arbitrage*, 6-11
  - Exposure management*, 6-13
  - Completing markets*, 6-14
- How did the swaps market evolve?, 6-15
- Pricing swaps, 6-17
  - Forward prices*, 6-18
  - Transaction costs*, 6-18
  - Credit risk*, 6-19
  - Pricing restrictions from arbitrage*, 6-20
- The future of the swaps market, 6-21
  - Liability of the intermediary*, 6-22
  - Secondary market*, 6-22
  - Regulation*, 6-23

## **CHAPTER 7: Fundamental Models for Pricing Swaps, 7-1**

### **Rod A. Beckstrom**

- The basic model, 7-4
- NPV pricing theory and its assumptions, 7-6
  - One master swap yield curve per currency*, 7-6
- U.S. dollar LIBOR as the common denominator, 7-7
  - Forward foreign exchange market linkages*, 7-9
  - Summary of swap pricing market mechanics*, 7-9
- Determining the master yield curves, 7-10
  - Par swap curves*, 7-10
  - How the YTM curve is related to the master swap zero curve*, 7-10
  - Blended curves*, 7-11
  - Cash markets*, 7-12
  - Futures strips*, 7-12
  - Calculating zero strip curves from par rates*, 7-13
  - Yield curve interpolations*, 7-13
- Calculating NPVs of cash flows, 7-14
  - Pricing fixed rate cash flows*, 7-14
  - Compound basis (for YTM's and zeros)*, 7-14
  - Simple interest basis (for cash market instruments)*, 7-14
  - Evaluating floating cash flows*, 7-14
  - Forecast float revaluation methodology*, 7-15
- Examples: Pricing different swaps, 7-17
  - Example 1. Interest rate swap: Fixed to floating in U.S. dollars*, 7-19
  - Example 2. Currency swap fixed U.S. dollars to fixed Japanese yen*, 7-20
  - Example 3. Currency swap fixed Japanese yen to floating U.S. dollars*, 7-21
- Pricing counterparty credit risk, 7-21
- Summary, 7-26

## **Part II**

### **Interest Rate Risk Exposure Management**

#### **CHAPTER 8: The Market for Interest Rate Swaps, 8-1**

Clifford W. Smith, Jr., Charles W. Smithson and Lee Macdonald Wakeman

- Analysis of an interest rate swap, 8-4
  - An interest rate swap as a portfolio of loans, 8-4*
  - The impact of interest rate changes on swap value, 8-6*
  - An interest rate swap as a portfolio of forward contracts, 8-7*
- Swaps and default risk, 8-8
  - Default risk of swaps versus loans, 8-8*
  - Default risk in forwards, futures and swaps, 8-9*
  - Distributing contract value, 8-10*
  - Trading the contracts, 8-11*
  - Performance bonds, 8-12*
  - Other determinants of default risk for interest rate swaps, 8-13*
  - The use of the swap, 8-13*
  - Term structure, 8-13*
- The rationale for interest-rate swaps, 8-14
  - Financial arbitrage, 8-14*
  - Comparative advantage, 8-15*
  - Underpriced credit risk, 8-15*
  - Differential prepayment options, 8-16*
  - Liquidity, 8-17*
  - Exposure management, 8-17*
  - Synthetic instruments, 8-18*
- Conclusions, 8-19

#### **CHAPTER 9: The Canadian Swap Market, 9-1**

Suresh Bhalla

- Interest rate swaps, 9-5
  - Evolution of the market, 9-5*
  - Growth of the market, 9-6*
  - Characteristics and dynamics, 9-7*
  - Basic features of Canadian dollar swaps, 9-9*
  - Market participants, 9-9*
    - Crown corporations and provinces, 9-9*
    - Financial institutions, 9-10*
    - EuroCanadian bond issuers, 9-10*
    - Corporate borrowers, 9-10*
- Currency swaps, 9-10
  - Some typical Canadian dollar swap transactions, 9-12*
  - Foreign currency private placements, 9-12*
  - Historic foreign currency borrowings, 9-13*
  - Options, 9-14*
  - Interbank Canadian dollar deposits, 9-15*
  - Amortizing/leasing/delayed/cash-flow swaps, 9-15*

**CHAPTER 10: Interest Rate Risk Management in Australian Dollars, 10-1**

David Croft

- Main sources of funds, 10-4
- Development of hedging instruments, 10-4
- Bank bill futures contract, 10-5
- The treasury bond futures contract, 10-6
- The interest rate swap market, 10-6
  - Basic features of A\$ IRCAs, 10-7*
  - Market volumes of A\$ IRCAs, 10-8*
  - Documentation, 10-9*
  - Market participants, 10-10*
    - Semigovernment authorities, 10-10*
    - Banks, 10-11*
    - Eurobond issuers, 10-11*
    - Australian corporations, 10-12*
- Arbitrages within the market, 10-12
- Options on interest rate sensitive instruments, 10-13
  - Exchange traded options, 10-13*
  - Over-the-counter options, 10-14*
  - Options on swaps, 10-14*
- Appendix 10.1: A\$ instruments indicated volumes and liquidity, 10-16
- Appendix 10.2: Price volatilities, 10-17
- Appendix 10.3: Bank bill futures contract specifications, 10-18
- Appendix 10.4: Ten-year treasury bond futures contract specification, 10-20
- Appendix 10.5: A\$ interest and inflation rates, 10-21

**CHAPTER 11: Option-Based Risk Management Tools, 11-1**

Lee Macdonald Wakeman

- Basic product description, 11-5
- Pricing of caps, 11-8
- Combinations and adaptations of caps and floors, 11-12
- Interest rate risk management analysis, 11-18

**CHAPTER 12: Swaptions: Tailoring Interest Rate Swaps, 12-1**

Brian John Crowe

- Evolution of the instrument, 12-6
- Potential applications of swaptions, 12-8
  - Issuers selling swaptions to reduce funding costs, 12-8*
  - Mortgage lenders buying swaptions to cover embedded options risk, 12-9*
  - Issuers buying swaptions when preparing to issue debt, 12-11*
  - Investors using swaptions to manage portfolio duration, 12-11*
  - Investors selling swaptions to enhance their portfolio yield, 12-13*
  - Asset liability managers using swaptions to manage rate and volatility, 12-13*

- Practical considerations, 12-15
  - Credit issues*, 12-15
  - Legal issues*, 12-15
  - Tax issues*, 12-15
  - Accounting issues*, 12-16
- Risk management systems issues, 12-17

## **Part III**

### **Currency Exposure Management**

#### **CHAPTER 13: The Forward Foreign Exchange Market: An Alternative for Hedging Currency Risks, 13-1**

George Handjinicolaou

- The origin of the long-dated forward exchange markets, 13-5
- Conceptual foundations: The interest rate parity, 13-7
  - The one-period interest rate parity*, 13-7
  - The multiperiod interest rate parity*, 13-11
  - Determining long-dated forwards assuming no reinvestment risk*, 13-12
  - The general case*, 13-15
- A practical way of determining long-dated forward exchange rates*, 13-18
  - Calculating the zero-coupon rates*, 13-18
  - Calculating forward interest rates*, 13-20
  - Calculating long-dated forward exchange rates*, 13-22
- The long-dated forward exchange market, 13-24
  - Participants*, 13-25
  - Volume*, 13-26
  - Market conventions*, 13-27
- Long-dated forwards as an alternative tool for hedging currency risk, 13-29
  - Alternative ways of hedging foreign exchange rate risk*, 13-29
  - Hedging with long-dated forward exchange contracts: An example*, 13-31
  - Currency swaps: Vis-à-vis long-dated forwards*, 13-33
    - Cash flow structure*, 13-34
    - Fees*, 13-35
    - Market structure*, 13-35
    - Pricing*, 13-36
  - Sources of arbitrage opportunities*, 13-36
- Summary and conclusion, 13-38

#### **CHAPTER 14: Swiss Franc Currency Swaps, 14-1**

Adrian Ryser and Thomas C. Wilson

- Swiss franc swap market overview, 14-4
  - Market volume*, 14-4

- Swaps in connection with primary market transactions*, 14-5
- Swaps in connection with hedging of existing Swiss franc liabilities*, 14-7
- Asset swaps in connection with Swiss franc or foreign currency denominated bonds*, 14-7
- Swaps to manage a Swiss franc bond or swap portfolio*, 14-10
- Market participants*, 14-10
- Characteristics of the market*, 14-12
- Regulations and accounting*, 14-13
- Swiss National Bank*, 14-13
- Swiss capital requirements*, 14-13
- Example: Calculation of capital requirements*, 14-14
- Accounting*, 14-15
- Swiss franc capital market and foreign borrowers: "Swap windows"*, 14-15
- A cure for missing markets*, 14-20
  - Example 1. Long-dated forward exchange agreement*, 14-21
  - Example 2. A bond future*, 14-22
  - Example 3. Zero coupon bonds, annuities, amortized schedules and other arbitrary portfolios of known cash flows*, 14-23
- Summary*, 14-23

## **CHAPTER 15: Cross-Currency Products in Australian Dollars**, 15-1

David Croft

- Australian dollars currency swaps*, 15-4
  - Withholding tax*, 15-4
  - Investor preferences*, 15-4
  - Credit arbitrage*, 15-5
  - Domestic institutions*, 15-5
  - Tax differentials*, 15-5
- Types of cross-currency swaps*, 15-6
  - Technicalities*, 15-7
    - Bank bill rate*, 15-7
    - Fixed rate in the domestic market*, 15-7
    - Zero coupon swaps*, 15-8
    - Translating US\$ spreads*, 15-8

## **CHAPTER 16: Notes on Foreign Exchange Market Efficiency**, 16-1

Lokhi Banerji

- Developments in the forex markets 1979–1989*, 16-3
- Efficiency, equilibrium and expectations*, 16-5
- Conclusion*, 16-11

## **Part IV**

### **Commodity Price Exposure Management**

#### **CHAPTER 17: Commodity Price Hedging: An Application of the Building Block Approach, 17-1**

Stefan Eckl, Michael J. Hampton and J. Nicholas Robinson

- Borrowing on gold, 17-3
- Oil hedges, 17-4
- Swap versus future, 17-6
- Multiple exposures, 17-7

## **Part V**

### **Special Topics in Exposure Management**

#### **CHAPTER 18: Practical Topics in Corporate Risk Management, 18-1**

James C. F. MeVay

- The Corporate enterprise, 18-5
- Identification of exposures, 18-8
- Exposure measurement and reporting, 18-11
- Decision-making approaches, 18-16
- Relative valuation, 18-21
- Performance evaluation, 18-23
- Integrating risk management with financing strategy, 18-24

#### **CHAPTER 19: Five Reasons Why Companies Should Manage Risk, 19-1**

Clifford W. Smith, Jr., Charles W. Smithson and D. Sykes Wilford

- The world has become a riskier place, 19-3
- By managing risk a company can reduce expected taxes, 19-6
- Hedging can reduce potential costs of financial distress, 19-10
- Hedging can increase debt capacity, 19-11
- Managing risk can reduce a firm's borrowing costs, 19-14

#### **CHAPTER 20: Ongoing Management of Transactions, 20-1**

Tanya Styblo Beder

- Introduction of new capital market products, 20-4
- Changes in transaction elements, 20-6
- Changes in rate outlook and/or risk philosophy, 20-7
- Conclusion, 20-11

**CHAPTER 21: Risk-Controlled Arbitrage, 21-1**

Arnold Shapiro, C. Brian Egnatz and Joseph Elmasri

- Background, 21-4
- Basic concept, 21-5
- Performance measures, 21-8
- Hedge selection, 21-10
- Liability selection, 21-12
- Asset selection, 21-12
- Current environment, 21-14
- Summary, 21-16
- Appendix 22.1: Fixed and adjustable rate mortgage-backed securities, 21-17
- Appendix 22.2: Stripped mortgage-backed securities, 21-19

**CHAPTER 22: A Senior Officer's View on Credit Issues, 22-1**

Thomas E. Francois

- The nature of credit exposure, 22-4
- Salient components of credit risk on a product by product basis, 22-6
  - Future rate agreements, 22-6*
  - Interest rate swaps, 22-7*
  - Interest rate options, 22-9*
  - FX forwards, 22-10*
  - Currency swaps, 22-11*
- Controlling counterparty exposure, 22-12
  - An active or passive approach?, 22-15*
  - Should one look at the forest or count the trees?, 22-16*
  - Further complications and refinements: A portfolio simulation approach, 22-17*
- Documentation techniques to reduce credit exposure, 22-19
- Dealing with netting from a control perspective, 22-21
- But where is the documentation?, 22-21
- Conclusions, 22-22
- Appendix: A simulation approach, 22-24

**CHAPTER 23: Understanding Swap Credit Risk:****The Simulation Approach, 23-1**

Mark Ferron and George Handjinicolaou

- The nature of the swap credit risk, 23-4
- Alternative approaches in measuring swap credit risk, 23-6
  - The worst-case scenario approach, 23-7*
  - The historical experience approach, 23-7*
  - The options approach, 23-8*
  - The simulated experience approach, 23-8*
- The Monte Carlo simulation technique, 23-9
  - The lognormal distribution, 23-9*
  - The properties of the model, 23-10*
  - Volatility and the "diffusion effect", 23-10*

- Applying the Monte Carlo approach in the evaluation of swap credit risk, 23-12
  - Observations on the Monte Carlo technique*, 23-13
  - The choice of the volatility level*, 23-13
  - The impact of the default assumptions*, 23-14
  - The combined effect of the amortization and diffusion effects*, 23-15
- Results for interest rate swaps, 23-16
  - Par interest rate swaps*, 23-16
  - Non-par interest rate swaps*, 23-18
- Further considerations and clarifications, 23-21
  - Sensitivity to the underlying parameters*, 23-21
  - Credit risk formula for par interest rate swaps*, 23-22
  - Credit risk formula for non-par swaps*, 23-23
- Summary and conclusions, 23-24

## **CHAPTER 24: Swaps at Transamerica: Analysis and applications, 24-1**

Bruce Lange and Robert J. Einzig

- Transamerica's background in use of swaps, 24-4
- The cost advantages of swaps and their risks, 24-6
  - Basis risk*, 24-7
  - Counterparty credit risk*, 24-9
  - Liquidity risk*, 24-9
- Adjusting to risk, 24-9
  - Summary of savings in cost*, 24-12
- Transaction speed, 24-15
  - Termination of existing agreements*, 24-16
- Flexibility, 24-17
  - Separation of credit risk from rate risk*, 24-17
  - Maintenance of asset liquidity while enhancing investment returns*, 24-18
  - Rate protection for nondebt instruments*, 24-18
- Financial engineering using swaps, 24-26
  - Spreadlock*, 24-21
  - Forward swap*, 24-21
- Conclusion, 24-25

## **Part VI**

### **Economics of the Business**

## **CHAPTER 25: Measuring the Risk Adjusted Profitability of Derivative Products on Bank Capital, 25-1**

Jon Moynihan

- Profitability measurement is key, 25-4
  - Making appropriate strategy decisions*, 25-4
  - Accurate profitability measurement needed as the life cycle progresses*, 25-5
  - Profitability measurement of swaps is key to pricing*, 25-6

*The most valid profitability measure is ROE, since it ties directly to shareholder value, 25-7*

Use a mark-to-market methodology in measuring ROE, 25-9

ROE measurement needs to be risk adjusted if it is to be valid, 25-11

*Capital risk, 25-12*

*Credit risk, 25-12*

*Interest rate risk, 25-14*

*A final point on risk, 25-16*

Effective measurement gives profitability a strong competitive advantage, 25-16

Summary, 25-19

## **Part VII**

### **Tax Considerations**

#### **CHAPTER 26: Tax Considerations in the United States, 26-1**

Frank V. Battle, Jr., Michael L. Schultz and Gerard A. Mangieri

Interest rate swaps: Income tax treatment of payor, 26-3

*Timing, 26-3*

*Initial payment, 26-3*

*Periodic payments, 26-4*

*Payments upon contract transfer or termination, 26-4*

*Character, 26-5*

*Source, 26-7*

*Withholding, 26-7*

Income tax treatment of recipient, 26-8

*Timing, 26-8*

*Initial payment, 26-8*

*Periodic payments, 26-9*

*Payments upon contract transfer or termination, 26-9*

*Character, 26-9*

*Source, 26-10*

*Withholding, 26-11*

Other taxes, 26-11

Currency swaps: Income tax treatment of payor, 26-11

*Timing, 26-11*

*Initial payment, 26-11*

*Periodic payments, 26-13*

*Payments upon contract transfer or termination, 26-14*

*Character, 26-15*

*Source, 26-16*

*Withholding, 26-16*

Income tax treatment of recipient, 26-17

*Timing, 26-17*

*Initial payment, 26-17*

*Periodic payments, 26-17*

*Payments upon contract transfer or termination, 26-18*

*Character, 26-18*

*Source, 26-18*

*Withholding, 26-18*

Other taxes, 26-18

- Interest rate risk, 31-13
- Various hedging methods, 31-15
  - Swaps, 31-16
  - Options, 31-17
  - Borrowing and investing, 31-18
  - Sale of revenue, 31-18

## **CHAPTER 32: Accounting for Currency and Interest Rate Risk in the United Kingdom, 32-1**

Simon Peerless

- SSAP 20: Foreign currency translation, 32-4
  - Stage 1: Individual company, 32-4
  - Stage 2: Consolidated accounts, including foreign branches, 32-6
  - Disclosure, 32-7
- Accounting for off-balance sheet foreign currency interest rate instruments, 32-7
  - Accounting for trading positions, 32-8
  - Accounting for hedges, 32-9
- Hedge accounting for specific hedging instruments, 32-9
  - Forward foreign exchange contracts, 32-9
  - Currency futures, 32-10
  - Currency swaps, 32-10
  - Currency options, 32-11
  - Interest rate futures, 32-11
  - Interest rate swaps, 32-12
  - Interest rate options, 32-12
  - Disclosure, 32-12

## **Part IX**

### **Legal Considerations**

## **CHAPTER 33: Legal Aspects of Swap Agreements: An Introduction, 33-1**

Anthony C. Gooch and Albert S. Pergam

- Creation and documentation of the swap agreement, 33-3
  - Enforceability of oral agreements, 33-3
  - "Master" agreements, 33-4
  - Standardization efforts, 33-4
- Authorization issues, 33-5
- Enforceability issues, 33-6
- Failures of performance, termination, damages, bankruptcy and insolvency, 33-6
- Secondary market issues, 33-7

**CHAPTER 34: United States and New York Law, 34-1**  
Anthony C. Gooch and Albert S. Pergam

- Creation and documentation of the swap agreement, 34-3
  - Enforceability of oral agreements, 34-3*
  - "Master" agreements, 34-6*
  - Standardization efforts, 34-7*
- Authorization issues, 34-8
  - Dealers and end users generally, 34-8*
  - Swaps with counterparties in regulated industries, 34-9*
  - Swaps with public-sector entities, 34-9*
- Enforceability issues, 34-9
- Failures of performance: Termination, damages, bankruptcy and insolvency, 34-10
  - Termination, 34-10*
  - Measures of damages, 34-10*
  - Bankruptcy and insolvency, 34-13*
    - Effect on termination rights, 34-13*
    - Management as a going concern by a conservator, 34-15*
  - Purchase and assumption transactions, 34-16*
  - Liquidation, 34-16*
  - Written agreement requirements, 34-17*
- Secondary market issues, 34-18

**CHAPTER 35: English Law and Swaps, 35-1**  
J. Trevor Brown

- Oral agreements—Statute of frauds, 35-4
  - Master agreements, 35-6*
  - ISDA forms 35-6*
    - The ISDA code, 35-6*
    - The ISDA interest rate swap agreement, 35-6*
    - The ISDA standard form interest and currency exchange agreement, 35-7*
- Authorization issues, 35-7
  - Companies, 35-7*
  - Local authorities, 35-8*
  - Building societies, 35-11*
- Enforceability issues, 35-13
  - Currency swaps: Monetary obligations?, 35-13*
  - Wagering contracts, 35-20*
- Failures of performance: Termination, damages, 35-23
  - Early termination clause, 35-23*
  - Validity, 35-23*
- Bankruptcy and insolvency issues, 35-24
  - Company voluntary arrangements, 35-25*
  - Administration, 35-25*
  - Receivership, 35-25*
  - Voluntary winding up as a result of a decision of the shareholders (Sections 84 to 116), 35-25*

- Liquidation as a result of a decision of the court (Sections 117 to 162), 35-26*
- Special provisions relating to companies subject to administration and liquidation, 35-26*
- Secondary market issues, 35-28

## **CHAPTER 36: Legal Aspects of Currency and Interest Rate Swaps: Japan, 36-1**

Masayuki Yoshida

- Creation and documentation of the swap agreement, 36-4
  - Enforceability of oral agreements, 36-4*
  - Standardization efforts, 36-5*
  - Master agreements, 36-5*
    - Setoff, 36-6*
- Foreign exchange and bank regulations, 36-6
- Authorization issues, 36-7
  - Swaps with specific categories of Japanese parties, 36-8*
    - Partnerships, 36-8*
    - Trusts, 36-8*
    - Regulated and public companies, 36-8*
- Failures of performance: Termination, damages and bankruptcy, 36-8
  - Termination, 36-8*
  - Measure of damages, 36-8*
  - Bankruptcy, 36-8*
- Gambling laws, 36-9
- Governing law, 36-9
- Secondary market issues, 36-9

## **Part X Regulatory Issues**

### **CHAPTER 37: Regulation of Swaps in the United States, 37-1**

William P. Rogers, Jr.

- Bank capital adequacy guidelines, 37-3
  - Overview, 37-4*
    - Collateral and guarantees, 37-4*
  - Swaps and foreign exchange contracts, 37-6*
    - Risk weights, 37-6*
    - Basic calculation, 37-8*
    - Mark-to-market values, 37-8*
    - Potential future credit exposure values, 37-8*
    - Risk weights, 37-8*
    - Netting, 37-8*
    - Future developments, 37-9*
- Federal Home Loan Bank swap guidelines, 37-10
- Securities regulation, 37-10
- Commodities regulation, 37-11
  - Safe harbor, 37-12*

- Insurance regulation, 37-13
  - No-action interpretation for interest rate caps*, 37-13
  - Financial guaranty insurance*, 37-14
- Proposed regulatory accounting standards, 37-15
