

Table of Contents

<i>Chapter 1.</i> Executive Summary	9
<i>Chapter 2.</i> Introduction	13
<i>Chapter 3.</i> Context	15
3.1. Demand for water.....	15
3.2. Environmental effects of water use.....	23
3.3. Links to sustainable development.....	26
<i>Chapter 4.</i> Recent Institutional Developments	31
4.1. Evolution at the international level.....	31
4.2. Evolution at the national level.....	34
<i>Chapter 5.</i> Public Water Supply	43
5.1. Tariff structures.....	43
5.2. Tariff levels.....	76
<i>Chapter 6.</i> Direct Abstractions	93
6.1. Sources of industrial water.....	93
6.2. Abstraction charges.....	97
<i>Chapter 7.</i> Sewerage and Sewage Disposal	101
7.1. Domestic sewerage and sewage treatment.....	101
7.2. Industrial sewage services provided by the public system.....	105
7.3. Trade effluent charges.....	108
7.4. Direct discharges.....	110
<i>Chapter 8.</i> Subsidies	115
8.1. Subsidies to household water supply.....	117
8.2. Subsidies to industrial water supply.....	119
8.3. Subsidies to irrigation water supply.....	120
8.4. Subsidies to sewerage and sewage disposal.....	124
8.5. Cross-subsidies.....	127

Chapter 9. Effects of Water Pricing on Demand	12
9.1. Effects of price changes on household water demand.....	13
9.2. Effects of price changes on industrial water demand.....	13
9.3. Effects of price changes on agricultural water demand.....	13
Chapter 10. Social Tariffs and Affordability	13
10.1. Access to public water supply.....	13
10.2. Tariff-based solutions to affordability problems.....	14
10.3. Target group solutions to affordability problems.....	14
10.4. Measures of aggregate affordability.....	14
Chapter 11. Conclusions	15
11.1. Context and institutional change.....	15
11.2. Public water supply systems.....	15
11.3. Abstractions.....	15
11.4. Sewerage and sewage disposal.....	15
11.5. Subsidies.....	15
11.6. Effects of pricing on water demand.....	15
11.7. Social objectives.....	15
Notes.....	16
Annex. Full Cost Recovery	16
References.....	16

List of Boxes

1. Defining Industrial Water Use.....	27
2. European Union Framework Water Directive.....	28
3. River Basin Management Institutions.....	29
4. The Strategic Water Reform Framework in Australia.....	30
5. Water Privatisation in the UK.....	31
6. Domestic Metering in Christchurch, New Zealand.....	4
7. Metering of Apartments in Copenhagen.....	4
8. Domestic Water Tariffs in Zurich, Switzerland.....	5
9. Household Water Tariffs in Barcelona, Spain.....	5
10. Efficiency Without Incentive-based Pricing.....	6
11. Tariff Levels in Denmark.....	7
12. Complex Wastewater Systems Can Lead to Problems.....	8
13. Subsidies and Expanding Irrigation Systems.....	10
14. Price Effects on Time-of-day and Seasonal Demands in England.....	12
15. Los Angeles Tariff Reform in the Early 1990s.....	13

List of Tables

Estimates of Per Capita Household Water Consumption	19
Types of Industrial Water Use, Excluding Power Production	22
Irrigation Areas and Agricultural Water Abstractions in Selected OECD Countries.....	23
Summary of Existing Institutional Arrangements in OECD Countries	37
Metering Penetration in Single-family Houses and Apartments Connected to the PWS	46
Public Water Supply: Household Tariff Structures	53
Fixed Elements of PWS Tariff Structures for Households.....	55
Piped Water Services: Domestic Tariff Structures in Canada (1986-96)	56
Zurich PWS Usage and Estimates for Switzerland (1970-1997)	58
Price Structure for Industrial Water Services From the Public System.....	64
Agricultural Water Pricing Structures in Selected OECD Countries	69
Taxes and Levies in Household Water Tariffs	77
Household Tariffs: Levels and Recent Trends	79
Industrial Water Price Level Variations.....	83
Agricultural Water Price Ranges and Characteristics in Selected OECD Countries	85
Charges for Industrial Water Abstraction.....	98
Wastewater Tariff Details for Households	102
Taxes and Levies in Household Wastewater Tariffs	104
Price Structure for Industrial Sewage Services from the Public System.....	107
Trade Effluent Charges	109
Discharge Charges	112
Effects of "Full Cost Recovery" on Household Incomes in Selected OECD Countries	119
Estimated Water Savings Due to Metering and Charging by Volume	131
Impacts of Metering Individual Apartments	132
Consumption Effects from Tariff Structure Changes	133
Price Elasticities for Public Water Supply.....	134
Estimated Average Metering Effects by Season in UK Metering Trials.....	136
Cross-sectional Price Elasticity Estimates for Irrigation Demands	137
Household Metered Charges in Anglian Water (1998-99)	145
Variation in Block-size: Luxembourg Commune (1996-97).....	146
Volumetric Rate, Depending on the Number of Children: Luxembourg Commune (1996-97)	146
Measures of Overall (Average) Affordability of Water Charges	150
Household Tariff Structures Categorized by Strength of the "Conservation Signal" (Late 1990s)	156
Cost and Revenue Classification for "Full Cost Recovery" Measurement.....	163

List of Figures

Annual <i>per capita</i> Abstractions of Freshwater Resources in OECD Countries (Mid-1990s).....	16
---	----

2. Total Water Abstractions by Sector in Selected OECD Countries
3. Freshwater Abstractions in Selected OECD Countries
4. Public Supply vs. Direct Abstractions for Industrial Water
in Selected OECD Countries
5. Physical Sources of Industrial Water in Selected OECD Countries
6. Access to Public Water Supply and Sewage Treatment Facilities
in Selected OECD Countries
