Preface	xiii
Overview	1
1 Basic concepts of game theory	6
1.1 Introduction	6
1.2 The application of games to labour economics	6
1.3 Strategic games	9
1.4 Extensive games	13
1.5 Repeated games	16
1.6 Bargaining with alternating offers	17
1.7 Asymmetric bargaining with alternating offers	20
1.8 Conclusions	23
Appendix 1a. The proof of proposition 1.1	24
2 Collective bargaining without investment	27
2.1 Introduction	27
2.2 The agents	28
2.3 The use of two-part wages	32
2.4 Hidden profits	34
2.5 The right-to-manage model	37
2.6 The case of many unions	41
2.7 Conclusions	47
Appendix 2a. The proof of relations (2.13)	48
Appendix 2b. The proof of proposition 2.2	49
Appendix 2c. The proof of functions (2.31)	50
Appendix 2d. The proof of proposition 2.5	50
3 The use of corrective taxes and subsidies	53
3.1 Introduction	53
	vii

3.2	The structure of the economy	55
3.3	The private agents	59
3.4	Exogenous wages	61
3.5	Endogenous wages	63
3.6	Public policy	65
3.7	Profit-sharing	67
3.8	Conclusions	69
	Appendix 3a. The proof of function (3.17)	70
	Appendix 3b. The proof of result (3.29)	72
	Appendix 3c. The proof of result (3.35)	74
4	Taxation and production efficiency	77
4.1	Introduction	77
4.2	The framework	78
4.3	General equilibrium	79
4.4	Public policy	83
4.5	Wage-setting in the public sector	85
4.6	Private profits	88
4.7	Conclusions	91
	Appendix 4a. The proof of propositions 4.1–4.4	92
	Appendix 4b. The proof of proposition 4.5	95
	Appendix 4c. The proof of proposition 4.8	95
5	Credibility in collective bargaining	97
5.1	Introduction	97
5.2	The model	98
5.3	One-shot bargaining	100
5.4	The formation of reputation	107
5.5	Conclusions	110
	Appendix 5a. The proof of proposition 5.1	112
	Appendix 5b. The proof of proposition 5.2	113
	Appendix 5c. The proof of proposition 5.3	114
	Appendix 5d. The proof of proposition 5.4	115
	Appendix 5e. The proof of proposition 5.5	116
	Appendix 5f. The proof of proposition 5.6	118
6	Monopoly unions and sluggish investment	123
6.1	Introduction	123
6.2	The model	124
6.3	The dynamic game	126
6.4	Credible contracts	127
6.5	Non-credible contracts	129
6.6	The formation of reputation	132

6.7	Conclusions	133
	Appendix 6a. The proof of results (6.12)	134
	Appendix 6b. The proof of proposition 6.1	135
	Appendix 6c. Optimization with autonomous systems	137
	Appendix 6d. The proof of results (6.18)	138
	Appendix 6e. The proof of proposition 6.3	138
	Appendix 6f. The derivation of equations (6.21)	139
7	Ordinary wages versus profit-sharing	141
7.1	Introduction	141
7.2	The model	142
7.3	Collective bargaining	144
7.4	The choice of the regime	147
7.5	Conclusions	151
	Appendix 7a. The proof of proposition 7.1	152
	Appendix 7b. The proof of results (7.24) and (7.25)	155
8	Unions and economic growth	159
8.1	Introduction	159
8.2	The setting	161
8.3	The overall structure of the model	164
8.4	The behaviour of the individual agents	166
8.5	Steady state with given labour inputs	169
8.6	Collective bargaining	171
8.7	Non-unionized workers	174
8.8	Profit-sharing	175
8.9	Welfare evaluation	177
8.10	Conclusions	178
	Appendix 8a. The proof of equation (8.11)	180
	Appendix 8b. The proof of conditions (8.18)	181
	Appendix 8c. The proof of functions (8.25)	183
	Appendix 8d. The proof of functions (8.30) and (8.31)	185
	Appendix 8e. The proof of proposition 8.1	186
	Appendix 8f. The proof of proposition 8.2	195
	Appendix 8g. The proof of proposition 8.3	195
	Appendix 8h. The proof of proposition 8.4	198
9	Unions and international specialization	200
9.1	Introduction	200
9.2	The setting	202
9.3	The overall structure of the model	205
9.4	The behaviour of the individual agents	208
9.5	Balanced growth	211

x	Contents	
9.6	Unionized economy	212
9.7	Non-unionized workers	215
9.8	Profit-sharing	216
9.9	Welfare evaluation	217
9.10	Conclusions	219
	Appendix 9a. The proof of relations (9.24) and (9.25)	220
	Appendix 9b. The proof of proposition 9.1	223
	Appendix 9c. The proof of proposition 9.2	226
	Appendix 9d. The proof of proposition 9.4	227
	References	230
	Index	234

Figures

1.1	The Nash solution of the bargaining problem $\langle S, d \rangle$	page 12
1.2	The proof of proposition 1.2	19
1a.1	The sets \hat{S} and T in the proof	26
2.1	The iso-profit curves $\Pi_0\Pi_0$, $\Pi_1\Pi_1$ and $\Pi_2\Pi_2$ and the labour demand curve DD	30
2.2	The monopoly union outcome	32
2.3	Indifference curves U_0U_0 , U_1U_1 and U_2U_2 , iso-profit curves $\Pi_0\Pi_0$, $\Pi_1\Pi_1$ and $\Pi_2\Pi_2$, the labour demand curve DD , the contract curve CD , and the lowest possible pay per worker b satisfying $u(b) = 0$	39
2.4	The efficient bargaining outcome	40
2.5	The U-shaped employment curve	42
5.1	Employment and the union's relative bargaining power	110
8e.1	The functions (8e.11)	189
