# Detailed Contents

<i>List of Tables</i>	xviii
<i>List of Figures</i>	xix
1. Introduction	1
1. Core Arguments	1
2. The Welfare State and its Objectives	4
3. Organization of the Book	5
<b>Part 1. Economic Theory</b>	
2. The Market and Information	11
1. The Welfare State with Perfect Information	11
2. Imperfect Information in the Goods Market	13
2.1. <i>Types of intervention</i>	13
2.2. <i>Information and other problems</i>	14
3. Imperfect Information in Insurance Markets	18
3.1. <i>Actuarial insurance with perfect information</i>	18
3.2. <i>Information problems</i>	19
3.3. <i>Social insurance as a response to information failure</i>	23
4. Implications	24
4.1. <i>Market success</i>	24
4.2. <i>Market failure and government failure</i>	26
4.3. <i>State intervention: When, why, and how</i>	28
<b>Part 2. Insurance</b>	
Introduction to Part 2	31
3. The Mirage of Private Unemployment Insurance	33
1. Objectives	34
2. Information Problems	35
2.1. <i>The simple model</i>	35
2.2. <i>The technical conditions</i>	35
2.3. <i>Moral hazard</i>	37
2.4. <i>The inapplicability of private-sector examples</i>	40

3. Operational Problems	42
3.1. <i>Compulsion</i>	42
3.2. <i>Protecting individuals</i>	43
3.3. <i>Calculating the relevant probabilities</i>	45
4. Conclusions	46
4.1. <i>Theoretical arguments</i>	46
4.2. <i>Policy implications</i>	47
4.3. <i>The bottom line</i>	48
4. Problems with Medical Insurance	50
1. Objectives	50
2. Information Problems	52
2.1. <i>Health care</i>	52
2.2. <i>Medical insurance</i>	54
3. Funding Health Care: The Options	62
3.1. <i>Private funding plus private production</i>	62
3.2. <i>Public funding plus public production</i>	66
3.3. <i>Public funding plus private production</i>	67
4. Conclusions	70
5. Twenty-First-Century Insurance Issues	72
1. Genetic Screening	72
1.1. <i>Problems</i>	72
1.2. <i>Approaches to a solution</i>	75
1.3. <i>Preferred options</i>	78
2. Long-Term-Care Insurance	79
2.1. <i>Information problems</i>	80
2.2. <i>Preferred options</i>	83

### Part 3. Pensions

Introduction to Part 3	87
6. The Economics of Pensions	89
1. Objectives	89
2. The Centrality of Output	89
3. Uncertainty and Risk	91
3.1. <i>Uncertainty and risk facing pension schemes</i>	91
3.2. <i>Risks facing individual pensioners</i>	92
4. Information Problems	93
7. Misleading Guides to Pension Design	96
1. Macroeconomic Mythology	96
1.1. <i>Myth 1: Funding resolves adverse demographics</i>	96

1.2. <i>Myth 2: The only way to pre-fund is through pension accumulations</i>	100
1.3. <i>Myth 3: There is a direct link between funding and growth</i>	101
1.4. <i>Myth 4: Funding reduces public pension spending</i>	104
1.5. <i>Myth 5: Paying off debt is always good policy</i>	105
2. Myths about Pension Design	110
2.1. <i>Myth 6: Funded schemes have better labour-market incentive effects</i>	110
2.2. <i>Myth 7: Funded pensions diversify risk</i>	112
2.3. <i>Myth 8: Increased choice is welfare improving</i>	116
2.4. <i>Myth 9: Funding does better if real returns exceed real wage growth</i>	118
3. The Role of Government	122
3.1. <i>Myth 10: Private pensions get government out of the pensions business</i>	122
8. Pension Design: The Options	125
1. Lessons from Economic Theory	125
2. Essential Elements in Pension Reform	126
2.1. <i>Public-sector prerequisites</i>	126
2.2. <i>Private-sector prerequisites</i>	129
3. Policy Choices	132
3.1. <i>Building blocks</i>	132
3.2. <i>Fitting the pieces together</i>	135
4. Conclusions	141
9. Twenty-First-Century Pensions Issues	144
1. Population Ageing: Are Pensions Affordable?	144
2. Portable Pensions: The Welfare State as Snail Shell	148
2.1. <i>The issue</i>	148
2.2. <i>Defined-contribution schemes</i>	149
2.3. <i>Defined-benefit schemes</i>	152
2.4. <i>State pensions</i>	155
2.5. <i>Conclusion</i>	156

## Part 4. Education

Introduction to Part 4	159
10. Core Issues in the Economics of Education	161
1. Objectives: What do we Mean by a 'Good' Education?	161
2. Measuring the Benefits of Education	164
2.1. <i>Measuring output and inputs</i>	164
2.2. <i>Establishing causality: The screening hypothesis</i>	166
3. What is the Efficient Level of Education Spending?	167
3.1. <i>Quantitative analysis</i>	167
3.2. <i>Qualitative arguments</i>	168

11. Information Problems	171
1. Information Problems in the Market for Education	171
1.1. <i>School education: The case against the market</i>	171
1.2. <i>Tertiary education: The case for the market</i>	173
1.3. <i>Implications for policy</i>	174
2. Information Problems, Risk and Uncertainty in Capital Markets	175
2.1. <i>Risk and uncertainty facing borrowers</i>	175
2.2. <i>Risk and uncertainty facing lenders</i>	176
12. Designing Student Loans	179
1. Why Student Loans?	180
2. Organizing Repayments: Mortgage-Type Schemes	181
2.1. <i>Efficiency and equity problems</i>	182
2.2. <i>Administrative problems</i>	183
3. Organizing Repayments: Income-Contingent Schemes	184
3.1. <i>Addressing capital market imperfections</i>	184
3.2. <i>Philosophical arguments</i>	185
3.3. <i>The intuition of income-contingent repayments</i>	186
4. Other Features of Student Loans	188
4.1. <i>Basic design elements</i>	188
4.2. <i>Market interest rates</i>	189
4.3. <i>Private money</i>	189
13. Financing Higher Education: The Options	191
1. Lessons from Economic Theory	192
1.1. <i>Market forces in higher education: Who should make the decisions?</i>	192
1.2. <i>Who should pay?</i>	194
1.3. <i>The resulting system</i>	195
2. Lessons from International Experience	198
2.1. <i>The USA</i>	198
2.2. <i>The UK</i>	201
2.3. <i>The Netherlands</i>	206
2.4. <i>Sweden</i>	207
2.5. <i>Australia</i>	208
2.6. <i>New Zealand</i>	211
2.7. <i>Conclusions from country experience</i>	212
3. Conclusions	215
3.1. <i>Misleading guides to policy design</i>	215
3.2. <i>A strategy for higher education finance</i>	220
14. Twenty-First-Century Education Issues	223
1. Private Funding	223
1.1. <i>The classification problem</i>	223

1.2. <i>Approaches to private finance</i>	225
1.3. <i>Examples</i>	231
2. Student Loans and International Labour Mobility	233
3. Rationalizing the Funding of Tertiary Education	234
4. Individual Learning Accounts	236
<b>Part 5. The Welfare State in a Changing World</b>	
Introduction to Part 5	239
15. The Welfare State in Post-Communist Countries	241
1. The simple analytics of transition	241
1.1. <i>The old order</i>	241
1.2. <i>The effects of transition</i>	242
1.3. <i>Resulting reform directions</i>	246
2. Insurance: Assisting Labour-Market Adjustment	247
2.1. <i>The problem</i>	247
2.2. <i>Policy directions</i>	248
3. Pensions	252
3.1. <i>The problem</i>	252
3.2. <i>Policy directions</i>	253
4. Education	258
4.1. <i>The challenge of transition</i>	258
4.2. <i>Policy directions: Adapting education to the needs of a market economy</i>	260
16. The Welfare State in a Changing World	263
1. Is the 'Crisis' a Crisis?	263
2. A Continuing Welfare State	270
 <i>References</i>	 273
<i>Index</i>	287

## *List of Tables*

7.1. A simplified Pay-As-You-Go system	119
8.1. Essential elements in pension reform	127
13.1. Spending on higher education, selected OECD countries, 1995	199
13.2. Higher education funding in different countries	213
14.1. Illustrative operation of private finance	228
15.1. Real GDP in Central and Eastern Europe, the Baltic countries, and the CIS in 1999 compared with 1989	244
15.2. Unemployment rates, selected transition countries, 1998	245
15.3. Poverty rates, selected transition countries, 1987–8 and 1993–5	246
15.4. Age dependency ratio and system dependency ratio, selected countries, 1996	253

## *List of Figures*

2.1. Rational choice in the Fisher model	12
3.1. Stylized distribution of gains and losses by socioeconomic group	44
10.1. The efficient level of output	163
12.1. Trajectory of income-contingent and mortgage loan repayments	187
15.1. Science and mathematics test performance of children in selected transition and industrial economies	261
