Introduction	78
Treasury Auctions	78
When-Issued Trading	85
Winner's Curse	96
Further Reading	100
Problems	101
References	102

Chapter 4	Bond Mathematics	
	Introduction	104
	Discounting	104
	Yields	109
	Computing Yields in Practice	113
	Risk and Debt Securities	126
	Applications of PVBP and Duration Concepts	141
	Convexity	147
	Further Reading	151
	Problems	152
	References	154

Chapter 5	Yield-Curve and Term-Structure Analysis	
	Introduction	156
	Yield-Curve Analysis	156
	Term-Structure Analysis	176
	Forward Rates of Interest	183
	Practical Considerations	187
	Strips Markets	190
	Extracting Zeroes in Practice	198
	Further Reading	202
	Problems	202
	References	204

Chapter 6	No-Arbitrage Principle and the Term Structure	
	Introduction	208
	Determinants of Interest Rates	209
	Hypotheses of Term Structure	217
	Concept of No Arbitrage	219
	Dynamics of Bond Prices and Interest Rates	227
	Valuation of the Yield Curve	229
	Calibration of Models	239
	Conclusions and Further Reading	247
	Problems	248
	References	249

Chapter 7	Options Markets	
	Introduction	252
	Contract: Definition and Terminology	252
	Market Overview	256
	Factors Determining an Option's Value	261
	Trading Strategies	262

No-Arbitrage Restrictions	267
Pricing by Replication	276
Monte Carlo Simulation	292
Conclusions	310
Problems	310
References	311

Chapter 8 Agency and Corporate Debt Securities 313

Introduction	314
Classification of Agency Debt	314
Corporate Debt Market	319
Evidence on Defaults and Financial Distress	332
Theories of Corporate-Debt Pricing	337
Hybrids	347
Percs	351
Perls	352
Conclusion	353
Problems	353
References	354

Chapter 9 Securitization and Mortgage-Backed Securities 357

Introduction	358
Securitization	358
Mortgages	360
Prepayments	366
Mortgage-Backed Securities (MBS)	380
Collateralized Mortgage Obligations (CMOS)	388
Valuation Framework	392
A Valuation Model	396
Mortgage Derivatives	404
Conclusion	405
Problems	405
References	406

Chapter 10 Tax-Exempt Debt Securities 409

Introduction	410
Municipal Debt Securities	410
Tax Reform Act 1986	412
An Overview of Municipal Debt Market	412
Municipal Yield Spreads	415
Issuance and Primary Market	422
Secondary Market	424

Conclusion	424
Problems	426
References	427

Chapter 11 Portfolio-Management Techniques 429

Introduction	430
Nature of the Underlying Business and Portfolio Management	430
Matching Funding	436
Horizon Matching	446
Indexation	451
Portfolio Insurance	455
Conclusion	457
Problems	457
References	457

Part II Fixed-Income Derivatives 459

Chapter 12 An Overview of Derivatives Markets 461

Introduction	462
Listed Derivatives Markets	462
Dealer Derivatives Markets	465
Motivations for Derivatives	468
Other Classifications of Derivatives	474
Derivatives and Risk Management	476
Regulation of Derivatives	478
Conclusion	478
Problems	478
References	479

Chapter 13 Treasury Futures Contracts 481

Introduction	482
History of Forward and Futures Trading	483
Forward Contracts	484
Futures Contracts	487
Forward Contracts vs. Futures Contracts	491
Treasury Futures Contracts	492
Analysis of a Specific Contract: March 1987 T-Bond Contract	504
Conclusion	521
Problems	521
References	521

Chapter 14	Eurodollar Futures and Swaps	523
	Introduction	524
	Eurodollar Futures Contracts	524
	Interest-Rate Swaps	544
	Risk Management of Swaps	558
	Swap Spreads	562
	Conclusion	566
	Problems	566
	References	568
Chapter 15	Risk Management	569
	Introduction	570
	What is Risk?	572
	Risk and Return	578
	Sources of Risk	580
	Systems and Data Requirements	610
	Conclusion	611
	Problems	612
	References	613
	Index	615
