Preface	xv
CHAPTER 1 INTRODUCTION	1
1.1 Overview of Need	2
1.1.1 Globalization of Business	3
1.1.2 Europe in 1992	3
1.1.3 Linkages in National Relations	3
1.1.4 Importance of Information Technology	4
1.2 Hierarchy of Networks	5
1.2.1 Global Networks Topology	5
1.2.1.1 Satellite Communication	6
1.2.1.2 Transoceanic Cables (Coaxial and Fiber)	8
1.2.1.3 Transborder Links	9
1.2.2 Regional Telecommunication	10
1.2.2.1 North America	10
1.2.2.2 Europe	12
1.2.2.3 Southeast Asia and the Pacific	13
1.2.2.4 Latin America	17
1.2.2.5 Africa	17
1.2.2.6 Eastern Europe	18
1.3 Predominant Applications	19
1.3.1 Business Communications	19
1.3.1.1 Telephone	20
1.3.1.2 Telex	23
1.3.1.3 Videotex and Teletext	24
1.3.1.4 Facsimile	24
1.3.1.5 E-Mail	25
1.3.1.6 Data Communication and Information Technology	26
1.3.1.7 Business Video	27

1.3.1.8	Private Telecommunication Networks	27
1.3.2	International Television	28
1.3.2.1	Television Networks	28
1.3.2.2	Cable Television	30
1.3.2.3	Satellite Broadcasting	32
CHAPTER 2 THE INTERNATIONAL NETWORK ENVIRONMENT		35
2.1	Public Telecommunication Authority	36
2.1.1	Telephone Service in the United States	37
2.1.2	TA Profiles	39
2.1.2.1	Deutsche Bundespost (West Germany)	40
2.1.2.2	Telefónica (Spain)	42
2.1.2.3	Embratel (Brazil)	44
2.1.3	PTT Privatization and Competition	45
2.1.3.1	The United Kingdom	46
2.1.3.2	Japan	48
2.1.3.3	Western Europe	50
2.2	Fiber Optic Networks	52
2.2.1	Land-Based Fiber Networks	53
2.2.2	Transatlantic (TAT-8 and TAT-9)	56
2.2.3	Private Transatlantic Cable (PTAT)	59
2.2.4	Transpacific (TPC-3 and TPC-4)	61
2.2.5	North Pacific Cable (NPC)	63
2.3	Competing Satellite Systems	65
2.3.1	INTELSAT	65
2.3.1.1	INTELSAT System Overview	66
2.3.1.2	Structure of INTELSAT	67
2.3.1.3	INTELSAT Satellites	68
2.3.1.4	INTELSAT Earth Stations and Services	69
2.3.2	INTERSPUTNIK	76
2.3.3	EUTELSAT	77
2.3.4	Other Regional Satellite Systems	78
2.3.5	Transborder Services from Domestic Satellites	79
2.3.6	Privately-Owned International Satellites	80
2.3.6.1	Pan American Satellite	81
2.3.6.2	Asiasat	82
2.3.6.3	Orion Satellite and Other Proposals	83
CHAPTER 3 CIRCUIT-SWITCHED AND PRIVATE LINE NETWORK SERVICES		85
3.1	Public Switched Telephone Networks	87
3.1.1	Message Telephone Service (MTS)	87
3.1.1.1	International Correspondents	88

3.1.1.2	Worldwide Numbering Plan	89
3.1.1.3	International Signaling in Telephone Networks	90
3.1.1.4	International Gateways in the PSTN	93
3.1.1.5	MTS Offerings of PTTs	95
3.1.2	WATS and Toll-Free Calling	97
3.1.3	Software Defined Networks	99
3.1.4	Facsimile Networks	101
3.2.	Analog and Digital Private Line Services	102
3.2.1	Analog Private Lines	104
3.2.1.1	Voice-Only or Facsimile-Only	106
3.2.1.2	Alternate Voice-Data (AVD)	107
3.2.1.3	48 kHz Wideband	107
3.2.1.4	Telegraph	107
3.2.2	Digital Private Lines	108
3.2.2.1	Low and Medium Speed Data Transmission (DDS)	108
3.2.2.2	Multiplexed (T1 and E1) Channels	111
3.2.2.3	Circuit-Switched 56 or 64 kb/s	114
3.2.2.4	ISDN Basic Rate Services	115
3.2.2.5	Switched T1	115
3.2.2.6	DS3 Point-to-Point	116
3.3	INTELSAT Business Service	117
3.4	Hybrid Networks	122
CHAPTER 4 PACKET-SWITCHED DATA NETWORK SERVICES		123
4.1	Public Data Network Concepts	124
4.2	Commercial PDN Companies	128
4.2.1	BT Tymnet	129
4.2.2	Sprint Net (Telenet)	130
4.2.3	Infonet	131
4.2.4	ACCUNET Packet Service (APS)	132
4.2.5	GE Information Services (GEIS)	133
4.3	PDN Offerings of the PTTs	134
4.3.1	Canada's Datapac	135
4.3.2	France Telecom's TRANSPAC	135
4.3.3	PDNs in Japan	136
4.3.4	Telecom Singapore's Telepac	137
4.4	E-Mail	138
4.4.1	X.400 Message Handling System	140
4.4.2	IBM Message Distribution Systems	143
4.4.3	Public E-Mail Offerings	145
4.4.3.1	AT&T Mail	146

4.4.3.2	BTI Dialcom	147
4.4.3.3	GEIS QUIK-COMM	148
4.4.3.4	MCI Mail	148
4.4.3.5	SprintMail	149
4.4.3.6	WU EasyLink and OfficeAccess	150
4.4.3.7	BT Tymnet OnTyme	152
4.4.3.8	IBM Information Network	152
4.4.4	Electronic Data Interchange	155
4.5	Information Services (Videotex)	159
CHAPTER 5 PRIVATE OWNERSHIP OF NETWORKS AND CUSTOMER-PREMISES EQUIPMENT		163
5.1	Digital Integration of Voice, Data, and Video Communication	164
5.1.1	Local Area Networks	166
5.1.2	Wide Area Networks	169
5.2	Customer Premises Equipment	170
5.2.1	Telephone Station Equipment	171
5.2.2	Voice-Band and Wideband Modems	173
5.2.3	Group 3 and Group 4 Facsimile	179
5.2.3.1	The Group 3 Standard	180
5.2.3.2	The Group 4 Standard	183
5.2.4	Video Teleconferencing Equipment	185
5.2.4.1	Teleconferencing with TVROs	186
5.2.4.2	Freeze-Frame Television	187
5.2.4.3	Interactive Video Teleconferencing Using Digital Compression	187
5.2.4.4	Digital Teleconferencing Standards	191
5.2.5	Integrated Terminals for ISDN	192
5.2.5.1	ISDN Terminal Adapter	193
5.2.5.2	True ISDN IVDT Terminals	194
5.2.5.3	Personal Computer Plug-In Boards	195
CHAPTER 6 TELECOMMUNICATION NODE EQUIPMENT IN PRIVATE NETWORKS		197
6.1	Private Branch Exchange	201
6.1.1	PBX Architecture	203
6.1.2	North American Manufacturers	205
6.1.3	European Manufacturers	208
6.1.4	Japanese Manufacturers	209
6.2	Digital Access Cross-Connect Systems (DACs)	210
6.3	High-Level (T1) Multiplexers	213
6.4	Private X.25 Packet Switching	217
6.4.1	Overview of Private X.25 Networking	219

6.4.2	Common Equipment Elements	220
6.4.3	Performance Measures	221
6.4.4	Suppliers in the International Marketplace	222
6.5	Fast-Packet Switching and Broadband ISDN	224
6.5.1	T1 Fast-Packet Switching	224
6.5.2	Frame Relay	226
6.5.3	Asynchronous Transfer Mode (ATM)	227
6.6	Bandwidth-Efficient Multiplexers	229
6.6.1	Statistical Multiplexers	229
6.6.2	Narrow-Band Voice Multiplexers	231
6.7	Very Small Aperture Terminal (VSAT) Satellite Networks	233
6.7.1	VSAT Manufacturers and Service Suppliers	235
6.7.2	Prospects for VSAT Development Worldwide	236
CHAPTER 7 INTERNATIONAL TRANSMISSION OF TELEVISION AND AUDIO		239
7.1	Video Communication Technology	240
7.1.1	Color Television Formats	242
7.1.1.1	NTSC (525 line, 60 Hz)	242
7.1.1.2	PAL (625 line, 60 Hz)	244
7.1.1.3	SECAM (625 line, 60 Hz)	245
7.1.2	Analog Transmission on International Links	245
7.1.3	Digital Television Transmission	248
7.1.4	Multiplex Analog Components	249
7.1.5	High Definition Television	250
7.2	Radio and Audio Communication Technology	252
7.2.1	AM Radio Services	252
7.2.2	FM Radio Services	253
7.3	International Transmission Services	254
7.3.1	Video and Audio Transmission Facilities	254
7.3.2	Service Capabilities Available to Users	256
7.3.2.1	Backhaul of Event Coverage	256
7.3.2.2	Program Distribution	258
7.3.2.3	Private Broadcasting and Video Teleconferencing	260
7.4	Arranging International Satellite Transmission from INTELSAT	261
7.4.1	Television Service Modes	262
7.4.2	The Video Service Order Process	263
7.5	Cooperative Broadcasting Activities	265
7.5.1	National Association of Broadcasters	265
7.5.2	Regional Broadcasting Unions	266
7.5.3	<i>Ad Hoc</i> Affiliations (Broadcasting Pools)	268

CHAPTER 8 MANAGEMENT AND LOGISTICS	271
8.1 International Network Strategies	272
8.1.1 Balancing Public and Private Facilities	272
8.1.2 Role of International Carriers	274
8.1.3 Role of Public Data Networks and E-Mail Services	275
8.1.4 Role of the System Integrator	277
8.1.5 Strategies for Operations in Foreign Countries	277
8.1.5.1 In-Country Consultant	278
8.1.5.2 Transfer of Technology	279
8.1.5.3 Employment Opportunities for Local Citizens	281
8.2 Laying the Groundwork	281
8.2.1 Realistic System Engineering	282
8.2.2 Management Commitment	282
8.2.3 Contingency Plans	283
8.3 Network Design	284
8.3.1 Requirements Definition	285
8.3.2 Analysis Tools	285
8.3.3 Technology Assessment	286
8.3.4 Topology Decisions	287
8.4 Implementation Planning	289
8.5 Shipping, Installation, and Checking	290
8.6 Operations and Maintenance	292
8.7 Integrated Network Management Systems	293
8.7.1 Network Monitoring and Control	294
8.7.2 Administrative Operations	297
CHAPTER 9 INTERNATIONAL TELECOMMUNICATION	
REGULATION AND TRANSBORDER DATA FLOWS	299
9.1 The International Telecommunication Union	300
9.1.1 Radio Frequencies and Broadcasting	302
9.1.1.1 The Radio Regulations	302
9.1.1.2 World Administrative Radio Conference	305
9.1.1.3 International Radio Consultative Committee	307
9.1.2 Interfacing Terrestrial Networks	308
9.1.2.1 International Telegraph and Telephone Consultative Committee	308
9.1.2.2 World Administrative Telegraph and Telephone Conference	311
9.2 INTELSAT Consultation for New Satellite Systems	312
9.2.1 Technical Compatibility	312
9.2.2 Potential Economic Harm to INTELSAT	313
9.2.3 Transborder Services on Domestic Satellites	314
9.3 Transborder Data Flows	315

CHAPTER 10 TRENDS IN INTERNATIONAL TELECOMMUNICATION	317
10.1 Reduction in Barriers	319
10.2 Adoption of American Regulatory Principles	321
10.3 Modern Digital Networks	322
10.4 Improved Service Quality and Reliability	323
10.5 Infusion of Information Technology	325
10.6 Worldwide Information Availability	325
Bibliography	327
Index	331
About the Author	343
