# Figures

---

1.1	The standard case of a consumer optimum	13
1.2	How the optimum is affected by a restriction of the amount of a good to be bought and by a tax	14
2.1	Risk-aversion	35
2.2	Fair insurance for contingent events	36
3.1	Pooling and separating equilibrium	44
3.2	The allocative effect of a tax	51
3.3	A possible effect of a tax-benefit system	52
3.4	The effects of giving goods and giving money	62
3.5	An upper limit for the amount of goods subsidised	63
3.6	A freely given good in excess of what the individual would have consumed with the same level of resources	64
3.7	Self-selection by giving a good at a specific quality	68
3.8	The area ABCD gives the compensating variation necessary when a subsidy is withdrawn	70
3.9	Lorenz curve and Gini coefficient	71
3.10	Lorenz curves can cross	72
4.1	Beneficiaries and expenditures of Medicaid programmes	96
5.1	The budget constraint under complicated pension and tax rules	171
6.1	Flows in the Austrian labour market for the year 2000	199
6.2	Survivor and hazard functions for two distributions	208
6.3	How UA affects labour supply in the case of low wages and high wages	222
6.4	The comparative static effects of fringe benefits	241
8.1	The compensation criterion according to Engel and Rothbarth	292
8.2	The budget constraint of low-wage employees in the presence of the EITC in the USA	313
8.3	Measuring efficiency of an income support scheme	316
8.4	Utility as a function of income for a log-normal distribution	328
8.5	The construction of a poverty line	329

# Tables

---

1.1	Expenditure for the welfare state as percentage of GDP	2
3.1	The benefit–cost ratio, and the net transfer’s share of the pension benefits for the retired generation	60
3.2	The benefit–cost ratio, the net transfer’s share of the pension and sickness benefits, and the net transfer’s share of lifetime earnings for the working generation	60
4.1	Health expenditure in OECD countries as a percentage of GDP	79
4.2	Share of public expenditure for health services in total expenditure for health services (1997)	80
4.3	Distribution of medical spending in the USA (1987)	80
4.4	Type of health insurance and coverage status, USA (1997)	95
4.5	People without health insurance for the entire year according to selected characteristics (1997)	97
4.6	Annual growth rates of health expenditure per capita	116
4.7	Total employment in health services	118
4.8	Admission rates to inpatient care institutions	119
4.9	Fictitious rate of contribution to cover expenses as percentage of income and redistribution according to income and family status	122
4.10	Expected average health costs over the life-cycle, by marital status, earnings and family size	123
5.1	Public pension expenditure as share of GDP	133
5.2	Net replacement ratios for employees with a full career in 1998	138
5.3	Average retirement age, 1993 and 1998	140
5.4	Average net replacement ratios of new pensions in relation to final income	141
5.5	Labour force participation (ages 55–64)	169
5.6	Social security wealth and its accrual for a single worker	172
5.7	Expected net benefits/payments at age 65 for different household incomes for married couples (a)	176
5.8	Expected net benefits/payments at age 65 for different household incomes for married couples (b)	176

5.9	Average rate of return according to income and according to race and education	177
5.10	Increases in life expectancy	178
5.11	Development of fertility	179
5.12	Development of dependency ratios	180
5.13	Development of pension expenditures as share of GDP	181
5.14	Equilibrium contribution rate	182
5.15	Real rate of return when retiring in year $t$	183
5.16	Contributions and benefits for retirement	184
5.17	Population aged 75 and over	188
5.18	Spending and people in long-term care	189
6.1	Unemployment rates	201
6.2	International comparison of employment rates for 2000	203
6.3	Unemployment rates and employment/population ratios according to sex, age and education	204
6.4	Rates of inflow into and outflow from unemployment (1993)	206
6.5	Unequal burden of unemployment in Austria (1996)	209
6.6	Unemployment benefit replacement ratios by duration and family circumstances (1991)	219
6.7	Incidence of long-term unemployment	227
7.1	Benefits and contributions over whole life in the Austrian child support system	264
8.1	The relative movement of households between deciles as ranked by expenditure and by income	280
8.2	Household characteristics by decile	281
8.3	Percentage distribution of earnings capacity and current income-poor individuals and current income-poor households, by selected socio-economic characteristics, total population	288
8.4	Estimated equivalence scales	292
8.5	Scales used in international context	293
8.6	Overlapping of poor when using different equivalence scales	294
8.7	Distribution of length of poverty spells in the USA	296
8.8	Ranking of poverty according to different poverty measures	299
8.9	Poverty according to different poverty measures for households and individuals	301
8.10	Increase in life expectancy at birth for countries with high incidence of poverty	304
8.11	Poverty thresholds in 1999 by size of family and number of related children under 18	305
8.12	Poverty rates in the USA according to demographic characteristics	306

8.13	Percentage of people who are poor at different poverty thresholds	307
8.14	Poverty gap: equivalent income deficit as percentage of poverty line	308
8.15	Gross rates of entry and exit of poverty (1993–1995)	309
8.16	Pre- and post-transfer poverty rates and poverty gaps	312
8.17	Share of beneficiaries and share of expenditure on social assistance	318
8.18	Level of social assistance entitlements as percentage of median income	320
8.19	Percentage of households receiving means-tested transfers at different levels of poverty	321
8.20	Weighted means of income, official poverty thresholds, subjective income thresholds by family size for the Netherlands and the USA	329
8.21	Change of poverty according to Sen's poverty index and decomposition into components	331
8.22	Poverty in India and Brazil since the late 1970s	333
8.23	Decomposition of the change of poverty	333

# Boxes

---

1.1	Taxed benefits	3
1.2	Tax burden and lifetime consumption	7
2.1	The formal argument for Pareto-efficiency for an exchange economy	27
3.1	An example of non-availability of insurance against job-related risk	43
3.2	An emergency fund to avoid insurance	47
3.3	Tax-benefit incidence and empirics	53
3.4	The welfare effect of rent subsidies	64
3.5	Targeting benefits by giving goods instead of money	67
4.1	Promises of a commercial health insurance and a public health system	83
4.2	Should we attach a monetary value to health and to life?	86
4.3	An example of separation of risks	100
4.4	The WHO on health and the poor	102
4.5	Conditions which can result in denying of coverage for children	103
4.6	Special methods to acquire only good risks	104
4.7	Inequality of wealth and access to goods	105
4.8	Rationing by private insurance	106
4.9	Ranking of treatments by importance according to the Oregon Health Services Commission service category definitions	110
4.10	Are co-payments and deductibles a means to reduce costs?	113
4.11	The principal-agent problem	115
5.1	An example of risk of funds – but government is not innocent	163
5.2	Why is the market for annuities so small?	165
5.3	An example of the political risk of a PAYG system	167
5.4	The 62–65 puzzle	173
5.5	The Austrian system of care	189
6.1	Unemployment insurance through the family	212
6.2	Does unemployment cause future unemployment?	214
6.3	The measurement of the wage loss	216
6.4	How does (or did) the replacement rate in Germany influence the duration of unemployment?	224

6.5	Forced participation for the long-term unemployed	232
6.6	A pure experiment: counselling and monitoring the unemployed in the Netherlands	236
6.7	What belongs to paid labour time?	239
6.8	Who pays for workers' compensation?	242
6.9	A two-level protection of labour contracts	244
7.1	Maternity leave and the gender pay gap	269
8.1	Infant mortality and the share of the rich	284
8.2	How to predict the effects of wage supplements	314
8.3	The Bremen approach to analysing social assistance	322
8.4	A European example of activation: Denmark	324
