

TABLE OF CONTENTS

VOLUME ONE

<i>PREFACE</i>	1
<i>TABLE OF CONTENTS</i>	3
<i>LIST OF ILLUSTRATIONS</i>	13
<i>BY WAY OF AN INTRODUCTION: SOCIAL SCIENCE - THE STUDY OF HYPERCOMPLEX SYSTEMS</i>	18
<i>PART 1: MAN, SCIENCE, AND NATURE</i>	39
SYNOPSIS OF PART 1	41
CHAPTER 1: THE ORGANIZATION OF EXPERIENCE	53
1. We are wiser than we know...	53
2. Against disorder and uncertainty	55
3. A figment of the imagination	58
4. The machinery of order	61
5. Unending quest	68
6. A human enterprise	75
7. Implications for research	82
CHAPTER 2: SYSTEMS, TIME, AND EVOLUTION	84
1. System, environment, and feedback	84
2. Of time and movement	91
3. Dynamic systems and systems theory	95
4. Stability, equilibrium, steering, and evolution	105
CHAPTER 3: MAN, NATURE, AND NATURAL SCIENCE	118
1. Natural science and the study of man	118
2. Nature: the creativity of decay	124
3. Man and other animals	134
4. The unity of nature and of science	142
CHAPTER 4: SCIENCE, MATHEMATICS, AND NUMBER	144
	817

1. Natural language, mathematics, and thought	144
2. Mathematics, number, and measurement	147
3. Formalization and the growth of knowledge	155
PART 2: THE BEHAVIORAL SYSTEM	159
SYNOPSIS OF PART 2	161
CHAPTER 5: THE NOTION OF BEHAVIOR	167
1. Choice and effort	167
2. The behavior of social systems, atomic and compound	170
3. Intensity, probability, and time	175
CHAPTER 6: BEHAVIOR AND UTILITY	181
1. A common notion much misunderstood	181
2. What's the use?	186
3. A vicious circle?	188
4. Marginal utility and time	193
CHAPTER 7: THE EVOLUTION OF BEHAVIOR	198
1. A matter of learning	198
2. Behavior and our theories of the world	204
3. Overt action, perception, and thought	210
4. Of development and growth	218
CHAPTER 8*: THE CALCULUS OF CONDUCT	225
1. Behavior: definition and interpretation	225
2. The behavioral function	233
3. Derivatives	238
4. Intensity and utility – the implicit function theorem	241
5. The direction of behavior	247
6. Behavioral vector fields	250
7. A generalized, recursive utility function	255
8. Preferences	263
CHAPTER 9*: THE DYNAMICS OF BEHAVIOR	267
1. Preliminary remarks on time, change, and continuity	267

2. Behavioral change: discrete and instantaneous	269
3. Change and the structure of behavior	272
4. The nature and magnitude of behavioral change	276
5. Eigenvalues and eigenvectors	278
6. The stationary behavioral state	283
7. The evolution of the behavioral system	289
8. Another value law	297

<i>GLOSSARY</i>	305
<i>SYMBOLS AND CONVENTIONS</i>	316

VOLUME TWO

<i>TABLE OF CONTENTS</i>	321
<i>LIST OF ILLUSTRATIONS</i>	331

PART 3: MAN AND POWER 337

SYNOPSIS OF PART 3	339
--------------------	-----

CHAPTER 10: POWER 347

1. Power and the degradation of energy	347
2. Power, resources, information, and the environment	350
3. In the sweat of thy brow shalt thou eat bread...	354

CHAPTER 11: POWER AND THE DICTATE OF RATIONALITY 359

1. The emergence of rationality	359
2. Behavior: adaptation and the search for equilibrium	362
3. Errors, information, and the environment	368
4. Of altruism and all that	371

CHAPTER 12: THE IMPORTANCE OF MIND 375

1. The meaning of information	375
2. Of mind and government	383
3. The behavioral correlates of information	387
4. Body and soul	393

CHAPTER 13*: POWER AND THE PRODUCTIVITY OF BEHAVIOR	397
1. Effort, effect, and power	397
2. Problems of allocation and of combination	401
3. The production of power - 1	404
4. The production of power - 2	413
5. The distributive optimum, rationality, and errors	422
6. The value and composition of power	430
CHAPTER 14*: THE ECONOMY OF BEHAVIOR	439
1. Discrete power increments and their value	439
2. The yield function	444
3. The intensity, value, and yield of behavior	452
4. Power: the mainspring of behavior	458
5. Second derivatives	465
6. Power and behavioral state	471
7. Change	479
8. Equilibrium and disequilibrium	484
CHAPTER 15*: ORDER AND DISORDER	489
1. Information, order, and organization	489
2. Entropy and information	489
3. Variance and correlation	498
4. System density	504
5. System coherence	514
6. System alignment	521
7. A note on the Gram determinant	528
8. Coordinate transformations	533
PART 4: THE MECHANICS OF SOCIAL LIFE	539
SYNOPSIS OF PART 4	541
CHAPTER 16: INTERACTION AND INTERCOURSE	556
1. Social behavior, transactions, and interaction	556
2. Transaction probabilities, social spaces, and intensities	560
3. The study of interaction	565

CHAPTER 17: THE ELEMENTARY FORMS OF INTERCOURSE	570
1. Transaction forms	570
2. The description of intercourse: an ecological solution	573
3. The modality of intercourse	577
4. Of communication and negotiation	586
CHAPTER 18: THE BASIC LAW OF SOCIAL LIFE	593
1. The explanation of social action and of influence	593
2. The value of our fellows	596
3. The central principle of intercourse	601
4. My friends and enemies and theirs	609
CHAPTER 19: INTERACTION AND INTERDEPENDENCE	614
1. Dependence relations and the force of transactions	614
2. Distances, natural and social	621
3. Dependence and the composition of power	624
4. The value of independence	628
CHAPTER 20: THE STRUCTURE OF SOCIETY	633
1. The meaning of structure	633
2. Density, homogeneity, and affinity	641
3. Interdependence and complementarity	646
4. Structure, information, and intercourse	653
CHAPTER 21: INFORMATION, COMMUNICATION, AND EDUCATION	660
1. Communication and the acquisition of information	660
2. Co-evolution and culture	668
3. Education and propaganda	673
4. A note on morals and morality	687
CHAPTER 22*: INTERACTION, INTERCOURSE, AND THE STATE OF SOCIAL SPACE	691
1. Transaction probabilities and social spaces	691
2. The force and form of social action	696
3. The density of social life	701
4. Transaction forms, subforms, and force	706
5. Force and the components of power	718
	821

6. Forms of social life	724
CHAPTER 23*: INTERCOURSE, INFLUENCE, AND INTERDEPENDENCE	732
1. First-order weight and dependence functions	732
2. Weight, dependence, and the social system	737
3. A closer look at the dependence function	743
4. Second-order weight and dependence functions	752
5. Third-order weight and dependence functions	760
6. The productivity of social behavior	766
CHAPTER 24*: FORMS OF INFLUENCE AND AFFINITY	776
1. Problems and concepts	776
2. First-order net weight functions	781
3. Higher-order net weight functions	785
4. Peace or war	788
5. Concluding remarks	793
<i>GLOSSARY</i>	801
<i>SYMBOLS AND CONVENTIONS</i>	812
<u>VOLUME THREE</u>	
<i>TABLE OF CONTENTS</i>	817
<i>LIST OF ILLUSTRATIONS</i>	827
PART 5: THE DYNAMICS OF SOCIAL LIFE	833
SYNOPSIS OF PART 5	835
CHAPTER 25: SOCIAL CHANGE AND ITS SOURCES	847
1. Time is of the essence	847
2. The sources of social change: endogenous and exogenous	849
3. Nature, population, and technology	854
4. Progress?	864
CHAPTER 26: OF EQUILIBRIUM AND OF ADAPTATION	868
1. Social processes and their outcomes	868

2. That the powerful be satisfied and the discontented weak...	877
3. Towards equilibrium	884
4. A note on steering, regulation, and social rationality	888
CHAPTER 27: CHANGE AND UNCERTAINTY	893
1. The meaning of uncertainty	893
2. System structure, stability, and uncertainty	899
3. Feedback relationships	905
4. Far from equilibrium	908
CHAPTER 28: TRADE, AID, AND COOPERATION	912
1. Synoecy	912
2. The preconditions of synoecy	915
3. The establishment and development of productive relationships	922
4. Friction, obstacles, and catastrophes	932
CHAPTER 29: VIOLENCE, WAR, AND REVOLUTION	938
1. How special is violence?	938
2. Escalation: the failure of deterrence	943
3. Violence and its causes: long-term and short-term	959
4. Society: national and international	965
CHAPTER 30: OF GOVERNMENT	970
1. The many meanings of stability	970
2. Of steering and of adaptation	976
3. Conditions and constraints	985
4. Of hierarchy and representation: the circuitry of order	992
CHAPTER 31: THE PREVENTION OF WAR	999
1. The scourge of mankind and the remedies	999
2. Information and violence	1007
3. Of crises and crisis control	1011
4. Briefly on peace, ideology, and public opinion	1015
CHAPTER 32*: CHANGE AND THE STRUCTURE OF THE SOCIAL UNIVERSE - 1	1020
	823

1. Agents of social change and the notion of social structure	1020
2. Shocks and perturbations: environmental and social	1022
3. Social structures	1029
4. Briefly on time, process, and structure	1042
5. A first look at the problem of social stability	1048
6. Our friends and enemies: the sympathy function	1054
7. The basic law of social life: to help one's friends and to fight one's enemies	1063
CHAPTER 33*: CHANGE AND THE STRUCTURE OF THE SOCIAL UNIVERSE - 2	1070
1. System density and the magnitude of social change	1070
2. The strength and nature of interaction: system density and coherence	1076
3. The system transform	1082
4. The development of conflict and of cooperation - escalation and deescalation	1089
5. The system transform and the problems of system stability and capacity	1096
6. The stationary state	1104
PART 6: SOCIETY	1109
SYNOPSIS OF PART 6	1111
CHAPTER 34: HUMAN SOCIETY: THE CENTRAL ISSUES	1128
1. The many shapes of society	1128
2. The description of social systems	1132
3. Integration and the evolution of society	1135
4. Of regulation, institutions, and culture	1142
CHAPTER 35: THE INTEGRATION OF SOCIAL SYSTEMS - 1	1152
1. System capacity, structure, legitimacy, and culture	1152
2. Of origins, sources, and societal levels	1161
3. Integration as a response to, and source of social change	1167

4. Integration as a self-propelling process	1173
CHAPTER 36: THE INTEGRATION OF SOCIAL SYSTEMS - 2	1180
1. System integration and subsystem adaptation	1180
2. System integration and the supersystem	1187
3. General observations on societal (dis)integration	1198
4. A brief remark on the measurement of integration	1205
CHAPTER 37: THE RULE OF LAW	1209
1. Laws, morals, and other rules: what they are, mean, and do	1209
2. Obedience to the law: legitimacy and sanctions	1218
3. The emergence and development of the law	1230
4. How much regulation?	1238
CHAPTER 38: CULTURE: THE NORMATIVE ORDER OF HUMAN SOCIETY	1245
1. Of language, science, art, religion, and the law	1245
2. The evolution of culture	1256
3. Of adaptation and innovation	1268
4. A note on 'values' and ideology, and what they matter	1274
CHAPTER 39: THE ORGANIZATION OF COLLECTIVE ACTION	1279
1. Collective behavior, information, and organization	1279
2. Collective behavior and the power and goals of social systems	1286
3. The mechanics of collective action	1293
4. The evolution of collective behavior	1304
CHAPTER 40: OF DEMOCRACY AND AUTOCRACY - 1	1315
1. Forms of government: democracy and autocracy	1315
2. Government, representation, and democracy	1320
3. Democracy, autocracy, and adaptation	1326
4. Ideology and the study of democracy	1329
CHAPTER 41: OF DEMOCRACY AND AUTOCRACY - 2	1337
1. What makes democracy work?	1337
2. Homogeneity, democracy, and democratic values	1341
3. The evolution of democracy	1350

4. The development of European democracy	1361
CHAPTER 42: ORDER AND DISORDER IN THE HUMAN UNIVERSE	1368
1. Chaos and order in nature and in social life	1368
2. Order and adaptability in man and society	1375
3. The emergence of mass society and anomie	1384
4. The growth of Leviathan	1392
<i>GLOSSARY</i>	<i>1403</i>
<i>SYMBOLS AND CONVENTIONS</i>	<i>1414</i>
<i>SELECT BIBLIOGRAPHY</i>	<i>1419</i>
<i>INDEX</i>	<i>1438</i>

LIST OF ILLUSTRATIONS

VOLUME ONE

..1: The evolution of science	71
..2: The empirical cycle	73
..3: A most elementary system	85
..4: An elementary system and environment	86
..5: Feedback relationships	87
..6: Interaction and the state of a compound system	91
..7: The time derivative of a function	93
..8: Everything moves, but not equally fast	94
..9: Iteration	100
.10: Stability and instability	106
.11: A simple system capable of variation and adaptation	112
.12: The structure of evolutionary processes	113
.13: Why information works	128
.14: The degradation of energy	131
.15: The creativity of decay	132
.16: Behavior as a dynamic system	169
.17: A simple behavioral state	170
.18: Behavioral state and substates	172
.19: The behavioral state of a compound system	174
.20: Marginal utilities	194
.21: Values, factual insights, and behavior	204
.22: The attitudinal system	207
.23: Overt action	211
.24: Perception	214
.25: Thought	216
.26: The dynamics of behavior	219
.27: The suppression of error	222
.28: A behavioral vector	227
.29: The behavioral function	237
.30: The direction of behavior	247
.31: Expectations	258

VOLUME TWO

.32: An atomic system's power	354
.33: Behavior: the use and generation of power	356
.34: The emergence of rationality	360
.35: The value of power gains and losses	361
.36: Shifts in behavior and in marginal yields	363
.37: Behavior: adaptation and the search for equilibrium	367
.38: Altruism	372
.39: Language, awareness, and the expression of attitudes	377
.40: Myth, taboo, and science	378
.41: Explanandum, explanans, and indicator	388
.42: Correlates of (attitudinal) information	389
.43: Body and soul	394
.44: An iso-power surface	434
.45: Interaction and intercourse	557
.46: Intercourse and communication	559
.47: Social spaces and universe	561
.48: A social system as a local density of intercourse	562
.49: The complexity of intercourse	566
.50: Levels of social analysis and an indication of relevant problems and phenomena	576
.51: The volume and nature of intercourse	579
.52: Synoecy	580
.53: One system's overall impact upon another	585
.54: Intercourse and the acquisition of information	588
.55: The systemic nature of intercourse	595
.56: The value of our fellows	597
.57: The basic law of social life -1	604
.58: Transactions: the central variables	607
.59: The basic law of social life -2	612
.60: Dependence and the force of transactions	616
.61: The distance notion	622
.62: The composition of a dependence relation	627
.63: System and structure	635
.64: Density, affinity, and homogeneity -1	641
.65: Density, affinity, and homogeneity -2	643
.66: Complementarity	648

.67: Uncertainty and intercourse	655
.68: Communication: What do we pick up?	662
.69: Co-evolution and culture	669

VOLUME THREE

.70: Sources of change: endogenous and exogenous	851
.71: Nature, population, technology, and society	863
.72: Social process and process outcome	869
.73: A chain of social processes	876
.74: The intensity and yield of social action: a sketch	880
.75: Process outcomes	882
.76: Social stability	884
.77: Disturbing social equilibrium	886
.78: The social process as an information producing device	894
.79: The social consequences of uncertainty	895
.80: The sources of uncertainty	900
.81: Information, intercourse, and information	906
.82: Perturbation, system density, stability, and adaptation	909
.83: Synoecy: a spatial representation	912
.84: Complementarity, affinity, and homogeneity	917
.85: The preconditions of synoecy	919
.86: The randomness of first encounters	924
.87: Synoecy: positive feedback effects	926
.88: Synoecy: negative feedback effects	933
.89: System structure and the nature of feedback	936
.90: Forms of deterrence	946
.91: The (in)stability of deterrence	947
.92: Anger, hate, and xenophobia	949
.93: Escalation	952
.94: The speed and scope of escalation	956
.95: The dissolution of the leadership	958
.96: Escalation and de-escalation	959
.97: Causes of perturbation: long-term and short-term	963
.98: System and subsystems	969
.99: Types of stability	971

100: A system's degree of stability	973
101: Increasing system stability	975
102: Steering and stability	977
103: Steering, coordination, and information	981
104: Stability, steering, and adaptation	982
105: Homeostasis	984
106: Structure and steering	987
107: Representation and execution	993
108: Processes and equilibria at different system levels	994
109: Integration and societal evolution	1137
110: Regulation, institutionalization, and culture	1143
111: The main components of human culture	1147
112: The capacity of a social system	1153
113: Legitimacy and capacity	1156
114: Culture and capacity	1160
115: System evolution as a multi-level process	1164
116: System (dis)integration as a response to change	1169
117: The dynamics of (dis)integration: an overview	1171
118: System capacity, density, and adaptation to change	1172
119: Integration as a self-propelling process	1174
120: System integration and subsystem adaptation	1181
121: System integration and the supersystem	1188
122: Integration, aggression, and conflict	1191
123: Subsystem integration, system, and supersystem	1193
124: Integration is contagious	1196
125: Survival amidst competitive predators	1198
126: Rules: articulation and effectiveness	1211
127: Regulation and information	1215
128: Obedience to the law	1219
129: The legitimacy of the law	1221
130: The dynamics of law enforcement	1226
131: Emergence and development of the law	1231
132: Rules as evolutionary phenomena	1234
133: Culture and structure	1254
134: Culture: regulation and adaptation	1256
135: The creation, reception, and learning of culture	1257
136: The evolution of culture	1259
137: Cultural revolutions	1265

138: Culture: order out of chaos	1267
139: Collective behavior	1280
140: Collective behavior, division of labor, and information	1283
141: The power of compound social systems	1287
142: The goals of compound social systems	1290
143: Leadership and collective behavior	1296
144: The organization of collective action	1298
145: The size, composition, and goals of a joint enterprise	1302
146: The evolution of collective behavior	1306
147: Forms of government: the main variables	1316
148: Democracy and autocracy	1318
149: The structure of representation	1322
150: System size and complexity, representation, and the generation of support and compliance	1325
151: Democracy and adaptability	1327
152: The preconditions of democracy	1338
153: Democracy and democratic values	1349
154: The evolution of democracy	1351
155: The development of political parties	1358
156: The creation of order by man and society	1369
157: Order, productivity, and adaptability in man and society	1379
158: Mass society	1386
159: The growth of Leviathan	1393
