<i>List of Tables and Figures</i>	x
<i>Preface</i>	xiii
1 Introducing the Case Studies	1
Constructing an analysis	3
Concepts in benefit evaluation	9
Identifying costs	12
Discounting costs and benefits	17
Discount rate alternatives	19
Does precision matter?	27
Presenting the results	30
Case study emphasis	35
Notes	35
Bibliography	37
2 Health Care	39
Introduction	39
Cost-effectiveness and the provision of health care	41
Mudshire and Jollytown Health Authority	41
Health care outputs: beyond concern for costs	62
Conclusions	68
Notes	69
Bibliography	69
Questions for discussion	71
3 Privatising Public Sector Assets	72
The Jaguar flotation	73
Outlining the public finance consequences	74
Privatisation objectives	79
Efficiency improvement in Jaguar	81
Conclusion	89
Annex Outline of typical steps to privatisation	90
Notes	94

Bibliography	96
Questions for discussion	96
4 Assessing Transport Projects	98
Evaluation of some effects of transport projects	100
Examples of the evaluation of transport projects	110
Conclusion	122
Notes	122
Bibliography	123
Questions for discussion	124
5 Electricity Generation and the Case for Sizewell B	126
Introduction	126
Investment in electricity generation: the ‘economic case’	127
Non-economic factors: broadening the analysis	136
Cost–benefit analysis of proposal to build a new power station – a framework	148
Notes	157
Bibliography	157
Questions for discussion	158
6 The Trees in the Forest	159
Forestry in Great Britain	160
Costs and benefits in the 1972 Study	161
Changed assumptions	163
A commercial calculation	165
Non-monetary costs and benefits	173
Fiscal aids to forestry	181
Conclusion	184
Notes	185
Bibliography	186
Questions for discussion	187
7 Land Drainage and Irrigation	188
Introduction	188
Elements of cost and benefit	189
Objectives	191
Benefits and costs	192
Environmental effects	198
Uncertainty	200
The Yare barrier proposal	200

A case study: dam or barrier proposal	204
Conclusion	210
Notes	211
Bibliography	211
Questions for discussion	212
8 'We Need a New Computer'	214
The submission	216
Observations on the submission	220
Evaluating the benefits	226
Conclusion	238
Notes	238
Bibliography	238
Questions for discussion	239
9 The Appraisal of Private Financing	240
Public sector borrowing	241
Public sector leasing	243
Fiscal adjustments	246
Real terms	247
The method in outline: a telephone exchange	248
Rents	251
Tax incentives for capital equipment	255
A telephone exchange reconsidered	257
Corporation tax	261
Benefits of leasing	261
In conclusion: Is there a need for financing analyses?	263
Annex 1 The borrowing rate in the public sector	265
Annex 2 Paying rents in advance: adjustment factors	267
Notes	269
Bibliography	270
Questions for discussion	270
10 Some Concluding Thoughts	271
<i>Appendix Discounting Formulae and Tables</i>	274
<i>Index</i>	280

List of Tables and Figures

Tables

1.1	Possible option time patterns of initial capital costs	13
1.2	Changes in road construction prices compared with the GDP deflator	15
1.3	Cost streams for a running track	28
1.4	Benefit cost ratios and net benefits: preventing flooding in a river basin	30
1.5	Form of appraisal submission	31
1.6	Stylised example of NPV decision matrix	34
2.1	Acute bed provision on current plans, 1988 and 2001, for Mudshire and Jollytown Health Authority	43
2.2	Estimated population of MJHA, 1988 and 2001	43
2.3	Summary of costs for five options	56
2.4	Acute beds provided under identified options in MJHA	59
3.1	Jaguar summary results, 1980–4	75
3.2	Illustrative scenarios for Jaguar	76
3.3	Discounted returns from selling/not selling Jaguar	78
3.4	Jaguar shareholdings, 1985–9	82
3.5	Some financial and operating data for Jaguar, 1980–8	84
4.1	Suburban rail services in Greater Manchester: benefits and costs of retention of 25 years of improved service	114
4.2	Suburban rail services in Greater Manchester: variants on the central case	115
4.3	SCOOT system costs, original system, Southampton	121
4.4	Benefits in study area, Southampton SCOOT system	121

4.5	Costs and benefits of SCOOT system, Southampton	122
5.1	Summary of net effective costs of Sizewell B, Scenario C	131
5.2	Cost of electricity from Sizewell B, medium nuclear background, Scenario C	135
5.3	Costs of power station: central case	152
5.4	Costs of power station – decommissioning postponed to year 50	153
5.5	Costs of power station – low coal price	154
5.6	Costs of power station: low coal price/decommissioning postponed	155
5.7	Present value of costs	156
5.8	Costs of power station: effects of increased disposal and decommissioning costs	156
6.1	Appraisal of costs and revenues, coniferous silviculture	166
6.2	Cumulative discounted and thinning revenues, Sitka spruce and Douglas fir	172
6.3	1985–6 new planting in South Scotland	173
6.4	A summary comparison of effects in four silvicultural systems	178
6.5	Two-option case, weighted utility aggregates	181
7.1	Yare Barrier flood protection, costs and benefits	201
7.2	Dam or barrier proposals, pattern of costs	205
7.3	Effects of changes in agriculture	205
8.1	Option 1: Susato 7/24	220
8.2	Option 2: Scheidt-Gabrieli 3/4.36	221
8.3	Option 3: Pezel 7000	222
8.4	Option 4: Holborne 8/88	223
8.5	Option 5: Charpentier Flux 2000	224
8.6	Option 4 revised: Holborne 8/88	225
8.7	Examples of possible benefits arising from the use of new office technology	229
8.8	Computer acquisition: multi-attribute utility scoring	235
8.9	Cost-effectiveness and attribute analysis: Step One	236
8.10	Cost-effectiveness and attribute analysis: Step Two	237
8.11	Valued utility functions	237
9.1	Asset financing methods	245

9.2	Discounting a stream of rentals	254
9.3	The present value of twenty quarterly payments of £25,000 in advance	255
9.4	Tax outflows on equipment leasing	256
9.5	The extra resource costs of leasing: exchange equipment	258
9.6	Present value of initial and residual capital values	259
9.7	Telephone exchange leasing charges: short-cut method	264
9A.1	Adjustment factors	267
9A.2	Adjustment factors	268
A.1	Discount factors	277
A.2	Annuity factors	278
A.3	Equivalent annual value factors	279

Figures

1.1	Appraising a tunnel option	5
1.2	Assessing a change in consumer's surplus	10
1.3	Production, national savings and capital accumulation	23
1.4	Optimal savings rate	25
3.1	Three operating ratios for Jaguar: 1980–8 trends	88
3.2	Three operating ratios for Jaguar: 1980–4 trends	89
5.1	Factors at work in determining cost savings associated with the operation of a new power station	149
6.1	Illustrative utility functions	180
8.1	Typical procedural stages in information technology appraisal	217
8.2	Liberator payback chart	233
