

Contents

1. Introduction	1
1.1 Motivation	1
1.2 Objectives, Structure, and Summary	5
2. Modelling Credit Risk	11
2.1 Introduction	11
2.2 Definition and Elements of Credit Risk	11
2.2.1 Basic Mathematical Setup	12
2.3 Modelling Transition and Default Probabilities	14
2.3.1 Basic Mathematical Definitions	14
2.3.2 The Historical Method	15
2.3.3 The Asset Based Method	21
2.3.4 The Intensity Based Method	24
2.3.5 Adjusted Default Probabilities	29
2.4 Modelling Recovery Rates	30
3. Pricing Credit Linked Financial Instruments	33
3.1 Introduction	33
3.1.1 Defaultable Bond Markets	33
3.1.2 Pricing Defaultable Bonds - Literature Review	40
3.1.3 A New Model For Pricing Defaultable Bonds	44
3.2 The Three-Factor Model	49
3.2.1 The Basic Setup	49
3.2.2 Valuation Formulas For Contingent Claims	55
3.3 The Pricing of Defaultable Fixed and Floating Rate Debt ...	63
3.3.1 Introduction	63
3.3.2 Defaultable Discount Bonds	63
3.3.3 Defaultable (Non-Callable) Fixed Rate Debt	75
3.3.4 Defaultable Callable Fixed Rate Debt	78
3.3.5 Building a Theoretical Framework for Pricing One- Party Defaultable Interest Rate Derivatives	78
3.3.6 Defaultable Floating Rate Debt	84
3.3.7 Defaultable Interest Rate Swaps	86
3.4 The Pricing of Credit Derivatives	94

3.4.1	Introduction	94
3.4.2	Technical Definitions and Pricing Issues	100
3.4.3	Credit Options	104
3.4.4	Credit Spread Options	112
3.4.5	Default Swaps and Default Options	115
3.4.6	Other Credit Derivatives	125
3.5	A Discrete-Time Version of the Three-Factor Model	127
3.5.1	Introduction	127
3.5.2	Constructing the Lattice	127
3.5.3	General Interest Rate Dynamics	132
3.6	Fitting the Model to Market Data	133
3.6.1	Introduction	133
3.6.2	Method of Least Squared Minimization	133
3.6.3	The Kalman Filtering Methodology	136
3.7	Portfolio Optimization under Credit Risk	185
3.7.1	Introduction	185
3.7.2	Optimization	187
3.7.3	Case Study: Optimizing a Sovereign Bond Portfolio ...	193
A.	S&P's Definition of Default	205
B.	Technical Proofs	207
B.1	Proof of Lemma 3.2.1	207
B.2	Proof of Theorem 3.3.1 for $\beta = \frac{1}{2}$	212
B.3	Proofs of Lemma 3.3.1 and Lemma 3.4.2	212
B.4	Proof of Lemma 3.4.3	217
B.5	Tools for Pricing Non-Defaultable Contingent Claims	218
C.	Pricing of Credit Derivatives: Extensions	223
	List of Figures	225
	List of Tables	229
