

Contents

A. Introduction	1
B. Environmental Liability Legislation — An Overview of Selected Liability Systems	7
I. Characteristics of Different Environmental Liability Regimes ..	7
II. Environmental Liability Regimes in the United States and Japan.....	9
1. Liability for Environmental Damages in the United States ..	10
2. Liability for Environmental Damages in Japan	14
III. The Structure of the German Environmental Legislation	18
1. Legal Statutes	19
2. Statutory Instruments.....	23
3. Guiding Principles	25
IV. The Role of the Environmental Liability Act (UmweltHG).....	26
1. Liability for Pollution Damages under the Civil Code	26
2. Specific Environmental Law Statutes.....	28
3. Strict Liability under Other Specific Acts	29
V. Liability under the Environmental Liability Act (UmweltHG)..	31
1. The Scope of Liability	31
2. Proving Causation and Access to Information	34
3. Multiple Defendants	37
4. Precautionary Cover for the Liability Risk.....	38
5. Historical Damages.....	39
VI. The Provisions of the UmweltHG and the Casuistics of Environmental Pollution	40
VII. Potential Developments of Environmental Liability	45
1. Liability Provisions of the Environmental Code (UGB)	45
2. Environmental Liability in the European Union.....	47
VIII. Concluding Remarks	50

C. Fundamental Aspects of Liability — An Assessment in the View of the Coase Theorem	52
I. Economic Analysis of Liability Law: A Review of the Literature	54
1. Precautionary Incentives.....	54
2. Risk Allocation.....	57
3. The Problem of Causation	57
4. Information Requirements	58
5. Incentives to Sue, Pre-Trial Bargaining, and Settlement Behaviour	60
II. The Coase Theorem and Liability for Environmental Damages	61
1. An Illustration of the Coase Theorem for Environmental Risk.....	62
2. Relevance of the Coase Theorem for Environmental Policy	64
3. Methodological Assessment of the Coase Theorem.....	66
4. Transaction Cost Limits to Private Bargaining over Externalities	67
5. Rationale for Government Intervention.....	73
III. Reassessing the Role of Liability	76
D. Theoretical Analysis of Environmental Liability — The Case of Uncertain Causation and Imperfect Information	79
I. Enforcement of Legal Claims for Environmental Damages	79
II. Effects of the Causality Presumption of the UmweltHG in a Formal Model.....	82
1. The Basic Model.....	82
2. Comparative Static Analysis.....	87
3. Multi-Dimensional Precautionary Measures	94
4. Assessing the Precautionary Implications of the UmweltHG Causality Presumption	100
III. A General Principal-Agent Model of Environmental Liability .	102
1. The Basic Framework.....	103
2. The Optimisation Problem of the Policy-Maker.....	107
3. The Allocation of Environmental Risk.....	111

4.	The Benchmark Case of Observable Precautionary Measures	114
5.	The Case of Unobservable Precautionary Measures	117
IV.	A Simplified Principal-Agent Model of Environmental Liability	121
1.	Determination of the Optimal Liability Rule.....	124
2.	Policy Implications of the Simplified Model.....	130
V.	Scope and Limitations of the Theoretical Analysis — Implications for the Liability Debate	132
1.	Limitations of the Theoretical Framework	132
2.	Summary of the Theoretical Results.....	138
E.	The Economic Consequences of the German Environmental Liability Act — Empirical Evidence for the Chemical Industry ..	141
I.	The Event Study Methodology	143
1.	Normal Returns	144
2.	Estimation Period and Event Period	145
3.	Event Date Uncertainty	147
4.	Multivariate Regression Models.....	148
II.	Previous Event Studies on Environmental Policy Issues	150
1.	The Role of Environmental Regulation.....	151
2.	The Impact of Environmental Litigation	153
3.	Environmental Accidents	154
III.	Stock Market Response to the UmweltHG in the German Chemical Industry	155
1.	The Data	155
2.	The Legislative Process	157
3.	The Impact of Environmental Liability	159
4.	Evaluation of the Regression Results	165
IV.	Concluding Remarks	171
F.	Summary and Conclusions.....	173

Appendix	178
I. Glossary of the Legal Terminology	178
II. Provisions of German Legislation Relevant to Environmental Liability	179
1. The Civil Code (Bürgerliches Gesetzbuch (BGB))	179
2. Water Resources Act (WHG)	180
3. Federal Air Pollution Control Act (BImSchG)	180
4. Environmental Liability Act (UmweltHG)	181
III. EU Directive on Civil Liability for Damage Caused by Waste as Amended	185
IV. Comparative Statics of the Multidimensional Pollution Control Model under the Conditional Causality Presumption ...	190
1. Costs of Precaution	191
2. Environmental Risk	192
3. Redefinition of the Standard of Proper Operation	193
V. Limitations of the First-Order Approach	194
VI. Derivation of Some Properties of the Optimal Liability Rule....	196
VII. Monitoring Pollution Control Activities in the General Model	198
VIII. Risk Aversion on the Part of the Policy-Maker	200
IX. Tables	201
References	203
Index	222

List of Tables

Table 1 —	Criminal Offences against the Environment, 1981–1993	21
Table 2 —	The Structure of Environmental Law in Germany.....	23
Table 3 —	Selected Statutory Instruments	24
Table 4 —	The UmweltHG in the Light of the Casuistics of Environmental Pollution	44
Table 5 —	The Effects of Incomplete Information on Bargaining Efficiency.....	73
Table 6 —	Pareto-optimal Allocation of Environmental Risk.....	114
Table 7 —	Summary of Previous Event Studies on Environmental Issues.....	152
Table 8 —	Calendar of Events, November 1986–January 1991.....	157
Table 9 —	Estimates of the Impact of the Revision of Environmental Liability on the Chemical Industry’s Specific Return Component, October 1981–December 1990.....	162
Table 10 —	Estimates of the Impact of the Revision of Environmental Liability on the Chemical Industry’s Market-Dependent Return Component, October 1981–December 1990.....	164
Table 11 —	Tests of the Adequacy for the Market Model, 1981–1990	167
Table A1 —	Selected Federal Environmental Legislation in Germany.....	201
Table A2 —	Firms Included in the Portfolio for the Chemical Industry	202

List of Figures

Figure 1 — Environmental Risk and the Coase Bargaining Solution.....	62
Figure 2 — Different Types of Stochastic Influence Factors.....	80
Figure 3 — Causality Presumption under the UmweltHG.....	84
Figure 4 — Imperfect Observability of Precaution.....	85
Figure 5 — The Role of the Standard of Proper Operation	90
Figure 6 — The Role of Differing Degrees of Uncertainty	92
Figure 7 — Overall Impact of the Causality Presumption in the Multi- dimensional Precaution Case	98
Figure 8 — Stylised Timing of Liability in a Principal-Agent Model	104
Figure 9 — The Impact of Precautionary Effort on the Probability Dis- tribution of Environmental Damages.....	108
Figure 10 — Optimal Liability Share in the Linear Principal-Agent Model.....	128
Figure 11 — Estimation Period and Event Period	145
Figure 12 — Rates of Return to the Chemical Industry and the Market Index, 1981:10–1990:12.....	168
Figure 13 — Relationship between Rates of Return to the Chemical Industry and the Market Index, 1981:10–1986:10.....	170
