<b>1</b>	<b>An Economic Analysis of Schooling</b>	<b>1</b>
1.1	The Issue	1
1.2	Overview	4
<b>2</b>	<b>The Quality of Human Capital and Economic Development</b>	<b>8</b>
2.1	The Measurement of Human Capital in Growth Empirics	8
2.2	The Specification of the Stock of Human Capital	10
2.2.1	A Review of Human Capital Specification in Growth Research	10
2.2.2	Human Capital Specification: A Critique and Two Extensions	20
2.2.3	Comparison of the Different Human Capital Measures	29
2.3	Quality-Adjusted Human Capital and Economic Development	33
2.3.1	Two Theoretical Views on Human Capital and Economic Development	34
2.3.2	Worldwide Development Accounting Results	37
2.3.3	Evidence on the Residual	42
2.3.4	Data Recording Errors versus Specification Errors	46
2.4	The Benefits of High-Quality Education	48
2.5	Appendix: Human Capital Data and Detailed Results	51
<b>3</b>	<b>The Missing Link between Expenditure and Schooling Quality</b>	<b>58</b>
3.1	Within-Country Cross-Section Evidence: A Survey of the Literature	59
3.1.1	The Concept of the Education Production Function	59
3.1.2	Conventional Within-Country Estimates from the United States	61
3.1.3	Recent Research on Resource Endogeneity	66
3.1.4	Evidence from Developing Countries	75

3.2	International Cross-Section Evidence	79
3.2.1	Evidence from Previous Cross-Country Tests of Student Performance	79
3.2.2	International Variation in Expenditure and TIMSS Results	80
3.3	Within-Country Time-Series Evidence	84
3.3.1	Changes in the Educational Input-Output Relationship over Time	84
3.3.2	Schooling Expenditure over Time	86
3.3.3	Schooling Quality over Time	99
3.3.4	The Time-Series Evidence on Expenditure and Quality in Schooling	105
3.4	The Missing Resource-Performance Relation in Schooling	109
3.5	Appendix	110
3.5.1	Data on Schooling Expenditure, Deflators, and Student Achievement	110
3.5.2	Differences to Previous Time-Series Results for the United States	122
<b>4</b>	<b>Modeling the Production of Schooling Quality</b>	<b>124</b>
4.1	Incentives in the Public Schooling System: A Principal-Agent Problem	124
4.2	Institutional Economics Applied to the Schooling Sector	127
4.2.1	The Role of Institutions in the Schooling System	127
4.2.2	Agency Problems and Inefficiencies in Schooling	128
4.3	A Basic Model of Educational Production in Schools	131
4.3.1	The Education Production Function	132
4.3.2	Student Maximization	134
4.3.3	Government Maximization	135
4.3.4	Equilibrium	136
4.4	Institutions, Incentives, and Schooling Quality	138
4.4.1	Central Examinations	139
4.4.2	Distribution of Responsibilities between Schools and Administration	142
4.4.3	Distribution of Responsibilities between Administrative Levels	145
4.4.4	Teachers' Influence	146

4.4.5	Parents' Influence	148
4.4.6	Private Schools	149
4.5	Towards a Model of the Schooling System	151
<b>5</b>	<b>The Link between Institutions and Schooling Quality</b>	<b>154</b>
5.1	International Evidence on Institutions and Student Performance	154
5.2	The International Micro Database Based on TIMSS	156
5.2.1	The TIMSS International Student Achievement Test	157
5.2.2	Test Scores in Mathematics and Science as Performance Measures	159
5.2.3	Data on Student Background, Resources, and Institutions	161
5.2.4	Data Imputation	161
5.3	Econometric Issues in Estimating Micro Education Production Functions	163
5.3.1	Micro Education Production Functions	163
5.3.2	Consequences of Hierarchically Structured Survey Data	164
5.4	Microeconomic Results	170
5.4.1	Family Background and Resource Effects	170
5.4.2	Institutional Effects: TIMSS Evidence	177
5.4.3	Institutional Effects: OECD Evidence	183
5.4.4	Summary and Robustness of Microeconomic Results	190
5.5	Understanding Cross-Country Differences in Student Performance	193
5.5.1	Macro Education Production Functions	193
5.5.2	Country-Level Results	194
5.6	Institutions Matter	197
5.7	Appendix: The International Micro Student Performance Database	198
<b>6</b>	<b>Implications for Schooling Policy</b>	<b>206</b>
6.1	Ensuring High-Quality Schooling as Growth Policy	206
6.2	Making Good Use of the Money	207
6.3	Incentive-Based Institutional Reforms	209
	<b>References</b>	<b>214</b>
	<b>Index</b>	<b>226</b>

## List of Tables

<i>Table 2.1:</i> Correlation between Different Measures of Human Capital	33
<i>Table 2.2a:</i> Human Capital and Economic Development: World Evidence, Covariance Measure	39
