<i>List of figures</i>	vi
<i>List of tables</i>	viii
<i>List of abbreviations</i>	xi
<i>Preface</i>	xiii
1 From intellectual property to intellectual capitalism	1
2 Philosophy and history of intellectual property	17
3 Patents and intellectual property: a general framework	55
4 The technology-based firm: a general framework	107
5 Japanese patenting – an overview	134
6 Technology and commercialization strategies	176
7 Intellectual property policies and strategies	209
8 Intellectual property organization and management	256
9 Analysis of patent information	289
10 Intellectual capitalism and beyond	318
<i>Appendix 1 Japanese and Swedish corporate patenting – a comparative analysis</i>	357
<i>Appendix 2 The conduct of the questionnaire survey</i>	373
<i>Appendix 3 Interview questionnaires</i>	405
<i>Appendix 4 Approximate confidence limits</i>	407
<i>Glossary</i>	409
<i>References</i>	421
<i>Index of names</i>	449
<i>Index of subjects</i>	455

# Figures

---

3.1	Life cycle of a hypothetical product with annual cash flows	60
3.2	Corporate income growth through new products	61
3.3	Examples of cash-flow curves for new products	62
3.4a	Two extreme models of the innovation process – the traditional views	64
3.4b	Interactive model of the innovation process	64
3.5	Overview of buyer and seller diffusion processes on the market for a new product	68
3.6	Buyer and seller diffusion with temporary monopoly	70
3.7	The socio-economic contract nature of a patent	72
3.8	Time concepts in innovation and imitation	74
3.9	Economic value arising from licensing a patent	75
3.10	A valuation and pricing model for patents and licences	81
3.11	Value of patent protection of an innovation (simple case of a minor cost-reducing innovation with linear demand curve and constant marginal cost)	99
4.1	Acquisition and exploitation of a firm's resources	114
4.2	Generic strategies for acquisition and exploitation of technology	120
4.3	IPR status in various parts of a new technology or research field	121
4.4	Shifts in the resource and business bases over time	122
4.5	Shifts in the resource/business matrix over time	123
4.6	Types of strategies for the technology-based firm	130
5.1	Patent quality in different industries and countries, 1978–1990 (three-year moving average)	153
6.1	Diversification processes utilizing technological economies of scale and scope	194
6.2	Different diversification patterns (paths) in general	195
6.3	Progress of Canon's diversification	196
6.4	Technology-related product diversification in the Canon case	197
7.1	Various patent strategies in technology space	220
7.2	Sporadic patenting in the product business development process	222
7.3	Continuous patenting and build-up of patent portfolio	223
7.4	Patenting strategies in the case of competing product generations	224
7.5	Strategic patent searching at Toshiba	230

7.6	Response strategies when confronting a blocking patent	232
7.7	Typical patent clearance procedure in Toshiba	233
7.8	Typical patent enforcement procedure in Toshiba	235
7.9	Summary of technology and patent strategies	236
7.10	Technology scanning and secrecy strategies in general	240
7.11	Building separate corporate and business images (CIs, BIs) versus joint CI/BI-building	245
7.12	Total value of an IP portfolio	250
8.1	Toshiba IP organization (as of 1995)	270
8.2	Toshiba IP division (as of 1995)	271
8.3	IP management in Hitachi	273
8.4	Organization of Hitachi's corporate IP department	274
8.5	Representative organization of a corporate IP department in a large Japanese chemical corporation	275
8.6	An IP organization model representative of a large Japanese chemical corporation	276
8.7	Hitachi's 'PAS System' (patent strategy system)	277
9.1	Examples of techno-economic mappings	298
9.2	A framework for techno-economic analysis at company level (with two business areas)	300
9.3	First patent map (published by JPO)	304
9.4	Example of patent network map	308
9.5	Example of patent-by-country map	309
9.6	Example of patent-by-technology map	310
9.7	Example of patent-to-product map	311
9.8	Patent review structure in Toshiba	314
9.9	Hitachi's patent information control system	315
A.1.1	The growth of patent portfolios (number of granted patents) in Swedish and Japanese companies (EPO), 1981–1991	366

# Tables

---

1.1	The top ten corporations in terms of number of US patents granted	5
1.2	Largest patent infringement damages in the USA (up to 1995)	6
1.3	World's most highly valued trademarks	9
1.4	Intellectual capital in the world's most valued companies	11
1.5	Overall design of the main empirical study and purpose of sub-studies	14
2.1	Chronological overview of major events in development of IP legislation	28
2.2	Eras in the history of patents and IP	33
2.3	Chronological overview of major events in US IPR development	36
3.1	General types of innovations	57
3.2	Illustration of key phases, decisions and events in the innovation process	66
3.3	Principal advantages and disadvantages of the patent system	84
3.4	Academic writers of patent articles in the <i>Social Science Citation Index</i> , 1990–1995	88
3.5	Academic works most cited in patent articles in the <i>Social Science Citation Index</i> , 1990–1995	89
3.6	Journals with most cited patent articles in the <i>Social Science Citation Index</i> , 1990–1995	89
4.1	Resource categories of a firm	113
5.1	Chronology of the evolution of the Japanese IPR system until 1980	138
5.2	Chronology of the evolution of the IPR system in Japan and the USA, 1980–1995	141
5.3	Comparison of patent laws in Japan, Europe and the USA (as of 1997)	144
5.4	Strength of patent system in Europe, Japan and the USA as perceived by large Japanese corporations, 1992	147
5.5	The development of international patenting in various countries (average annual percentage change)	149

5.6	The average annual percentage change in the USA of patenting by different countries and industries, 1978–1991	150
5.7	The share by different countries and industries of the amount of US patents granted in 1978 and 1991	151
5.8	R&D structure in large Japanese corporations	155
5.9a	Patenting in large Japanese corporations	156
5.9b	Patenting in large Japanese corporations	157
5.10	Infringements and litigations in large Japanese corporations	158
5.11	Sensitivity of the R&D investments of large Japanese corporations to patent protection time, 1992	159
5.12	Patent trend assessments in large Japanese corporations, 1987–1992	160
5.13	Approval rates of patent applications	164
5.14	Quality indicators of Japanese and Swedish patents	165
5.15	Most important factors behind increased importance of patenting	166
6.1	Advantages and disadvantages of early and late movers on markets	178
6.2	Strategies for acquisition of technological capabilities in large Japanese corporations	181
6.3	Strategies for commercializing technological capabilities in large Japanese corporations	183
6.4	Means for commercializing new product technologies	184
6.5	Means for commercializing new product and process technologies in large Japanese corporations, 1992	185
6.6	Means for protecting new product technologies from being copied as perceived by large Japanese corporations	187
6.7	Limitations to profit from innovation (commercializing new technologies) in large Japanese corporations	189
6.8	Limitations of patents for technology protection in large Japanese corporations	190
6.9	Common features of technology exploitation in Japan	191
7.1	Advantages and disadvantages of patenting in large Japanese corporations	211
7.2	Stages in the evolution of corporate IP policies	216
7.3	Example from Hitachi of patent policy and objectives	229
7.4	Importance of secrecy and technology scanning strategies in large Japanese corporations	238
7.5	Analysing the business element – IP connections	249
8.1	Japanese corporations with most patent employees, 1991	258
8.2	Patent and R&D resources in large Japanese corporations	259

8.3	Key historic events in Toshiba's corporate, technology and IP organization	268
8.4	Toshiba's patent education system (as of 1995)	272
8.5	The evolution of the corporate patent organization	286
9.1	Comparison of technical information carriers	292
9.2	Patent information for technology and competitor analysis	296
9.3	Example of invention-to-product matrix	312
10.1	Indicators of the growing importance of intellectual capital	324
10.2	Comparison of IP regimes in science and in technology	347
10.3	Characterization of some authors on the future of capitalism	349
A1.1	Patenting activities by Japanese corporations in Europe and the USA	361
A1.2	Patenting activities by Swedish corporations in Europe and the USA	363
A1.3	Comparison of corporate patenting activities in Europe and the USA	365
A2.1	List of Japanese and Swedish corporations participating in the survey study	374
A4.1	Approximate 95 per cent confidence limits based on $t$ -test of group comparisons with unit variance and sample sizes $n_1$ and $n_2$	407
A4.2	Approximate 95 per cent confidence limits based on $t$ -test of mean estimates from $n$ observations with unit variance	407
