

TABLE OF CONTENTS

Chapter 1

CLIMATE CHANGE : DESIGNING A TRADEABLE PERMIT SYSTEM

INTRODUCTION

by Tom Jones and Jan Corfee-Morlot

BACKGROUND	13
WORKSHOP DESIGN	14
RESULTS	14
CONCLUSION	19

Chapter 2

PHASING DOWN LEAD IN GASOLINE IN THE U.S.: MANDATES, INCENTIVES, TRADING, AND BANKING

by Barry D. Nussbaum

ABSTRACT	21
INTRODUCTION	21
"BUBBLES" -- GENERAL PRINCIPLES	22
Purposes of bubble regulations	22
Elements of a bubble	22
Enforcement considerations	23
THE CASE OF LEAD	23
History and background	23
Types of refineries	24
The lead bubbles	26

How well it worked 29

CONCLUSIONS 33

 Summary 33

 Extensions to the global warming problem 34

NOTES 34

Chapter 3

**CALIFORNIA'S TRADEABLE EMISSIONS POLICY
AND ITS APPLICATION TO THE CONTROL OF GREENHOUSE GASES**

by John P. Dwyer

INTRODUCTION 35

THE EVOLUTION OF CALIFORNIA'S TRADEABLE EMISSIONS PROGRAMME 36

 Federal tradeable emissions policy 36

 The development of California's policy 38

ADMINISTRATION OF CALIFORNIA'S EMISSIONS TRADING PROGRAMME 39

 South Coast Air Quality Management District (SCAQMD) 39

 Bay Area Quality Management District (BAAQMD) 42

EVALUATION OF CALIFORNIA'S EMISSIONS REDUCTION TRADING POLICY 43

 Political constraints 43

 Market performance 44

RECOMMENDATIONS FOR A GREENHOUSE GAS EMISSIONS TRADING SYSTEM 47

 Practical constraints on the greenhouse gas emissions

trading market	47
Creating an emissions trading market for greenhouse gases	48
CONCLUSION	51
NOTES AND REFERENCES	52

Chapter 4
THE U.S. ACID RAIN CONTROL ALLOWANCE TRADING SYSTEM
 by Nancy Kete

ABSTRACT	69
INTRODUCTION	69
EVOLUTION OF U.S. ACID RAIN CONTROL POLICY	72
TARGETS AND TIMETABLES IN THE U.S. ACID RAIN CONTROL PROGRAMME	78
AFFECTED SOURCES AND OTHER PARTICIPANTS	80
MECHANICS OF THE ALLOWANCE TRADING SYSTEM	82
TECHNICAL AND ADMINISTRATIVE CONTROL MECHANISMS	85
SOCIAL EQUITY -- ALLOWANCE ALLOCATIONS AND COAL MARKET IMPACTS	87
SUMMARY AND CONCLUSIONS	91
Summary	91
Lessons for a greenhouse gas control strategy	92
NOTES AND REFERENCES	93

Chapter 5

DEVELOPING PROPERTY RIGHTS AS INSTRUMENTS OF NATURAL RESOURCES POLICY: THE CASE OF THE FISHERIES

by Peter H. Pearse

ABSTRACT	99
INTRODUCTION	99
EMERGENCE OF PROPERTY IN NATURAL RESOURCES	100
EVOLUTION OF RIGHTS TO FISH	101
OVEREXPANSION AND OVERFISHING	101
LIMITING ACCESS	103
"STINTING" THE RIGHTS TO FISH	104
NEW ZEALAND'S QUOTA MANAGEMENT SYSTEM	104
LESSONS FROM THE FISHERIES	105
Introducing defined rights	105
Specification of quotas	106
Legal implications	107
Setting standards of performance	107
THE NEXT STEP: SELF-REGULATION	108
CONCLUSION	109
REFERENCES	110

Chapter 6
TRADEABLE CREDITS: VARIANTS FOR THE TRANSPORT SECTOR
by **Stuart R. Taylor**

INTRODUCTION	113
HOW THE SYSTEM WOULD WORK	113
A NUMERICAL EXAMPLE	117
CONCLUSIONS	125

Chapter 7
INCENTIVES TO ADDRESS GLOBAL WARMING: SHARING THE RESPONSIBILITY
by **Bunli Yang and Arthur Rosenfeld**

ABSTRACT	127
INTRODUCTION	127
AN ALTERNATIVE TO "LIMITS"	129
A STRATEGY OF TRADEABLE WARMING CREDITS	129
EXTENDING TRADEABLE WARMING CREDITS TO THE REST OF THE WORLD	131
POLICY EFFECTS	132
NEXT STEPS	134
REFERENCES	135

Chapter 8
GREENHOUSE GAS EMISSIONS TRADING: DEFINING THE COMMODITY
by Rob Swart

ABSTRACT	137
INTRODUCTION	137
OPTIONS FOR TRADING SCHEMES	138
National, international and multisectoral schemes	138
Emissions permits, offsets or credits	140
DEFINING THE COMMODITY	141
Selecting criteria	141
Emissions of fossil fuel-related carbon dioxide	142
Fossil carbon dioxide emissions and biotic sinks	144
Total net emissions of carbon dioxide	147
A comprehensive approach to emissions	150
Products or product inputs	159
CONCLUSIONS AND RECOMMENDATIONS	161
REFERENCES	166

Chapter 9
PARTICIPATION, ALLOCATION AND ADAPTABILITY IN INTERNATIONAL
TRADEABLE EMISSION PERMIT SYSTEMS FOR GREENHOUSE GAS CONTROL
by Michael Grubb and James K. Sebenius

BACKGROUND	169
Introduction	169
Preliminary observations	169
Criteria for an effective ITEPS	170

PARTICIPATION ISSUES	172
Participation and emission levels	172
Making an ITEPS "worthwhile": market efficiencies, and trading arrangements	174
Cartelization	174
Inducements for participation	175
 PERMIT ALLOCATION	176
Introduction	176
Emissions accounting	177
"Pure equity" rationales	178
"Burden formulae" and piecemeal allocations	183
Single-measure allocative options	185
Mixed and transitional allocation systems	190
 EVOLVING A WORKABLE SYSTEM	192
Permit duration, flexibility, and the operation of overlapping permits	192
Permit definition and target revision	193
Adding new sources and sinks	195
Geographical expansion: the technical issues	198
Geographical expansion: incentives and offsets	200
 CONCLUSIONS	202
 NOTES	203
 REFERENCES	204

Chapter 10
TRADEABLE EMISSION PERMITS FOR CONTROLLING GREENHOUSE GASES
AND COMPLEMENTARY POLICIES

by Ernst Mohr

INTRODUCTION	207
A TRADEABLE PERMIT SYSTEM FOR CO ₂	208
CO ₂ coupons	210
Controlling CO ₂ emissions over time	211
Initial distribution of emission rights	211
The permit base	211
The licensee	212
End-of-pipe technologies	212
The permit system in the Common Market	212
Evaluation	212
RESOLVING THE NO _x CASE	213
COMPLEMENTARITY IN AIR POLLUTION POLICY	217
COMPLEMENTARITY IN ENERGY POLICY	218
THE SCOPE FOR EXTENDING THE COUPON SYSTEM BEYOND CO ₂	220
CFC11 and CFC12	220
N ₂ O	221
CH ₄	222
SUMMARY	224
NOTES	225
REFERENCES	227

Chapter 11
MONITORING AND ENFORCING GREENHOUSE GAS TRADING
by Daniel J. Dudek and Tom Tietenberg

INTRODUCTION	229
Greenhouse gas emissions trading	230
Structure of the trading programme	230
Comprehensive versus CO ₂ trading	232
Stringency of control objectives	232
Trading rules	233
Intertemporal trading and banking	233
MONITORING	234
Emissions	234
Fossil fuel related emissions	237
International data reporting and management	237
ENFORCEMENT	241
Montreal Protocol	241
Economic sanctions	241
Market discounting	241
Penalties	242
Private enforcement	244
CONCLUSIONS	246
NOTES	247
REFERENCES	249
APPENDIX	253
