Foreword by Federico Mayor, Director General, Unesco	x
Preface	xii
Contributors	xiv
1 Exploring Uncommon Ground: Sustainability and the Social Sciences	I
EGON BECKER, THOMAS JAHN AND IMMANUEL STIESS	
Social sciences and the debate on sustainable development /1 Analytical, normative and political implications of sustainability /4 Towards a working definition of sustainability /6 A social trajectories view for discourse-oriented policies /8 Reorienting the social sciences /10 Making the research process more inclusive /12	
PART I	
Sustainability: Its Cognitive Power for Emerging Fields of Knowledge	23
2 Social Sustainability and Whole Development: Exploring the Dimensions of Sustainable Development	25
IGNACY SACHS	
From economic growth to 'whole' development /28 The controversy over growth /30 Partial sustainabilities and whole sustainability /31	
3 Sustainability and Territory: Meaningful Practices and Material Transformations	37
HENRI ACSELRAD	
Environment and territory in the social sciences /39 Sustainability and socio-political contexts: actors and projects in the hegemonic struggle /44 Sustainability as an object of symbolical struggle /49 Final considerations /55	

- 4 Sustainability and Sociology: Northern Preoccupations 59  
 MICHAEL REDCLIFT  
 Sustainable development /59 The limitations of social constructionism /64 Beyond the bounds of social construction /66 Sustainability indicators /68 Ecological modernization /70 Conclusions: modernity and sustainability /72
- 5 Towards Sustainable Subjectivity: A View from Feminist Philosophy 74  
 ROSI BRAIDOTTI  
 Towards an inclusive definition /74 Background: the WED debate /75 Postmodernity /80 Philosophical critiques of humanism /83 The social imaginary /86 Sustainable subjectivity /87 Memory /91 The imagination /92 Conclusion /93
- 6 From Experience to Theory: Traditions of Social-ecological Research in Modern India 96  
 RAMACHANDRA GUHA  
 The environment debate in contemporary India /97 Styles and trends in research /100 From experience to theory /103 The unfinished business of social ecology /107
- 7 The Socio-ecological Embeddedness of Economic Activity: The Emergence of a Transdisciplinary Field 112  
 JUAN MARTINEZ-ALIER  
 Some ecological distribution conflicts /115 International externalities /119 Ecologically unequal exchange /121 Physical indicators and historical time /123 Environmental indicators /126 Some theories and methods in ecological economics: a tentative classification /132 'Orchestration of the sciences' /136
- PART II
- Towards Defining, Measuring and Achieving Sustainability: Analytical Approaches of the Social Sciences 141
- 8 The Political Logic of Sustainability 143  
 NAZLI CHOUCRI  
 Introduction /143 New thinking on sustainability /146 Political logic of sustainability /151

- 9 Economic Concepts of Sustainability: Relocating Economic Activity within Society and Environment 162  
JOHN GOWDY  
Economic concepts of sustainability /163 Economics in context: hierarchies in human and natural systems /170 Hierarchies and the value of the environment: the example of biodiversity /172 Putting theory into practice: a framework for valuation /177
- 10 Sustainability from a Feminist Sociological Perspective: A Framework for Disciplinary Reorientation 182  
MARGRIT EICHLER  
Existing definitions of sustainability /183 Three commonly held views /183 What contribution – if any – can sociology make to sustainability? /189 Equity and gender /192 What contribution – if any – can feminism make to sustainability? /197 Is there a definition of sustainability that is useful for sociology? /197 What organizational changes would be necessary to redirect sociology? /201 The potential conflict between a unifying framework and the conceptual and theoretical foundations of the social sciences /203 Prospects for the future /204
- 11 Territory, Scale and Sustainable Development 207  
CARLOS E. REBORATTI  
One term, many ambiguities /207 The analytical dimension /208 The normative dimension /210 From concepts to action: the political dimension /211 Scientific disciplines and transdisciplinary concepts /214 The society–nature relationship: a fresh perspective on sustainable development? /215 Society, environment and sustainability /217 Problems of territorial and temporal scales in the conceptualization of sustainable development /219 From a concept to an agreement /221
- 12 Psychological Perspectives on Sustainability 223  
CAROL M. WERNER  
Relevant topics in environmental psychology /223 Psychological research on sustainability /224 Holistic programmes /236 Community activism and empowerment /238 Spanning disciplinary boundaries /240 What can psychology learn? /242 Conclusion /242

13	Towards Defining, Measuring and Achieving Sustainability: Tools and Strategies for Environmental Valuation	243
	ROBERT PAEHLKE	
	Defining sustainability /243 Measuring sustainability /250 Achieving sustainability /259	
	PART III	
	Perspectives: Creating Networks for Sustainability	265
14	Dance with Wolves? Sustainability and the Social Sciences	267
	MICHAEL REDCLIFT	
	Epistemologies and cultures /267 Sustainability and the refashioning of environmental problems /269 Incorporating 'users' into sustainability research /271 Conclusion /273	
15	Innovations in Uses of Cyberspace	274
	NAZLI CHOUCRI	
	Cybersystems and cyberspace /274 Global system for sustainable development (GSSD) /275 Social sciences and cyberspace /279	
16	Fostering Transdisciplinary Research into Sustainability in an Age of Globalization: A Short Political Epilogue	284
	EGON BECKER	
	Bibliography	290
	Index	328

# Tables and Figures

## Tables

2.1	Criteria of partial sustainability	32
4.1	Weak and strong dimensions of sustainability policies	70
7.1	Ecological distribution conflicts and related resistance movements	116–17
7.2	Multi-criteria evaluation	133
8.1	New thinking on sustainability	147
8.2	The political logic of sustainability: six basic equations	155
8.3	Profile definition	158
8.4	Country profiles	159
8.5	Illustrative profiles at different time periods	160
15.1	Guide to core concepts: population	280–2

## Figures

7.1	The economy embedded in social institutions and in the ecosystem	113
8.1	Sustainable development as an integrated dynamic process	148
8.2	The political logic of sustainability	156
8.3	GNP and commercial energy use	157
10.1	The dominant view of sustainable development	198
10.2	An alternative view of sustainable development	200
15.1	Knowledge content base nature of GSSD	276
15.2	Strategic framework	276
15.3	From activities and conditions to sustainability problems	278
15.4	Global sustainability strategies	283
