<b>1</b>	<b>Introduction: Integrated Macrodynamics</b>	<b>1</b>
<b>I An Overview on Foundations and Perspectives</b>		
<b>2</b>	<b>Disequilibrium, Growth and Labor Market Dynamics: Foundations</b>	<b>13</b>
2.1	Introduction . . . . .	13
2.2	Effective demand, employment and nominal adjustments . . . . .	13
2.2.1	Textbook IS-LM-PC modeling . . . . .	14
2.2.2	Keynesian IS-LM-PC analysis . . . . .	15
2.2.3	Reinterpreting the IS-LM-PC dynamics . . . . .	18
2.3	Goods market disequilibrium and quantity adjustments . . . . .	23
2.3.1	An early modeling of the trade cycle . . . . .	25
2.3.2	Metzlerian inventory dynamics . . . . .	33
2.4	Labor market and real wage dynamics . . . . .	41
2.4.1	The Goodwin growth cycle model . . . . .	41
2.4.2	Debt deflation and adverse real wage adjustment . . . . .	48
2.5	Labor market, two Phillips-curves and nominal adjustments . . . . .	52
<b>3</b>	<b>Disequilibrium, Growth and Labor Market Dynamics: Synthesis and Perspectives</b>	<b>61</b>
3.1	Introduction . . . . .	61
3.2	The working KMG model of fluctuating growth . . . . .	62
3.3	Integrated macrodynamics in an open economy . . . . .	75
3.4	Microfoundations and macromechanisms . . . . .	86
3.5	Macroeconometric model building . . . . .	96
3.5.1	The national accounts of the model . . . . .	97
3.5.2	The implied CTD growth model . . . . .	101
3.5.3	The 18D core dynamics . . . . .	103

3.5.4	Numerical investigations . . . . .	106
3.6	Summary and outlook . . . . .	111
3.7	Appendices . . . . .	113
3.7.1	Notation . . . . .	113
3.7.2	The working model in extensive form. . . . .	114

## **II The Working Model: Walrasian, Non-Walrasian and New-Keynesian Reformulations**

<b>4</b>	<b>Flex-Price Approaches: Exceptional Limit Cases?</b>	<b>123</b>
4.1	Introduction . . . . .	123
4.2	Sluggish adjustments: An extended KMG reference case . . . . .	124
4.3	Substitution and endogenous technical change . . . . .	134
4.4	Market clearing: Classical real and dichotomizing nominal dynamics? . . . .	143
4.5	Market clearing: Walrasian reformulation and saddle point stability . . . . .	153
4.6	KMG equilibrium growth . . . . .	168
4.7	Summary . . . . .	178
4.8	Appendix: Labor market dynamics and classical viability . . . . .	180
<b>5</b>	<b>Fix-Price Approaches: Regime Switching Overstated</b>	<b>189</b>
5.1	Introduction . . . . .	189
5.2	A Non-Walrasian model of monetary growth . . . . .	191
5.3	From Non-Walrasian to Keynesian modeling of monetary growth . . . . .	196
5.4	Regime switching in KMG growth . . . . .	201
5.4.1	Supply bottlenecks with positive inventories . . . . .	201
5.4.2	Exhausted inventories and excessive aggregate demand . . . . .	212
5.4.3	Numerical analysis . . . . .	216
5.5	Summary . . . . .	222
5.6	Solow and Stiglitz (1968): An early Non-Walrasian contribution . . . . .	223
<b>6</b>	<b>Market Imperfections: Basic Integration and Comparison</b>	<b>229</b>
6.1	Introduction . . . . .	229
6.2	A discrete-time KMG reference case . . . . .	232
6.3	Imperfect competition: Given income distribution . . . . .	247
6.3.1	Revising the wage-price module of KMG growth . . . . .	250
6.3.2	The 2D stagflation subdynamics: Local analysis . . . . .	255

6.3.3	Global characteristics of the 2D case . . . . .	258
6.3.4	Kinked Phillips curves: 2D analysis . . . . .	260
6.3.5	4D and 6D extensions of the 2D stagflation dynamics . . . . .	265
6.4	Imperfect competition: Adjusting income distribution . . . . .	271
6.4.1	Marked up marginal wage costs . . . . .	272
6.4.2	Profit share targets . . . . .	277
6.4.3	Markup adjustments . . . . .	281
6.5	Summary . . . . .	283

### **III The Perspective: Theoretical Aspects of Modern Macroeconometric Model Building**

<b>7</b>	<b>Applied Disequilibrium Growth Theory</b>	<b>289</b>
7.1	Introduction . . . . .	289
7.2	A general framework for modeling disequilibrium growth . . . . .	293
7.2.1	The assumed structure of the economy . . . . .	293
7.2.2	The structure from the viewpoint of national accounting . . . . .	297
7.2.3	Aggregate concepts from the system of national accounts . . . . .	303
7.3	Households . . . . .	305
7.4	Firms . . . . .	317
7.5	Government and the monetary authority . . . . .	323
7.6	Quantity and price adjustment . . . . .	325
7.7	Asset market dynamics . . . . .	330
7.8	The foreign sector . . . . .	332
7.9	A summing up . . . . .	334
7.10	Macroeconometric model building of the AS-AD type: A brief comparison	338
7.11	Appendix A: Notation . . . . .	346
7.12	Appendix B: Representing technology by nested CES / CET production functions . . . . .	349
<b>8</b>	<b>Intensive Forms and Steady State Calculations</b>	<b>353</b>
8.1	Introduction . . . . .	353
8.2	The real and the financial structure of the economy . . . . .	356
8.2.1	The real sector . . . . .	356
8.2.2	The financial sector . . . . .	358
8.2.3	National accounting . . . . .	359

8.3	Intensive form of the implied 39D dynamics . . . . .	366
8.4	Steady state calculations . . . . .	374
8.5	Simplifying assumptions . . . . .	382
8.6	Intensive form of the implied 22D dynamics . . . . .	384
8.7	The steady state solution of the 22D dynamics . . . . .	393
8.8	Concluding observations . . . . .	401
<b>9</b>	<b>Ways Ahead: Analyzing Structural Macroeconometric Model Building</b>	<b>405</b>
9.1	Introduction . . . . .	405
9.2	Further simplifying assumptions . . . . .	406
9.3	The 18D core dynamics of the model . . . . .	409
9.3.1	The laws of motion . . . . .	409
9.3.2	Static relationships . . . . .	412
9.4	Steady state analysis . . . . .	414
9.4.1	Steady state equations . . . . .	414
9.4.2	Steady state comparisons . . . . .	417
9.5	Subsystem analysis and switch off/on methodology: Some examples . . . . .	418
9.5.1	The 9D real part of the economy . . . . .	418
9.5.2	A 5D KMG type subdynamics . . . . .	421
9.5.3	The 5D dynamics with a housing sector . . . . .	424
9.5.4	The 5D dynamics with Rose goods-market effects . . . . .	424
9.5.5	Nominal dynamics in the real part of the economy . . . . .	425
9.5.6	The integrated real dynamics of the economy . . . . .	426
9.6	Adding policy issues to the real dynamics . . . . .	428
9.6.1	Interest rate policy rules . . . . .	428
9.6.2	Fiscal policy rules . . . . .	430
9.6.3	Fiscal and monetary policy rules in interaction . . . . .	433
9.7	Adding asset price dynamics to the real dynamics . . . . .	435
9.7.1	Independent bond market dynamics and the real economy . . . . .	435
9.7.2	Adding exchange rate dynamics to the bond market dynamics . . . . .	435
9.7.3	Asset markets and real markets: One way routes and interactions . . . . .	437
9.8	Numerical investigations of the full 18D dynamics . . . . .	440
9.9	The Fair model for the US economy . . . . .	454
9.10	Conclusions and outlook . . . . .	465
