<b>About the Authors</b>	<b>x</b>
<b>Introduction</b>	<b>xi</b>
<b>Chapter 1 Evolution of Planning</b>	<b>1</b>
A Brief History of Planning .....	1
1.1.1 Reactive Planning .....	10
1.1.2 Types of Reactive Planning .....	12
1.1.3 Summary .....	17
Types of Domains Used In AI .....	18
Conventional Planners .....	26
1.3.1 STRIPS .....	26
1.3.2 ABSTRIPS .....	29
1.3.3 Triangle Tables .....	30
1.3.4 NOAH .....	33
1.3.5 SIPE .....	35
1.3.6 TWEAK .....	36
1.3.7 Conclusion .....	38
Pure (Hard-Wired) Reaction .....	40

1.4.1 Subsumption Architecture .....	40
1.4.2 Pengi .....	42
1.4.3 Action Networks .....	44
1.4.3 The Universal Planning Debate .....	46
Classical Real-time Planners .....	49
1.5.1 Teleo-reactive Programs .....	49
1.5.2 Situated Control Rules .....	53
1.5.3 Phoenix .....	55
Book Synopsis .....	59
<b>Chapter 2 Subsuming Planning to Reaction</b> .....	<b>63</b>
Minton's Utility Function .....	64
2.1.1 Comparison of PRODIGY EBL and Conventional EBL .....	78
2.1.2 Critique of Minton's Work .....	79
Insect Intelligence and Robotics: The Work of Rodney Brooks ...	81
2.2.1 More recent work of Brooks .....	100
2.2.2 Critique of Brooks' work .....	103
Procedural Reasoning Systems .....	104
2.3.1 Critique and Extensions to PRS .....	112
Situated Automata and Situated Agents .....	115
2.4.1 Critique of situated automata .....	121
2.4.2 Rex and Gapps .....	122
Disadvantages and Next Step .....	125
<b>Chapter 3 Integration of Planning and Reaction</b> .....	<b>129</b>
The Planning to Reaction Spectrum .....	129
The Contingency Space .....	134
The Need for Deciding Between Planning and Reaction .....	144
<b>Chapter 4 Deciding at Planning Time</b> .....	<b>147</b>
Alternative Approaches .....	148
4.1.1 The Problem .....	150
4.1.2 The Domains .....	153
4.1.3 The Agent .....	157
Empirical Approach .....	159
4.2.1 Intuitive Solution .....	162

4.2.2 The Reaction Decision Framework . . . . .	165
4.2.3 Establishing the Value of a Reaction . . . . .	185
4.2.4 The Reaction Decision Making . . . . .	191
4.2.5 Properties of the Framework . . . . .	204
4.2.6 Conditional Planning. . . . .	214
Analytical Approach . . . . .	228
4.3.1 Intuitive Solution. . . . .	230
4.3.2 The Analytical Reaction Selection Framework . . . . .	236
4.3.3 The Analytical Reaction Selection Process . . . . .	239
The Need for Good Real-time Components . . . . .	247

## **Chapter 5 Execution Time:**

### **Reacting, (Re)Planning and Deciding 253**

Anytime Algorithms . . . . .	254
5.1.1 Anytime A*—An Example of An Anytime Algorithm. . . . .	256
5.1.2 Anytime Alpha Beta Pruning . . . . .	259
5.1.3 Anytime IDA* . . . . .	262
5.1.4 The Tileworld: Conditions Affecting the Performance of an Anytime Algorithm. . . . .	263
5.1.5 Time-dependent Planning:	
A Formal Analysis of Anytime Algorithms . . . . .	266
Action-based Decision Trees. . . . .	269
5.2.1 The Action-based Decision Tree Approach. . . . .	274
5.2.2 Formal Statement of the Problem . . . . .	278
5.2.3 Example from the Aviation Domain . . . . .	284
5.2.4 Related Work. . . . .	287
5.2.5 The Action-based Decision Tree Approach. . . . .	291
5.2.6 Decision Tree Structuring Heuristics . . . . .	295
5.2.7 Example from the Aviation Domain, Part 2. . . . .	297
5.2.8 Further Work on Action-Based Decision Trees . . . . .	301

## **Chapter 6 Real-time Planning 305**

Guaranteeing Temporal Adequacy . . . . .	307
6.1.1 The Dynamic Reaction Model . . . . .	310
6.1.2 The Maruti Hard Real-time Operating System. . . . .	313
6.1.3 Implementing Dynamic Reaction on Maruti. . . . .	320

---

Building Guaranteed and Unguaranteed Plans . . . . .	330
6.2.1 The Cooperative Intelligent	
Real-time Control Architecture. . . . .	331
6.2.2 Distributed Intelligent Real-time Architectures . . . . .	345
<b>Chapter 7 Applications</b>	<b>351</b>
A Language Framework for Describing Reactive Behaviors . . . . .	352
7.1.1 Knowledge Representation Formalism . . . . .	353
7.1.2 Reactive Behaviors Representation Formalism. . . . .	363
Formalizing Reaction Decisions in Critical Domains for	
Pedagogical Purposes. . . . .	372
<b>Chapter 8 Conclusion</b>	<b>385</b>
Integration of the Ideas . . . . .	386
Language Development. . . . .	387
Integration with Existing Technologies. . . . .	387
Development of Hardware . . . . .	388
<b>Index</b>	<b>389</b>
