ABSTRACT

ACKNOWLEDGEMENTS

1. INTRODUCTION	13
1.1 Management Science Implementation	15
1.2 The Research Approach	19
1.3 The Research Framework	21
1.4 Contents	27
2. INTERACTIVE MULTIPLE CRITERIA DECISION METHODS: SURVEY - CONTINUOUS CASE	30
2.1 Introduction to Interactive Methods	30
2.1.1 Development of Interactive Methods	32
2.1.2 Applications of Interactive Mathematical Programming Procedures	44
2.2 Interactive Methods Used in this Study	48
2.2.1 Geoffrion, Dyer, Feinberg Procedure	50
2.2.2 The Zionts and Wallenius Procedure	52
2.2.3 Pareto Race/VIG	55
2.2.4 MATS	57
3. FORMULATING MACROECONOMIC POLICY USING OPTIMIZATION MODELS	59
3.1 Approaches to Optimizing Economic Policy: A Review	60
3.1.1 Tinbergen-Theil Approach	61
3.1.2 Mathematical Programming Models	63

3.1.3	Frisch's Approach	66
3.1.4	Methods of Optimal Control	67
3.2	Current Developments in Macroeconomic Policy	69
3.2.1	Trends in Macroeconomic Modeling	69
3.2.2	The Rational Expectations Controversy	71
3.3	An Interactive Multicriterion Optimization Approach to Macroeconomic Policy Formulation	74
3.4	Problem Representation	76
3.5	An Application	77
3.5.1	Background	77
3.5.2	An Experiment	80
3.5.3	Application at the Confederation of Finnish Industries	83
3.6	Further Use of the Model	89
3.7	Incorporating Multiple Decision-Makers into the Policy Formulation Process	89
3.8	Conclusion	90
4.	MULTIPLE OBJECTIVE ANALYSIS OF INPUT-OUTPUT MODELS, WITH AN APPLICATION TO EMERGENCY MANAGEMENT	94
4.1	Traditional Input-Output Analysis	96
4.2	A Multiple Objective Approach to Input-Output Analysis	98
4.3	An Application to Emergency Management	103
4.3.1	Background	103
4.3.2	Use of the System in Practice	105
4.4	Conclusion	109
5.	MANAGING MARINE POLLUTION	110
5.1	Problem Description	114
5.1.1	Background for the Experiments	119

5.2 Design of the Experiments	121
5.3 Results of the Experiments	130
5.3.1 Experiment I	131
5.3.2 Experiment II	134
5.3.3 Evolution of Subjects' Preferences	136
5.4 Conclusion	141
6. DECISION SUPPORT FOR NEGOTIATION:	
The Case of Agricultural Income Policy	144
6.1 Description of the Method	147
6.2 An Application	153
6.2.1 The Simulation Meetings	157
6.3 Conclusion	167
7. CONCLUSION	168
