PREFACE *xi*

1 SAFETY TRADITIONS AND REGULATIONS 1

The History of the Safety Movement, 2

The Development of Safety Programs, 5

The 1970 Occupational Safety and Health Act, 5

The Occupational Safety and Health Administration (OSHA), 6

The Right-to-Know Laws and SARA-III, 10

Case History 1.1 More Than Conformance Is Needed, 17

Further Reading, 26

Questions, 26

2 ACCIDENT CAUSATION 27

Heinrich's Domino Theory, 28

Human Error Model, 31

Petersen's Accident/Incident Model, 32

Epidemiological Models, 33

Systems Models, 33

Multiple Causation, 35

Summary, 35

Case History 2.1 Pointing the Way, 36

Further Reading, 39

Questions, 39

3 SAFETY: A PEOPLE PHENOMENON 40

The KISS Principle, 41

Perception: A Key Process, 42

Worker Attitudes and Perceptions of Safety, 44

Human Error, 45

Case History 3.1 Feelings and Business, 46

Case History 3.2 Choosing the Wrong Carpenter, 49

Ergonomics or Human Factors in the Workplace, 55

Case History 3.3 Anthropometry in a Hospital Chemistry Laboratory, 56

Case History 3.4 A Simple On/Off Switch Choice, 65

Case History 3.5 Who Controls? 67

Further Reading, 72

Questions, 73

4 SYSTEMS SAFETY: MANAGEMENT 74

The Tasks of Management, 75

Managerial Roles and Skills, 76

Management by Objectives, 77

Case History 4.1 High-tech Industrial Safety Management, 84

Transition in Management Theory, 86

Case History 4.2 The Alcoa Experience, 88

Behavior Management, 90

Training, 94

Case History 4.3 Training for Supervisors: The Federal Hazard Communication Law (OSHA 1910.1200), 95

Safety Committees and Safety Circles, 97

Risk Management, 99

Further Reading, 101

Questions, 102

5 SYSTEMS SAFETY: HAZARD IDENTIFICATION 103

Case History 5.1 Safety in Research, 104

Preliminary Hazards Analysis (PHA), 107

Case History 5.2 A Model for Analysis, 108

Case History 5.3 A Case for Preliminary Hazard Analysis, 109

Failure Mode and Effects Analysis (FMEA), 109

Case History 5.4 A Case for FMEAs, 110

Hazard and Operability Review (HAZOP), 110

Case History 5.5 A Case for HAZOP, 114

Human Error Analysis in Combination with Hazard Analysis, 116

Fault Tree Analysis (FTA), 116

Risk Analysis, 118

Summary, 122

Further Readings, 123

Questions, 123

6 HAZARD CONTROL 124

Case History 6.1 No Change: The Right Decision, 125

Decisions for Action, 127

Case History 6.2 The Wrong Remedy, 127

Engineering Versus Management Controls, 128

Case History 6.3 Multiple Engineering Remedies, 129

Case History 6.4 Combined Engineering and Management Remedies, 131

- Implementing Hazard Control Measures, 131
- Monitoring Remedies, 132
- Evaluating Effectiveness, 133
- Putting It Together, 133
- Wholistic Safety Programs, 134
- A Last Word, 136
- Further Readings, 137
- Questions, 137

7 MATERIAL HANDLING 138

- Lower Back Pain, 138
- The Relationship Between Lower Back Pain and Manual Handling, 140
- Manual Handling Programs to Limit Lower Back Injuries, 141
 - Case History 7.1 A Packaging Problem, 143*
- Mechanically Assisted Material Handling, 144
 - Case History 7.2 Better to Miss the Brass Ring, 148*
- Palletizing the Workload, 148
- Powered Industrial Vehicles, 150
 - Case History 7.3 A Case for Training, 152*
 - Case History 7.4 An Unplanned Task, 155*
- Automated Material Handling, 157
 - Case History 7.5 Automation Needs Ergonomics, 159*
- The Future of Material Handling, 160
- A Last Word on Material Handling, 160
- Further Reading, 162
- Questions, 163

8 MACHINERY SAFEGUARDING 164

Hazards and Machine Motion, 164

Principles of Safeguarding, 167

Task Factors, 169

Case History 8.1 Press Brake Accident, 169

Operator Factors, 171

Case History 8.2 Press Brake Accident, 171

Learning to Recognize Hazards, 171

Case History 8.3 Leather Band Buffer, 172

Some Realities in Hazard Recognition, 174

*Case History 8.4 A Case of Similar, But Different
Machines, 175*

Safeguarding, Automation, Robotics and Factories of
the Future, 175

Further Reading, 178

Questions, 179

9 FALLS 180

Slips and Falls, 181

Trips and Falls, 183

Prevention of Falls Caused by Slips or Trips, 183

*Case History 9.1 Slipping Injury in Print
Room, 184*

*Case History 9.2 Tripping Incident on Freight
Elevator, 185*

Stairway Falls, 187

Falls from Ladders, 189

*Case History 9.3 An Unnecessary Ladder
Fall, 191*

Free Falls, 192

Case History 9.4 Elevator Shaft Fall, 192

Further Reading, 193

Questions, 193

10 FIRE PREVENTION AND PROTECTION 195

Chemistry of Fire, 196

Products of Combustion, 199

Case History 10.1 Propane Fire in Warehouse, 201

Fire Development: Severity and Duration, 202

Case History 10.2 Fire Spread in Cold Storage Warehouse, 203

Effect of Enclosure and Heat Transfer in Fire Development, 206

Case History 10.3 A Challenge to the Professional Fire Investigator, 206

Fire Prevention and Protection, 210

Case History 10.4 A Hydrogen Explosion, 210

Early Detection, 211

Extinguishing Fires, 211

Case History 10.5 A Case of Liability, 213

Disaster Preparedness, 216

Electrical Safety, 217

Case History 10.6 What Can You Suspect? 220

Case History 10.7 The Wrong Wire, 221

Further Reading, 222

Questions, 223

11 INDUSTRIAL HYGIENE 224

Routes of Entry of Foreign Substances, 225

Long-term Medical Disorders and Epidemiology, 229

Industrial Solvents, 231

*Case History 11.1 A Case of Worker
Comfort, 234*

Case History 11.2 A Matter of Intake, 238

Stress and the Workplace, 240

*Case History 11.3 Distress at Evaluation
Time, 244*

Industrial Noise, 245

*Case History 11.4 A Punch Press Noise Problem,
253*

Hazardous Waste, 254

Case History 11.5 Know Your Waste, 259

Further Reading, 260

Questions, 261

12 PRODUCT SAFETY 262

The Legal System, 263

The Origins of Products Liability Laws, 264

Status of Products Liability Laws, 266

Statutory Law and Products Liability, 267

The Expert Witness in Products Liability, 269

*Case History 12.1 Kales v. Gem Wheels,
Inc., 270*

*Case History 12.2 Mahoney v. Bernardston
Chair, Inc., 273*

*Case History 12.3 Berger v. Middlesex Conveyor,
276*

*Case History 12.4 Pottle v. Foreign Motors,
Ltd, 278*

Products Liability Prevention Programs, 280

Management of Product Safety Programs, 281

Technical Requirements of Product Safety
Programs, 282

Planning for Warnings and Instructions, 287

Recall Planning and Customer Relations, 289

Summary, 290

Further Reading, 290

Questions, 291

APPENDIX A: SAFETY INFORMATION 292

APPENDIX B: PROFESSIONAL ORGANIZATIONS 294

APPENDIX C: BIBLIOGRAPHY 296

APPENDIX D: GOVERNMENT AGENCIES 301

INDEX 303
