

CONTENTS

Preface xi

Acknowledgments xiii

1. BASIC NUCLEAR MEDICINE PHYSICS	1
<i>Properties and structure of matter</i>	1
<i>Radioactivity</i>	13
2. FORMATION OF RADIONUCLIDES	24
<i>Generators</i>	24
<i>Cyclotrons</i>	28
<i>Reactors</i>	30
3. INTERACTION OF RADIATION WITH MATTER	34
<i>Interaction of photons with matter</i>	34
<i>Interaction of charged particles with matter</i>	41
4. NONSCINTILLATION DETECTORS	45
<i>Gas-filled detectors</i>	45
<i>Photographic detectors</i>	58
<i>Semiconductor detectors</i>	59
5. NONIMAGING SCINTILLATION DETECTORS	62
<i>Structure and characteristics of the crystal scintillation detector</i>	62
<i>Types of crystal scintillation detectors</i>	75
<i>Appendix</i>	77

6. IMAGING INSTRUMENTATION	78
<i>Theory and structure</i>	78
<i>Planar imaging</i>	98
7. SINGLE-PHOTON EMISSION COMPUTED TOMOGRAPHY (SPECT)	106
<i>Equipment</i>	106
<i>Acquisition</i>	109
<i>Reconstruction</i>	114
<i>Postreconstruction image processing</i>	131
8. POSITRON EMISSION TOMOGRAPHY (PET)	136
<i>Sensitivity</i>	136
<i>Resolution</i>	136
<i>Radiopharmaceuticals</i>	138
<i>Cameras</i>	141
<i>Factors affecting sensitivity and resolution of PET systems</i>	144
<i>Specialized versus hybrid machines</i>	147
9. QUALITY CONTROL	148
<i>Nonimaging devices</i>	148
<i>Imaging</i>	150
10. RADIATION BIOLOGY	164
<i>Radiation units</i>	164
<i>The effects of radiation on living organisms</i>	165
11. RADIATION DOSIMETRY	178
<i>Physical, biologic, and effective half-lives</i>	178
<i>Calculation of dosimetry</i>	178
12. RADIATION SAFETY	182
<i>Rationale</i>	182
<i>Dose limits</i>	182
<i>Methods for limiting exposure</i>	184

RECOMMENDED READING	188
APPENDIX A. COMMON NUCLIDES	189
APPENDIX B. MAJOR DOSIMETRY FOR COMMON PHARMACEUTICALS	191
APPENDIX C. SAMPLE CALCULATIONS OF THE S VALUE	193
<i>Index</i>	196
