| | | |
|-----------------|--|-----------|
| Preface | | xi |
| Acknowledgments | | xii |
| Credits | | xiii |
| Chapter 1 | A Modern Overview of Flexibility and Stretching | 1 |
| | Historical Overview | 1 |
| | Defining Flexibility | 2 |
| | The Differences Among Flexibility, Hypermobility, and Joint Laxity | 2 |
| | The Nature of Flexibility | 2 |
| | The Flexibility Training Program | 3 |
| | The Benefits of a Flexibility Training Program | 4 |
| | Summary | 9 |
| Chapter 2 | Osteology and Arthrology | 11 |
| | Classifications of Study | 11 |
| | Classification of Joints and Their Influence on Motion | 11 |
| | Types of Motion | 12 |
| | Bone Growth and Flexibility | 15 |
| | Close-Packed Position and Flexibility | 15 |
| | Summary | 15 |
| Chapter 3 | Contractile Components of Muscle: Limiting Factors of Flexibility | 17 |
| | A General Overview of Muscles | 17 |
| | Composition of Myofibrils and Their Constituents | 17 |

| | |
|---|----|
| Regions of the Sarcomere | 18 |
| Ultrastructure of the Thin Filament: Actin | 20 |
| Ultrastructure of the Thick Filament: Myosin | 20 |
| Ultrastructure of the Connecting or Gap Filament: Titin | 21 |
| Sarcomere Structural Bridges | 25 |
| The Sarcomere's Principal Structures: A Working Model | 27 |
| The Sarcotubular System | 28 |
| Theory of Contraction | 28 |
| Theory of Muscular Relaxation | 30 |
| Theory of Muscular Elongation | 31 |
| Sliding Filament Theory | 31 |
| Other Limitations to Range of Motion | 32 |
| The Mechanism of Passive Stretch on Myofibrillogenesis | 36 |
| Proposed Methods of Modulating Gene Expression via Stretching | 37 |
| Summary | 38 |

Chapter 4 **Connective Tissue: A Limiting Factor of Flexibility** 39

| | |
|---|----|
| Collagen | 39 |
| Elastic Tissue | 48 |
| The Relationship Between Collagen and Elastic Fibers | 50 |
| Structures Composed of Connective Tissue | 50 |
| Effects of Immobilization on Connective Tissue | 54 |
| Metabolic and Nutritional Influences on Connective Tissue | 55 |
| Summary | 58 |

Chapter 5 **Mechanical and Dynamic Properties of Soft Tissues** 59

| | |
|---|----|
| Terminology | 59 |
| Soft Tissues | 66 |
| Muscle | 70 |
| Vascular Tissue | 74 |
| Peripheral Nerves | 77 |
| Factors Affecting the Mechanical Properties of Connective Tissues and Muscles | 82 |
| The Need for Additional Research | 82 |
| Summary | 82 |

Chapter 6 **The Neurophysiology of Flexibility: Neural Anatomy and Neural Physiology** 85

| | |
|--|----|
| Structural Foundation: Cellular Neuroanatomy | 85 |
| Nerve Electrical Potential | 87 |
| Sensory Receptors Related to Stretching | 89 |

| | |
|--|-----|
| Reflexes and Other Spinal Neural Circuits | 95 |
| Plasticity of the Spinal Cord Neural Circuits | 99 |
| Neurological and Other Factors of Flexibility Training | 102 |
| Speculations for the Future | 104 |
| Summary | 104 |

Chapter 7 **Hypermobility of the Joint** **105**

| | |
|---|-----|
| Terminology | 105 |
| Assessment of Joint Hypermobility | 106 |
| Determining Factors of Hypermobility | 107 |
| Consequences of Hypermobility | 108 |
| General Management of Hypermobility | 108 |
| Inherited Syndromes | 109 |
| Research Perspectives in Heritable Disorders of Connective Tissue | 109 |
| Contortionism | 110 |
| Summary | 112 |

Chapter 8 **Relaxation** **113**

| | |
|---|-----|
| Defining Relaxation | 113 |
| Measuring Relaxation | 114 |
| Methodologies of Facilitating Muscular Relaxation | 114 |
| Summary | 126 |

Chapter 9 **Muscular Soreness: Etiology and Consequences** **127**

| | |
|--|-----|
| The Damaged or Torn Muscle Hypothesis | 127 |
| The Damaged Connective Tissue Hypothesis | 129 |
| The Hypothesis of Metabolic Accumulation or Osmotic Pressure and Swelling | 129 |
| The Lactic Acid Hypothesis | 131 |
| The Hypothesis of Localized Spasm of Motor Units | 131 |
| Predisposing Factors of Delayed Muscle Soreness | 132 |
| Trauma and Overload Injury to the Musculature and Connective Tissues | 133 |
| Medical Management of Acute Soft Tissue Injuries | 134 |
| Effects of Mechanical Stress on Elasticity and Strength of Collagen in Scar Tissue | 135 |
| Summary | 137 |

Chapter 10 **Special Factors in Flexibility** **139**

| | |
|--------------------------------------|-----|
| Children and Flexibility Development | 139 |
| Gender Differences in Flexibility | 142 |
| Body Build and Flexibility | 145 |

| | |
|-------------------------------------|-----|
| Racial Differences in Flexibility | 146 |
| Dominant Laterality and Flexibility | 148 |
| Warming Up and Cooling Down | 149 |
| Strength Training and Flexibility | 151 |
| Circadian Variations in Flexibility | 152 |
| Summary | 158 |

Chapter 11 **Social Facilitation and Psychology in Developing Flexibility** 159

| | |
|---|-----|
| Effects of an Audience on Developing Flexibility Through Stretching | 159 |
| Theoretical Aspects of Mental Training | 161 |
| Cybernetic Stretch | 161 |
| Psychosomatic Factors | 162 |
| Psychology of Compliance in Preventive and Rehabilitative Programs | 162 |
| Summary | 164 |

Chapter 12 **Stretching Concepts** 165

| | |
|------------------------------------|-----|
| Homeostasis | 165 |
| The Overstretching Principle | 165 |
| Retention of Flexibility | 166 |
| Requisite Knowledge for Stretching | 166 |
| Joint Flexibility Limitations | 166 |
| Other Principles of Stretching | 167 |
| Summary | 171 |

Chapter 13 **Types and Varieties of Stretching** 173

| | |
|---|-----|
| Traditional Classifications of Stretching | 173 |
| Additional Classifications | 176 |
| Proprioceptive Neuromuscular Facilitation | 180 |
| Other Stretching Techniques | 190 |
| Traction | 192 |
| Nontraditional Stretching Devices | 194 |
| Summary | 196 |

Chapter 14 **Mobilization, Joint Play, Manipulation, and Chiropractic Adjustment** 197

| | |
|-------------------|-----|
| Mobilization | 197 |
| Joint Play | 199 |
| Manipulation | 199 |
| Thrust Techniques | 201 |

Effects of Manipulation on Joint Mobility 205
Complications From Spinal Manipulation Therapy 205
Statistical Data on Complications 206
The Philosophy of "Straight" Chiropractic 208
Need for Additional Research 208
Summary 208

Chapter 15 Controversial Stretches 209

The Flexibility Continuum 209
X-Rated Exercises 211
No Absolute "No-Nos" 228
Summary 228

Chapter 16 Stretching and Special Populations 229

Flexibility and the Geriatric Population 229
Flexibility and Pregnancy 235
Flexibility and People With Physical Disabilities 236
Summary 236

Chapter 17 Anatomy and Flexibility of the Lower Extremity and Pelvic Girdle 237

The Foot and Toes 237
The Talocrural Joint 239
The Lower Leg 241
The Genual Joint 243
The Upper Leg 244
The Pelvic Region 250
The Coxal Joint 251
Summary 260

Chapter 18 Anatomy and Flexibility of the Vertebral Column 261

Gross Anatomy of The Vertebral Column 261
Function of the Vertebral Column 262
The Vertebrae 262
The Intervertebral Disks 263
The Vertebral Ligaments 267
Limits on Range of Motion of the Thoracic-Lumbar Region 268
The Interrelationship of Stretching the Lower Back, Pelvis, and Hamstrings 270
The Cervical Vertebrae 274
Movements of the Cervical Region 274
Summary 278

| | | |
|-------------------|---|------------|
| Chapter 19 | Anatomy and Flexibility of the Upper Extremity | 279 |
| | The Shoulder Girdle and Arm | 279 |
| | The Elbow Joint and Forearm Region | 287 |
| | The Radiocarpal Joint | 289 |
| | Summary | 291 |
| Chapter 20 | Functional Aspects of Stretching and Flexibility | 293 |
| | Aesthetic Aspect of Skills | 293 |
| | Biomechanical Aspect of Skills | 293 |
| | Jogging, Running, and Sprinting | 294 |
| | Swimming | 298 |
| | Throwing | 301 |
| | Wrestling | 303 |
| | Weight Lifting, Power Lifting, and Body Building | 304 |
| | Rib Cage Flexibility, Performance, and Respiration | 307 |
| | Summary | 308 |
| | Stretching Exercises | 309 |
| | References | 325 |
| | Author Index | 359 |
| | Subject Index | 365 |
| | About the Author | 373 |
