	Foreword	xi
	Preface	xvii
	Acknowledgments	xviii
	Contributors	xviii
1	Introduction	1
	References	8
2	The Usual Perspective and Its Limitations	11
2.1	The Problem-Solution View	13
2.2	Optimization or the “Best” Solution Search	15
2.3	Reductionism	15
2.4	Reliance on Data and Models	17
2.5	Quantification	22
2.6	Objectivity	24
2.7	Ignoring or Avoiding the Individual	25
2.8	Perceptions of Time	26
	References	29
3	Our Proposed Perspectives	31
3.1	Introduction	31

3.2	The Technical Perspective	34
3.3	The Organizational Perspective	36
3.4	The Personal Perspective	41
3.5	T + O + P: Characteristics and Comparisons	51
3.6	Integration of Perspectives	59
3.7	Linkages and the Interactions of Perspectives	61
3.8	Other Perspectives	69
	Acknowledgments	71
	References	73
4	Illustrations from the Public Sector	77
4.1	Military Technology	77
4.2	Local Crisis: The Mount St. Helens Eruption (Clary)	99
4.3	Denver International Airport (Szyliowicz and Goetz)	103
4.4	Other Cultural Contexts	106
4.5	Conclusion	108
	Acknowledgments	109
	References	109
5	Illustrations from the Private Sector	111
5.1	The Willamette Falls Hydroelectric Project (Hawke)	111
5.2	Electronic System Market: Failure of a Strategy (Cook)	120
5.3	Commercial Aircraft: The Wide-Body Trijets	134
5.4	Trading: The Stock Market	146
5.5	Conclusion	148
	Acknowledgments	148
	References	148
6	Technology: Risk and Assessment	149
6.1	Perspectives on Risk	149
6.2	The Alaska Oil Spill	151

6.3	The Bhopal Chemical Accident (Bowonder and Linstone)	188
6.4	On the Nuclear Accidents	200
6.5	Implications and Prospects	205
6.6	Conclusion	209
	Acknowledgments	209
	References	210
7	Technology: Forecasting and Planning	215
7.1	The Discounting Dilemma	215
7.2	Forecasting	225
7.3	Planning	232
	Acknowledgments	239
	References	239
8	Looking Ahead: Complexity Science, Chaos, and Multiple Perspectives	243
8.1	Complex Adaptive Systems	243
8.2	Limits on Forecasting	245
8.3	Modeling	248
8.4	Perspectives on Business Organizations	251
8.5	Areas of Research	255
8.6	Closing Comments	260
	References	260
9	Guidelines for the User	263
9.1	Seven Guidelines (Linstone and Meltsner)	263
9.2	Sample Work Plan	274
9.3	Coda	275
	Acknowledgments	276
	References	276
	Appendix	277
A.1	Interaction Mapping: Digraphs	277
A.2	Multiattribute/Multiparty Decision Structure	280

A.3	Assumptional Analysis	282
A.4	Delphi	284
A.5	Additional Guidelines for O and P Development	290
A.5.1	Basic Procedure	290
A.5.2	On Interviewing	291
	Acknowledgments	300
