PART ONE - MEDICAL CARE

CHAPTER 1

SURGERY AND TRAUMATOLOGY: SURGICAL MANAGEMENT OF SEVERELY INJURED PATIENTS WHEN RESOURCES ARE LIMITED	3
--	----------

1	INTRODUCTION	3
2	MANAGEMENT IN HOSPITAL	4
2.1	Initial management in hospital	4
2.2	Airway	5
2.3	Breathing	6
2.4	Circulation	6
2.5	Disability	8
2.6	Exposure	8
3	HEAD INJURIES	9
3.1	Blunt injuries	9
3.2	Penetrating injuries	9
3.3	Diagnosis	10
3.4	Priority	11
3.5	Management in the emergency room	11
3.6	Surgical treatment of penetrating head injuries	12
3.7	Management of blunt injuries	13
4	CHEST INJURIES	15
4.1	Introduction	15
4.2	Management in the emergency room	16

5	ABDOMINAL INJURIES	18
5.1	Introduction	18
5.2	Primary management in the emergency room	19
5.3	Penetrating injuries	20
5.4	General surgical strategy	21
5.5	Major vessels	22
5.6	Liver	23
5.7	Spleen	23
5.8	Pancreas	24
5.9	Duodenum	24
5.10	Small intestine	25
5.11	Large bowel	25
5.12	Retroperitoneal haematoma	25
5.13	Injuries to the urinary tract	26
5.14	Closure of the abdomen	26
5.15	Pelvic injuries	26
6	LIMB INJURIES	27
6.1	Introduction	27
6.2	Debridement in soft tissue injuries	28
6.3	Compartment syndrome	32
7	ADAPTED SURGICAL TECHNOLOGIES	33
7.1	Introduction	33
7.2	Wooden fixators	34
7.3	Appropriate technologies in exceptional situations	39
7.4	Conclusion	41
	References	42

CHAPTER 2

ANAESTHESIOLOGY AND RESUSCITATION 43

1	INTRODUCTION	43
2	THE CONTEXT OF ANAESTHESIA IN DISASTERS	43
2.1	History and evolution	43
2.2	Differences between anaesthesia under normal circumstances and during disasters	44
3	PATIENT POPULATION	45
3.1	Disaster-related clinical aspects	45
3.2	Problems of scene assessment and patient care	46
4	PRIMARY ANAESTHETIC SKILLS	48
4.1	Airway management	48
4.2	Intravenous access	48

5	CARDIOPULMONARY RESUSCITATION	49
5.1	Resuscitation under normal conditions	49
5.2	Resuscitation in disasters	50
5.3	Avoiding resuscitation	51
6	ADVANCED ANAESTHETIC SKILLS	52
6.1	Preparing the patient	52
6.2	Premedication	54
6.3	Correcting hypovolemic shock	54
6.4	The choice between different analgesic and anaesthetic techniques	55
7	LOGISTICS	60
8	TRAINING AND EDUCATION	61
	Bibliography	62

CHAPTER 3

CHEMICAL INJURIES 63

1	INTRODUCTION	63
2	MECHANISM OF TOXIC INJURY	65
2.1	Concept	65
2.2	Physical asphyxiants	66
2.3	Respiratory irritants	67
2.4	Systemic toxicants	67
3	MEDICAL PREPAREDNESS PLAN	70
3.1	Epidemiology and data collection	70
3.2	Structure of the emergency medical assistance	73
3.3	Tasks and responsibilities with job description	74
3.4	Alarm	74
3.5	Information strategy	74
3.6	Intervention phases	75
3.7	Logistics	75
3.8	Testing and evaluation of the medical disaster plan	76
4	MEDICAL ACTION PLAN	76
4.1	Preventive measures	76
4.2	Alert and warning	77
4.3	Mobilisation of health means	78
4.4	Scene assessment	78
4.5	Deployment of the emergency medical system chain	80
4.6	Medical field management	81
4.7	Management in medical facilities	91
4.8	Psychological management	93
4.9	Environmental management	93

4.10 Disaster follow-up 94

References 95

CHAPTER 4

COMMUNICABLE DISEASES 99

1 GENERAL OVERVIEW 99

1.1 The main communicable diseases 99

1.2 Factors influencing the impact of communicable diseases
in emergencies 100

2 COPING WITH COMMUNICABLE DISEASES IN EMERGENCIES 102

2.1 Natural disease cycle as applied to communicable diseases 102

2.2 Levels of intervention 103

2.3 Prevention and curative action 104

3 INTERVENTION STRATEGIES 104

4 STANDARD ACTIVITIES: TOOLS 105

4.1 The use of protocols for rapid assessment 106

4.2 Immunisation 106

4.3 Chemoprophylaxis 109

5 THERAPEUTIC APPROACHES 110

5.1 Mass treatment 110

5.2 Short treatments versus long treatments 110

6 HEALTH EDUCATION 110

7 SETTING PRIORITIES 111

7.1 Impact of communicable diseases 111

7.2 Influence of the seasons 112

7.3 Possibility of intervention 112

Bibliography 113

CHAPTER 5

MENTAL HEALTH 115

1 INTRODUCTION 115

2 POST-TRAUMATIC REACTIONS 117

2.1 Post-traumatic reactions of victims 117

2.2 Acute reactions 119

2.3 PTSD 119

2.4 Enduring personality change 121

2.5 Post-traumatic reactions of rescuers, helpers, and medical
staff in disasters 122

2.6	The cumulative stress and traumatic stress of personnel engaged in humanitarian relief operations	122
3	MANAGEMENT OF THE PSYCHOLOGICAL AND SOCIAL COMPONENT IN DISASTERS	124
3.1	Organising social and psychological support and care	124
3.2	The organisations and agencies	125
3.3	The possible role and functions of the Information and Support Centre	126
3.4	Emotional triage and outreach programmes	127
3.5	Fundamental elements for helping traumatised victims or groups	129
4	VULNERABLE GROUPS	129
4.1	Vulnerable groups in complex emergencies	129
4.2	Vulnerability reduction and vulnerable groups in natural and technological disasters	132
5	PREVENTION	133
5.1	General considerations on prevention techniques	133
5.2	Types of preventive services offered in the aftermath of a disaster	134
5.3	Outreach programs in the preventive perspective	134
5.4	Prevention among the 'helpers'	135
6	THE CULTURAL ASPECTS OF MENTAL HEALTH IN DISASTERS AND COMPLEX EMERGENCIES	137
6.1	Values and beliefs	137
6.2	Rating scales	138
6.3	Sub-cultures and minorities	138
6.4	Capacity building	139
	Summary	139
	Bibliography	140

CHAPTER 6

RADIATION INJURIES 141

1	INTRODUCTION	141
2	TECHNICAL CONSIDERATIONS	141
2.1	Nature of nuclear radiation	141
2.2	The track of radioactive particles in matter	142
2.3	Units of measurement	143
2.4	Biological consequences of radiation	144
2.5	Radioprotection	144
3	IRRADIATION INCIDENTS	145
3.1	Radioactive sources	145
3.2	Incidents due to radiation	146

4	CLINICAL AND BIOLOGICAL CONSEQUENCES OF EXPOSURE TO IONISING RADIATION - THERAPEUTIC APPROACH	147
4.1	Mechanism of irradiation	147
4.2	Acute external and whole body irradiation	147
4.3	Acute partial external irradiation ('radiation-induced burn')	151
4.4	External contamination	152
4.5	Internal irradiation following internal contamination	152
5	MANAGEMENT AND COMMUNICATION DURING IRRADIATION INCIDENTS	154
	Bibliography	155

PART TWO - PUBLIC HEALTH

CHAPTER 1

EPIDEMIOLOGY 159

1	DISASTER EPIDEMIOLOGY	159
1.1	Basic principles	159
1.2	Methods	159
2	APPLICATION OF EPIDEMIOLOGY IN DISASTERS	160
2.1	Activities	160
2.2	Damage assessment	160
2.3	Goal of disaster epidemiology	161
3	COMPLEX HUMANITARIAN DISASTERS	163
3.1	Progress in managing refugee crises	163
3.2	Mortality surveillance	164
3.3	Nutrition and public health issues	164
3.4	Surveillance systems	164
3.5	Evaluation of effectiveness and efficacy of health response	165
	Summary	166
	References	167

CHAPTER 2

ENVIRONMENTAL HEALTH 169

1	INTRODUCTION	169
2	INTERACTION BETWEEN A POPULATION AND ITS ENVIRONMENT	170
2.1	Types of interaction	170
2.2	Technical implications	171

2.3	General factors influencing relations between the population and the environment	171
3	PROBLEMS CAUSED BY EXCEPTIONAL SITUATIONS	172
3.1	Environmental changes	172
3.2	Health consequences	172
4	WATER	172
4.1	Water needs	174
4.2	Quantity of water takes precedence over quality	174
4.3	Water-supply techniques	174
4.4	Water storage	175
4.5	Treatment of water	175
4.6	Distribution	176
4.7	Use of water	176
5	ENVIRONMENTAL SANITATION	177
5.1	Nature of the problem	177
5.2	Controlling the problem	177
5.3	Garbage	178
5.4	Control of vectors	178
6	HOUSING AND ENERGY	179
6.1	Health risks	179
6.2	Norms	180
6.3	Solutions	180
	Bibliography	181

CHAPTER 3

NUTRITION 183

1	INTRODUCTION	183
2	NUTRITIONAL ASSESSMENT	184
2.1	Rapid assessment	184
2.2	Full assessment	185
2.3	Major nutritional risks and deficiencies	186
3	DETERMINING NUTRITIONAL REQUIREMENTS	188
3.1	General principles	188
3.2	Energy and protein requirements	189
3.3	Micronutrient requirements	191
4	MANAGEMENT OF A NUTRITIONAL EMERGENCY	191
4.1	Food distribution	191
4.2	Infant and young child feeding	195
4.3	Prevention, treatment and control of communicable diseases, and primary health care	195

4.4	Monitoring the adequacy of food access and intakes	196
4.5	Rehabilitation and development phase	197
5	HUMAN RESOURCE DEVELOPMENT	197
	Summary	198
	References	199
	Appendix	200

PART THREE - DISASTER MANAGEMENT

CHAPTER 1

DEFINITION, CLASSIFICATION AND SCORING OF DISASTERS 227

1	INTRODUCTION	227
2	METHODOLOGY	228
	2.1 Definition	228
	2.2 Classification and scoring	229
3	DISCUSSION	232
4	THE MEDICAL SEVERITY INDEX OF DISASTERS	232
	4.1 Introduction	232
	4.2 Methodology	233
	4.3 Casualty Load	233
	4.4 Severity of incident	234
	4.5 Capacity of medical services	236
	4.6 Medical severity index	237
5	DISCUSSION	238
	References	238

CHAPTER 2

ORDER IN THE CHAOS: MODELLING MEDICAL MANAGEMENT IN DISASTERS 239

1	INTRODUCTION	239
2	THE GENERAL PICTURE	239
3	THE TURNING POINT BETWEEN ACCIDENT AND DISASTER	240
	3.1 The medical severity index (<i>MSI</i>)	240
	3.2 Rutherford's Rule: estimating the number of casualties in a disaster	241
	3.3 The average severity of injuries sustained or the medical severity factor	244
4	CAPACITIES IN THE MEDICAL ASSISTANCE CHAIN	244
5	THE MEDICAL RESCUE CAPACITY	244

6	THE MEDICAL TRANSPORT CAPACITY	245
7	THE HOSPITAL TREATMENT CAPACITY	246
8	DEFINITION, CLASSIFICATION, AND ASSESSMENT OF DISASTERS	246
8.1	Definition	246
8.2	Classification	247
8.3	Assessment	248
9	DETERMINATION OF MEDICAL DISASTER PREPAREDNESS	248
10	TRIAGE AND THE 1-6 HOUR PERIOD FOLLOWING A DISASTER	250
	Summary	252
	References	252

CHAPTER 3

	EMERGENCY PREPAREDNESS	253
1	FRAMEWORK	253
2	THE CONTEXT OF EMERGENCY PREPAREDNESS	253
2.1	Emergency preparedness and vulnerability reduction	253
2.2	Community- environment - hazard	254
2.3	The context of vulnerability reduction	256
2.4	The multisectoral approach	256
3	A HEALTH SECTOR EMERGENCY PREPAREDNESS AND RESPONSE FRAMEWORK	257
4	DEVELOPING EMERGENCY PREPAREDNESS PROGRAMMES	257
4.1	Four aspects	257
4.2	Guiding principles	258
4.3	Emergency preparedness process	258
5	MANAGING THE EMERGENCY PLANNING PROCESS	259
5.1	Emergency health planning	259
5.2	The planning process	260
5.3	Assessing health sector emergency preparedness	261
	References	262

CHAPTER 4

	COMMUNITY RISK MANAGEMENT	263
1	INTRODUCTION	263
2	CHANGE IN THE INTERNATIONAL APPROACH	264
3	EVOLVING TERMINOLOGY	265
3.1	Risk	265
3.2	Hazard	266

3.3 Community 266
3.4 Vulnerability 266
4 THE EMERGENCE OF RISK MANAGEMENT 267
5 DEVELOPMENT, EMERGENCIES AND DISASTERS 271
Summary 272

CHAPTER 5

CO-ORDINATION - COMMUNICATION - COMMAND 275

1 OBJECTIVES AND DEFINITIONS 275
1.1 Objectives 275
1.2 Definitions 275

2 DECISION-MAKING PROCESS AND MANAGEMENT 275
2.1 Decision-making process 275
2.2 Responsibility 276
2.3 Co-ordination 276
2.4 Communications 277
2.5 Command 277
2.6 Commander 277
2.7 Execution 277
2.8 Strategy 278
2.9 Tactics 278
2.10 Logistics 278

3 CO-ORDINATION AND COMMAND 278
3.1 Co-ordination 278
3.2 Command 279

4 CO-ORDINATION PROCEDURES 280
4.1 Definition of duties 280
4.2 Incident information 280
4.3. Disaster plan selection 281

5 BASIC PRINCIPLES OF DECISION MAKING UNDER STRESS 281
5.1 Authority 281
5.2 Flexibility 281
5.3 Timeliness 282
5.4 Economy 282
5.5 Simplicity 282
5.6 Safety 282
5.7 Mobility 282
5.8 Balance 282
5.9 Control 282

6	USEFUL ADVICE FOR AUTHORITIES	283
6.1	Identify and reinforce weak points	283
6.2	Identify the resolution time	283
6.3	Use of resources	283
6.4	Understanding and knowledge	283
6.5	Learning activities	283
6.6	Planning process	284
6.7	Procedures	284
6.8	Training	284
7	COMMUNICATIONS	284
7.1	Key issues	284
7.2	Basic systems	285
7.3	Radio communications	285
7.4	Management	285
	References	287

CHAPTER 6

PRE-HOSPITAL CARE 289

1	INTRODUCTION	289
2	GENERAL SETTING: THE STRATEGIC APPROACH	289
2.1	The rescue chain	289
2.2	Aims of medical in case of a mass emergency	290
2.3	Tasks to be achieved in a disaster pre-hospital setting	291
3	THE DETAILS OF TREATMENT	292
3.1	The tactical approach	292
3.2	The 'bridgehead'	292
3.3	Starting to care for disaster victims	293
3.4	Putting the theory into practice	296
4	PRE-HOSPITAL CARE BASIC STRATEGIC ALGORITHM	307
	Bibliography	309

CHAPTER 7

ADVANCED MEDICAL POST 311

1	INTRODUCTION	311
2	THE MINISTERIAL DECREE OF 1989	311
3	THE SETTING UP OF THE AMP	312
4	RECEPTION, TRIAGE, AND TREATMENT OF VICTIMS AT THE AMP AND EVACUATION OF VICTIMS FROM THE AMP	313

4.1	Identification and registration	313
4.2	Clinical examination and categorisation of victims: medical triage	313
4.3	Medical care	314
4.4	Medical and paramedical personnel	314
4.5	Temporary morgue	314
4.6	Conditioning and preparing of evacuation and transportation of patients to receiving facilities	315
5	PROPOSALS FOR IMPROVING EFFICIENCY AND EFFECTIVENESS OF AMP	315
5.1	Organisational arrangements	315
5.2	Procedure of activation	316
5.3	Setting up of AMP	316
5.4	Command structure	318
6	ADMINISTRATIVE SECTION OF AMP	319
7	CONCLUSION	319
	Annex	320
	Bibliography	321

CHAPTER 8

TRIAGE 323

1	DEFINITION OF TRIAGE	323
2	GOALS OF TRIAGE	324
3	PRE-HOSPITAL TRIAGE: BASIC PRINCIPLES	324
4	C.E.S.I.R.A. PROTOCOL	325
5	ON-SITE TRIAGE	326
6	TRIAGE AT A.M.P. LEVEL	327
7	TRIAGE CARD	327
8	HOSPITAL-BASED TRIAGE	329
9	CONCLUSIONS	329
10	SOME CONSIDERATIONS ON TRIAGE IN DISASTERS	329
10.1	Introduction	329
10.2	Ethical considerations	330
10.3	Categorisation of casualties	331
10.4	Conclusions	334
	References	335

CHAPTER 9

HOSPITAL DISASTER PROCEDURE	337
1 INTRODUCTION	337
2 ALARM	338
3 PREPARATION	338
4 EXAMPLE OF AN INSTRUCTION	340
5 EXECUTION	340
6 EVALUATION	341
7 HOSPITAL INTERNAL DISASTER PROCEDURE	342
8 SPECIFIC SITUATIONS	343
References	345

CHAPTER 10

MEDICAL MANAGEMENT OF CROWD GATHERING	347
1 INTRODUCTION	347
2 RISK ANALYSIS AND PREVENTION	348
2.1 Risk analysis	348
2.2 Prevention	350
3 PLANNING AND ORGANISATION OF MEDICAL MEANS	350
3.1 Activation of the medical rescue chain	351
3.2 Organisation of on-site Medical Post and Command Post	351
4 MONITORING AND EVALUATION	355
5 CONCLUSION	356
Bibliography	358

CHAPTER 11

EMS SUPPORT OF EXECUTIVE PROTECTION AND COUNTER-TERRORISM OPERATIONS	359
1 INTRODUCTION	359
2 EMS ROLE IN PERSONNEL, EXECUTIVE AND VIP PROTECTION OPERATIONS	360
3 MEDICAL CROSS-TRAINING FOR THE SECURITY DETAIL	361
4 ORIENTATION OF PROTECTION SPECIALISTS TO THE HOSPITAL ENVIRONMENT AND FUNCTION	362

5	SELECTION OF MEDICAL PERSONNEL FOR PROTECTION OPERATIONS	364
6	EMS ROLE IN COUNTER-TERRORISM OPERATIONS	366
6.1	The Problem: verifying competence of local civilian EMS/military assets	366
6.2	The Problem: variability in competence and sustainment training/experience	367
7	SELECTION OF MEDICAL PERSONNEL AND/OR MEDICAL TRAINING FOR NON-MEDICAL PERSONNEL	369
8	INITIATING THE MEDICAL RESPONSE IN A TACTICAL OPERATION	370
	References	373
	Appendix	374

CHAPTER 12

	INFORMATION AND THE MEDIA	383
1	INTRODUCTION	383
2	THE OATH	383
3	CALL FOR RESPECT	384
4	POSSIBLE APPROACH	385
5	HONEYMOON AND LOVE-HATE RELATIONSHIP	386
6	PREVENTION	387
7	THE INFORMATION PROCESS	389
7.1	Why inform?	389
7.2	Who must be kept informed?	390
7.3	Who is interested in what information?	390
7.4	When is it appropriate to inform?	391
8	ANTICIPATE RATHER THAN UNDERGO	392
8.1	Preliminaries	392
8.2	Information <i>in vivo</i>	392
8.3	Information ' <i>post-mortem</i> '	392
9	FORM AND CONTENT OF A MESSAGE	393
9.1	The newspaper interview	393
9.2	The televised interview	393
9.3	The radio interview	394
9.4	To trust or not to trust	395
10	THE GLOBALISATION AND THE MEDIA	396
10.1	The global village	396
10.2	The trap	396
10.3	Oversimplification and caricatures	397

CHAPTER 13

REHABILITATION 399

- 1 INTRODUCTION 399
- 2 THE CARE OF AMPUTEES 399
 - 2.1 Initial treatment 400
 - 2.2 The fitting of prostheses 400
 - 2.3 The technical aspects of prostheses 401
 - 2.4 Training of local staff 401
- 3 PARAPLEGICS 403
 - 3.1 Victims of spinal injury 403
 - 3.2 The rehabilitation centre for paraplegics 404
- References 405

CHAPTER 14

MANAGEMENT OF DISPLACED PERSONS AND REFUGEES 407

- 1 INTRODUCTION 407
- 2 GENERAL ISSUES 408
 - 2.1 Public health issues 408
 - 2.2 Mortality rate 409
 - 2.3 Major priorities 409
- 3 REFUGEE CAMP SETTINGS 410
 - 3.1 Risks 410
 - 3.2 The site 410
 - 3.3 Water-related infections 411
 - 3.4 Measles 413
 - 3.5 Nutrition 413
 - 3.6 Mental and social well-being 413
 - 3.7 Conclusion 413
- 4 CRITICAL PUBLIC HEALTH INTERVENTIONS 414
 - 4.1 Environmental health 414
 - 4.2 Communicable disease control and epidemic management 416
 - 4.3 Immunisation 416
 - 4.4 Nutrition 417
 - 4.5 Maternal and child health 417
 - 4.6 Clinical care 418
- Summary 418
- References 418
- Appendix 422

CHAPTER 15

INTERNATIONAL ASSISTANCE	425
1 INTRODUCTION	425
2 CO-ORDINATION OF FLOW OF SUPPLIES	425
3 MANAGEMENT OF HUMANITARIAN SUPPLIES	426
3.1 National policy	426
3.2 The SUMA philosophy and principles	426
3.3 Three pragmatic premises	427
3.4 Steps and functions to ensure proper supply management	427
4 STOCK CONTROL	431
5 COMMODITY TRACKING SYSTEMS VERSUS SUPPLY MANAGEMENT	432
6 ISSUES IN SUPPLY MANAGEMENT	432
7 LOGISTIC CHAIN OF HUMANITARIAN SUPPLY MANAGEMENT	433
8 SHARING ELECTRONIC INFORMATION	434
9 REPORTING AND LISTINGS	435
10 CONCLUSION	435
Notes	435

CHAPTER 16

THE ROLE OF THE INTERNATIONAL FEDERATION OF RED CROSS AND RED CRESCENT SOCIETIES IN DISASTER MANAGEMENT 437

1 INTRODUCTION	437
2 THE ROLE OF NATIONAL SOCIETIES IN DISASTER MANAGEMENT	438
2.1 General issues	438
2.2 Community level	439
2.3 Central /national level	440
2.4 Liaison at international level	441
3 THE FEDERATION SECRETARIAT AND HEALTH SERVICES IN DISASTER	442
3.1 Primary role	442
3.2 Emergency health, population displacements	443
3.3 Epidemic control	445
3.4 Food and nutrition	446
3.5 Water and sanitation	446
3.6 Technological disasters and environmental health	446
3.7 Psychological support programmes	447
4 CHALLENGES FOR THE FUTURE	447
4.1 Increasing number of people victims affected by disasters	448

4.2	Increasing complexity and costs of operations	448
4.3	Decreasing availability of resources	449
4.4	Increased demands on relief workers	450
4.5	Increased security problems	450
5	CONCLUSION	450

CHAPTER 17

PSYCHOLOGICAL AND PHYSICAL ABUSE: TORTURE - A MAN-MADE DISASTER 451

1	INTRODUCTION	451
2	DEFINITION OF TORTURE	451
3	WHO IS SUBJECTED TO TORTURE?	452
4	AIMS OF TORTURE	453
5	METHODS OF TORTURE	453
5.1	Physical torture	453
5.2	Mental torture	454
5.3	Sexual torture	454
6	CONSEQUENCES OF TORTURE	455
6.1	Physical consequences	455
6.2	Psychological sequelae	456
6.3	Social consequences	457
7	REHABILITATION MODELS	457
8	CONCLUSIONS	459
	References	459

CHAPTER 18

EUR-OPA MAJOR HAZARDS AGREEMENT 461

1	ETHICS AND DISASTER MEDICINE: FUNDAMENTAL CONCEPTS	461
1.1	Concept of disasters	461
1.2	Disaster medicine	462
1.3	The concept of medical ethics	462
2	FEATURES SPECIFIC TO THE MEDICAL MANAGEMENT OF DISASTER SITUATIONS	464
2.1	Prevention phase	465
2.2	Crisis phase	465
2.3	Post-disaster phase	467
3	RESEARCH ON ETHICS AND DISASTER MEDICINE	467
3.1	Proposed case study concerning the prevention of a major accident	468

3.2 Priorities in care 471
3.3 Euthanasia 473
4 CONCLUSION 475
Appendix 476

PART 4 - EDUCATION AND TRAINING

CHAPTER 1

EDUCATION AND TRAINING 481

1 INTERNATIONAL GUIDELINES 481

1.1 International guidelines for education and training
in disaster medicine 481

1.2 Disaster medicine - definition and goals 482

1.3 Education and training in disaster medicine 482

1.4 Need for common guidelines for education and training 483

1.5 How to use the curriculum 484

2 DETAILED DESCRIPTION OF SKILLS KNOWLEDGE AND LEVELS 486

GLOSSARY OF NEW CONCEPTS IN DISASTER MEDICINE 497
