

Contents

List of Illustrations viii

Preface xi

Chapter 1 • The Early Microscopists	1
Chapter 2 • Globules, Fibres and Twisted Cylinders	15
Chapter 3 • The Case for France	23
Chapter 4 • Passionate Disputes among Botanists	37
Chapter 5 • The Views of Some Standard German Textbooks	47
Chapter 6 • Little Animals	54
Chapter 7 • Dumortier and Mohl	64
Chapter 8 • The Discovery of the Cell Nucleus	76
Chapter 9 • The Cradle of Histology	82
Chapter 10 • Müller, Schleiden and Schwann	94
Chapter 11 • The Reaction to Schwann	106
Chapter 12 • From Fertilized Egg to Embryo	117
Chapter 13 • Remak and Virchow	128
Chapter 14 • Division of the Cell Nucleus	138
Chapter 15 • The Indispensability of the Cell Membrane	149
Chapter 16 • Chromosomes	153
Chapter 17 • The Cellular Determinants of Heredity	166

Notes 175

Appendix 185

Index 201

Illustrations

1. Cross-section (A) and longitudinal section (B) of thin sections of cork (from Hooke's *Micrographia*) 2
2. Pierre Gassendi (1592–1655) (by permission of the President and Council of the Royal Society) 4
3. Gottfried Wilhelm Leibniz (1646–1716) (by permission of the President and Council of the Royal Society) 4
4. Hooke's microscope (from the *Micrographia*) 5
5. Nehemiah Grew (1641–1712) (by permission of the President and Council of the Royal Society) 8
6. Marcello Malpighi (1628–94) (by permission of the President and Council of the Royal Society) 8
7. Grew's illustration of sections through a vine stem (from the *Anatomy of Plants*) 11
8. Malpighi's illustration of sections through the stalk of *Portulacca* (from the *Anatomes plantarum pars prima*) 13
9. Antoni van Leeuwenhoek (1632–1723) (from the *Collected Letters of Antoni van Leeuwenhoek*, Swets & Zeitlinger, Amsterdam 1948) 14
10. Jan Swammerdam (1637–80) (courtesy of Gustav Fischer Verlag, Jena) 16
11. Albrecht von Haller (1708–78) (by permission of the President and Council of the Royal Society) 19
12. Xavier Bichat (1771–1802) (from H. E. Sigerist, *Grosse Aerzte*, J. F. Lehmanns Verlag, Munich 1932) 19
13. Caspar Friedrich Wolff (1733–94) (from B. J. Gottlieb and A. Berg, *Das Anlitz des germanischen Arztes*, Rembrandt-Verlag, Berlin 1942) 20
14. Felice Fontana (1720–1805) (courtesy of the Istituto e Museo di Storia della Scienza, Firenze) 21
15. Arnold's view of the fine structure or epidermal tissue (a) and muscle (b). Both are composed of arrays of uniform globules that differ only in their disposition (from Arnold's *Lehrbuch der Physiologie des Menschen*) 27
16. Henri Dutrochet (1776–1847) (courtesy of the archives of the Académie des sciences, Paris) 28
17. François Raspail (1794–1878) (from J. Poirier and C. Langlois, *Raspail et la vulgarisation médicale*, J. Vrin, Paris) 31
18. Charles-François Brisseau-Mirbel (1776–1854) (courtesy of the archives of the Académie des sciences, Paris) 38
19. Gottfried Reinhold Treviranus (1776–1837) (from B. J. Gottlieb and A. Berg, *Das Anlitz des germanischen Arztes*, Rembrandt-Verlag, Berlin 1942) 39

- | | |
|--|-----|
| 20. Bonaventura Corti (1729–1813) (courtesy of Professor Gian Paolo Turrini, Fondazione Collegio San Carlo, Modena) | 41 |
| 21. Leeuwenhoek's illustration of animalcules (bacteria) from the mouth (from C. Dobell, <i>Anthony van Leeuwenhoek</i>) | 55 |
| 22. A facsimile of Leeuwenhoek's microscope, with an explanatory diagram (from C. Dobell, <i>Anthony van Leeuwenhoek</i>) | 55 |
| 23. Abraham Trembley (1710–84) (from J. R. Baker, <i>Abraham Trembley</i> . Edward Arnold, London 1952) | 57 |
| 24. Trembley's illustration of binary fission in <i>Synedra</i> (from J. R. Baker, <i>Abraham Trembley</i>) | 58 |
| 25. Lazzaro Spallanzani (1729–99) (from Lazzaro Spallanzani, <i>Viaggio in Oriente</i> . Fratelli Bocca, Turin 1888) | 58 |
| 26. Lorenz Oken (1779–1851) (from B. J. Gottlieb and A. Berg, <i>Das Anlitz des germanischen Arztes</i> . Rembrandt-Verlag, Berlin 1942) | 62 |
| 27. Barthélemy Dumortier (1797–1878) (courtesy of Dr Claude Szpirer and the Service des archives, Université Libre de Bruxelles) | 65 |
| 28. Dumortier's illustration of binary fission and partition formation in <i>Conferva aurea</i> (from the <i>Nova Acta Phys.-Med.</i>) | 67 |
| 29. Hugo von Mohl (1805–72) (courtesy of Professor F. Oberwinkler and the Botanisches Institut of Eberhard-Karls Universität, Tübingen) | 72 |
| 30. Félix Dujardin (1801–60) (courtesy of the archives of the Académie des sciences, Paris) | 74 |
| 31. Fontana's illustrations of epithelial cells from the skin of an eel. A patch of cells is shown, a single cell at a higher magnification (a) and a red cell (c) for comparison. The epithelial cells show recognizable nuclei. (From Fontana's <i>Traité sur le venin de la vipère</i> .) | 77 |
| 32. Robert Brown (1773–1858) (by permission of the President and Council of the Royal Society) | 79 |
| 33. Rudolf Wagner (1805–64) (courtesy of the Niedersächsische Staats- und Universitätsbibliothek, Göttingen) | 80 |
| 34. Wagner's illustration of a nucleolus within a nucleus (from the <i>Arch. Path. Anat.</i>) | 81 |
| 35. Jan Evangelista Purkyně (1787–1869) (from V. Kruta, <i>Jan Evangelista Purkyně</i> . Czech Academy of Sciences) | 83 |
| 36. Gabriel Gustav Valentin (1810–83) (from the <i>Berner Beiträge für Geschichte der Medizin und Naturwissenschaften</i> . Paul Haupt, Bern 1953, No. 12) | 87 |
| 37. Purkyně's illustrations of the large cells in the cerebellum (Purkyně cells) | 90 |
| 38. Johannes Müller (1801–58) (from B. J. Gottlieb and A. Berg, <i>Das Anlitz des germanischen Arztes</i> . Rembrandt-Verlag, Berlin 1942) | 95 |
| 39. Jacob Henle (1809–85) (from H. E. Sigerist, <i>Grosse Aerzte</i> . J. F. Lehmanns, Verlag, München 1932) | 95 |
| 40. Matthias Schleiden (1804–81) (from M. Möbius, <i>Matthias Jacob Schleiden zu seinem 100 Geburtstag</i> . Wilhelm Engelmann, Leipzig 1904) | 97 |
| 41. Theodor Schwann (1810–82) (courtesy of Wellcome Institute Library, London) | 99 |
| 42. Title page of Schwann's monograph, <i>Mikroskopische Untersuchungen</i> | 99 |
| 43. Franz Unger (1800–70) (courtesy of the Institut für Geschichte der Medizin der Universität, Vienna) | 109 |

- | | |
|--|-----|
| 44. Ferdinand Cohn (1828–98) (from Thomas A. Brock, <i>Robert Koch</i> . Science Tech. Publishers, Madison, Wisconsin 1988) | 111 |
| 45. Carl Nägeli (1817–91) (courtesy of the Mendelianum, Moravian Museum, Brno) | 113 |
| 46. Karl von Baer (1792–1876) (from B. J. Gottlieb and A. Berg, <i>Das Anlitz des germanischen Arztes</i> . Rembrandt-Verlag, Berlin 1942) | 118 |
| 47. Mauro Rusconi (1776–1849). A self-portrait in pencil (courtesy of Professors Marco Fraccaro and Alberto Calligaro of the Università di Pavia; from the Dipartimento di Biologia Animale) | 119 |
| 48. Von Baer's illustrations of segmentation in the frog's egg (from the <i>Arch Anat Physiol</i> .) | 121 |
| 49. Rusconi's illustrations of segmentation in the frog's egg. The original is in colour (from Rusconi's <i>Développement de la grenouille</i>) | 121 |
| 50. Robert Remak (1815–65) (courtesy of Professor Heinz-Peter Schmiedebach and the Institut für Geschichte der Medizin, Freie Universität, Berlin) | 129 |
| 51. Rudolf Virchow (1821–1902) (from the archives of the Sir William Dunn School of Pathology, University of Oxford) | 132 |
| 52. The title page of the third edition of Virchow's <i>Cellularpathologie</i> | 134 |
| 53. Wilhelm Hofmeister (1824–77) (from K. von Goebel, <i>Wilhelm Hofmeister</i> , trans. H. M. Bower. Royal Society, London 1926) | 142 |
| 54. Hofmeister's illustration of the stages of mitosis: metaphase (upper left); anaphase (upper right); telophase (lower left); reconstitution of the daughter nuclei (lower right) | 143 |
| 55. Eduard Strasburger (1844–1912) (courtesy of Gustav Fischer Verlag, Jena) | 147 |
| 56. Otto Bütschli (1848–1920) (courtesy of Gustav Fischer Verlag, Jena) | 147 |
| 57. Max Schultze (1825–74) (courtesy of Gustav Fischer Verlag, Jena) | 150 |
| 58. Hugo de Vries (1848–1935) (courtesy of Gustav Fischer Verlag, Jena) | 151 |
| 59. Edouard Balbiani (1825–99) (courtesy of the Collège de France) | 154 |
| 60. Walther Flemming (1843–1905) (courtesy of Gustav Fischer Verlag, Jena) | 155 |
| 61. Oscar Hertwig (1849–1922) (photograph provided by Askan Hertwig, by courtesy of Dr Paul Weindling, Oxford) | 159 |
| 62. Edouard van Beneden (1846–1910) (courtesy of Dr Claude Szpirer and the Service des archives, Université Libre de Bruxelles) | 160 |
| 63. Van Beneden's illustration of the four chromosomes (anses chromatiques) of <i>Ascaris megalocephala</i> , two paternal and two maternal (from the <i>Arch. Biol.</i>) | 161 |
| 64. Carl Rabl (1853–1917) (courtesy of the Institut für Geschichte der Medizin der Universität, Vienna) | 163 |
| 65. Ernst Haeckel (1834–1919) (from B. J. Gottlieb and A. Berg, <i>Das Anlitz des germanischen Arztes</i> . Rembrandt-Verlag, Berlin 1942) | 167 |
| 66. Wilhelm Roux (1850–1924) (courtesy of Gustav Fischer Verlag, Jena) | 168 |
| 67. August Weismann (1834–1914) (courtesy of Gustav Fischer Verlag, Jena) | 169 |
| 68. Theodor Boveri (1862–1915) (courtesy of Wissenschaftliche Verlagsgesellschaft, Stuttgart) | 170 |
