

# Contents

<b>Preface</b>	<b>vii</b>
<b>1. Introduction</b>	<b>1</b>
1.1. Categorical Response Data, 2	
1.2. Organization of This Book, 5	
Chapter Notes, 6	
Problems, 6	
<b>2. Describing Two-Way Contingency Tables</b>	<b>8</b>
2.1. Table Structure for Two Dimensions, 8	
2.2. Ways of Comparing Proportions, 13	
2.3. Summary Measures of Association, 19	
2.4. Historical Overview, 26	
Chapter Notes, 28	
Problems, 29	
<b>3. Inference for Two-Way Contingency Tables</b>	<b>36</b>
3.1. Sampling Distributions, 37	
3.2. Testing Goodness-of-Fit, 42	
3.3. Testing Independence, 47	
3.4. Large-Sample Confidence Intervals, 54	
3.5. Exact Tests for Small Samples, 59	
3.6. Exact Non-null Inference, 66	
Chapter Notes, 68	
Problems, 70	

- 4. Models for Binary Response Variables** **79**
- 4.1. Generalized Linear Models, 80
  - 4.2. Logistic Regression, 84
  - 4.3. Logit Models for Categorical Data, 91
  - 4.4. Using Models to Improve Inferential Power, 97
  - 4.5. Probit and Extreme Value Models, 102
  - 4.6. Model Diagnostics, 107
  - 4.7. Fitting Logit Models, 112
  - 4.8. Conditional Logistic Regression, 117
  - Chapter Notes, 119
  - Problems, 122
- 5. Loglinear Models** **130**
- 5.1. Loglinear Model for Two Dimensions, 130
  - 5.2. Table Structure for Three Dimensions, 135
  - 5.3. Loglinear Models for Three Dimensions, 143
  - 5.4. Loglinear Models for Higher Dimensions, 150
  - Chapter Notes, 153
  - Problems, 155
- 6. Fitting Loglinear and Logit Models** **165**
- 6.1. Sufficiency and Likelihood for Loglinear Models, 165
  - 6.2. Estimating Expected Frequencies, 169
  - 6.3. Testing Goodness of Fit, 174
  - 6.4. Estimating Model Parameters, 178
  - 6.5. Iterative Maximum Likelihood Estimation, 184
  - 6.6. Analyzing Rates and Survival Times Using Loglinear Models, 189
  - 6.7. Table Standardization, 196
  - Chapter Notes, 199
  - Problems, 200
- 7. Building and Applying Loglinear Models** **210**
- 7.1. Partitioning Chi-Squared to Compare Models, 210
  - 7.2. Strategies in Model Selection, 215
  - 7.3. Analysis of Residuals, 224

- 7.4. Testing Conditional Independence, 228
- 7.5. Estimating and Comparing Conditional Associations, 235
- 7.6. Sample Size and Power Considerations, 239
- 7.7. Empty Cells and Sparseness in Contingency Tables, 244
- Chapter Notes, 251
- Problems, 252
  
- 8. Loglinear-Logit Models for Ordinal Variables** **261**
  - 8.1. Linear-by-Linear Association, 263
  - 8.2. Row Effects and Column Effects Models, 269
  - 8.3. Models for Ordinal Variables in Multidimensional Tables, 274
  - 8.4. Testing Independence for Ordinal Classifications, 282
  - 8.5. Other Models Having Parameter Scores, 287
  - 8.6. Model Selection for Ordinal Variables, 293
  - Chapter Notes, 295
  - Problems, 297
  
- 9. Multinomial Response Models** **306**
  - 9.1. Generalized Logit Models and Loglinear Models, 307
  - 9.2. Multinomial Logit Models, 313
  - 9.3. Logits for Ordinal Responses, 318
  - 9.4. Cumulative Logit Models, 322
  - 9.5. Cumulative Link Models, 331
  - 9.6. Mean Response Models, 333
  - Chapter Notes, 336
  - Problems, 338
  
- 10. Models for Matched Pairs** **347**
  - 10.1. Comparing Dependent Proportions, 348
  - 10.2. Symmetry Models, 353
  - 10.3. Marginal Homogeneity, 358
  - 10.4. Square Tables with Ordered Categories, 361
  - 10.5. Measuring Agreement, 365

10.6. Bradley–Terry Model for Paired Comparisons, 370

Chapter Notes, 374

Problems, 375

**11. Analyzing Repeated Categorical Response Data 386**

11.1. Symmetry, 387

11.2. Marginal Homogeneity, 390

11.3. Modeling a Repeated Categorical Response, 395

11.4. Modeling a Repeated Ordinal Response, 401

11.5. Markov Chain Models, 406

Chapter Notes, 410

Problems, 412

**12. Asymptotic Theory for Parametric Models 418**

12.1. Delta Method, 419

12.2. Asymptotic Distributions of Estimators of Model Parameters and Cell Probabilities, 425

12.3. Asymptotic Distribution of Residuals and Goodness-of-Fit Statistics, 431

12.4. Asymptotic Distributions for Loglinear Models, 437

Chapter Notes, 439

Problems, 440

**13. Estimation Theory for Parametric Models 445**

13.1. Maximum Likelihood for Generalized Linear Models, 445

13.2. Maximum Likelihood for Loglinear Models, 453

13.3. Weighted Least Squares for Categorical Data, 458

13.4. Bayesian Inference for Categorical Data, 462

13.5. Other Methods of Estimation, 471

Chapter Notes, 476

Problems, 477

**Appendix A. Using Computer Software to Analyze Categorical Data 484**

A.1. Software Packages, 484

A.2. Listings of Computer Routines by Chapter, 488

CONTENTS	xv
<b>Appendix B. A Twentieth-Century Tour of Categorical Data Analysis</b>	<b>505</b>
<b>Appendix C. Chi-Squared Distribution Values for Various Right-Hand Tail Probabilities</b>	<b>506</b>
<b>Bibliography</b>	<b>508</b>
<b>Index of Examples</b>	<b>541</b>
<b>Index of Selected Notation</b>	<b>543</b>
<b>Author Index</b>	<b>544</b>
<b>Subject Index</b>	<b>549</b>
